

Map of the world by (~2,632 AR)

The known world in Minara's Era (~2,632 AR). This gallery catalogs every country, sea, island, region, and settlement labeled on the late-imperial map — organized by area and cross-checked against the *World Without God* canon and the Name Evolution Across Eras record.

Era shown: Minara's Era, ~2,632 AR — the late imperial order. For earlier names, see the Civil War Period and Crandona's Era maps.

The Six Kingdoms in Minara's Era — Countries & Capitals

By ~2,632 AR the continent is a single empire of kingdoms. The map labels six realms; each name is the *late imperial* name, several of which differ from the spellings on older maps.

Kingdom (on map)	Capital	Position on map	Was previously	Rank / note
Tarmet	Bela	North-central	Gherci → Caporiolan Kingdom	👑 Overall capital of the entire empire — highest rank
Lyiezer	Vellin	Far west	Aicruae → Tanan Grand Duchy	Impartial standing toward the empire (2nd rank, shared)
Ociyaran	Zada	Northeast	Equateiy → Uxridian Grand Duchy	Second-highest rank, shared with Lyiezer
Bertailia	Zemela	Southeast peninsula	Vikitsv → Theolissea	Third rank — few aristocrats, some low-ranked magicians
Civer	Lorne	Central / south-central	Pireaynea → Lingia	Richer than expected late in the empire — its mines
Atriki	Elgan	Center-east	Coelum → Hikai	Bottom of the hierarchy — farmers & low-ranking merchants

Spelling watch. The map writes **Lyiezer** (canon *Lajazer*) and **Bertailia** (canon *Berlailia*). Treat these as the Minara's-Era map spellings; reconcile against the Name Evolution page if you want one canonical spelling.

Seas & Major Waters

- **The Quather Sea** — west, along Lyiezer's coast. The only sea to keep its name unchanged across all three eras. ✅ Canon

- **The Henem Bay** — the small northern coastline, above Tarmet/Atriki. Name persists into Minara's Era. ✅ Canon
- **The Obery Sea** — northeast and east coast (Ociyaran & Bertailia). Name reverted from the Crandona-era "Orburydon Sea." ✅ Canon
- **The Fetora Sea** — the southern coastline. Name reverted from the Crandona-era "Thult (Southern Waters)." ✅ Canon

Thult & Neutral / Sacred Sites

- **Thult** — far southeast, off the Bertailia corner. The former **Mystic Isles**, once believed to link the world of the gods to the world of mortals. By Minara's Era it persists in name but has **no political boundary drawn** around it — now barren and desertified. ✅ Canon
- **The Academy** — south-central, off the southern coast between Lyiezer and Civer. Not one of the six kingdoms; a distinct enclave (detailed below). ⚠️ *New on this era's map — see the Academy section.*

The Academy — Close-Up Annotation

 **The Academy in detail.** A walled enclave set apart from the six kingdoms, ringed by two concentric barriers and anchored by the central **Academy Building**. The close-up image labels every structure; they're cataloged below by ring, from the outer approach inward.

The Academy — Layout (outer → inner)

Ring / zone	Labels on the map	What it is
Approach (off-island)	World Portals	The portal cluster on the smaller landmass to the southwest — the entry/exit point linking the Academy to the wider world (and likely beyond).
Outer ring	Main Barrier	The first/outermost ward enclosing the whole Academy peninsula.

Ring / zone	Labels on the map	What it is
Inner ring	Second Barrier	The inner ward separating the core campus from the Town below.
Campus core (north)	Academy Building · Library · Training Grouds · Male Dorms · Female Dorms	The main teaching hall at the heart, with the Library to the west, the Training Grounds to the north, and the dorms flanking east (Female) and the north approach (Male).
Town & south reach	Town · Cafe Iri	The settlement below the Second Barrier, with Cafe Iri marked at the southern tip.

Every label on the close-up

- **Academy Building** — the central hall; the campus radiates from it.
- **Library** — west of the Academy Building.
- **Training Grouds** (*as labeled — "Training Grounds"*) — the northern field above the Academy Building.
- **Male Dorms** — north, along the upper approach.
- **Female Dorms** — east flank of the core.
- **Main Barrier** — outer ward (outer boundary of the enclave).
- **Second Barrier** — inner ward (separates core from Town).
- **The Academy** — the enclave's overall name label, set across the central peninsula.
- **World Portals** — the portal landmass to the southwest, across the water.
- **Town** — the settlement south of the core.
- **Cafe Iri** — landmark at the southern tip of the Town.

Hooks to lock into canon. The **World Portals** + twin **barriers** strongly imply the Academy is a warded, semi-extraplanar site — fitting a ~2,632 AR / *A Crown of Glory* setting. Worth deciding: which kingdom (if any) the Academy answers to, who maintains the barriers, and whether Cafe Iri / the Town are student-facing or a civilian settlement.

How Everything Sits — Relative Positions

- **West:** Lyiezer (capital Vellin), on the Quather Sea.
- **North-central:** Tarmet (capital Bela) — the imperial seat — reaching up to Henem Bay.
- **Center / south-central:** Civer (capital Lorne).
- **Center-east:** Atriki (capital Elgan).
- **Northeast:** Ociyaran (capital Zada), on the Obery Sea.
- **Southeast peninsula:** Bertailia (capital Zemela), on the Obery Sea, with **Thult** off its far corner.
- **South-central, offshore: The Academy**, between Lyiezer and Civer's southern coast, fronting the Fetora Sea.

Canon Check — Flags

The Academy isn't on older maps. It appears here in Minara's Era but not on the Six Kingdoms / Civil War / Crandona maps. Decide when it was founded and whether it sits in any kingdom's territory or in neutral water like Thult.

Map spellings vs. canon. **Lyiezer** vs. *Lajazer* and **Bertailia** vs. *Berlailia* — pick one spelling per realm so maps and house pages agree.

Capitals not yet drawn as towns. This master map labels realms and their capitals (Bela, Vellin, Lorne, Elgan, Zada, Zemela) but not full settlement networks. Per-kingdom close-ups (like the Civil War galleries) can be added later to catalog every town.
