Locations

Conflicts

- ☐ **Coelum migrates north → south.** Solis's Era = "North-central / north of Gherci"; Minara's Era places Atriki (formerly Coelum) in the southern row bordering the Fetora Sea.
- ☐ **Mystic Isles / Thult relocate** SW of Aicruae → "South" → southeast by Vikitsv across the eras.
- ☐ **Lajazer is "westernmost"** but the capital-move story says Hailour moved it inland "toward the center" for defense.
- ☐ **Magic timing:** magic "introduced formally" under Goteivati III (~25–50 AR), yet Grand Sorcerer Sevtor uses battlefield magic at Valea in 7,217 BR (~7,000 yrs earlier).
- ☐ **Henem Bay placement** shifts with Coelum's position (north of Coelum vs. bordering Tarmet/Gherci).

Errors / cleanup

- ☐ **Eastern Aicruae population = 40,000** yet "largest unhoused/poor population" of a 120M nation — likely should be 40 million.
- ☐ **Population math doesn't sum** to the stated 120M total across regions + satellites.

- ☐ **"Fraction" used for "Faction"** throughout.
- ☐ **Duplicated blocks:** Minara's-Era provinces/capitals (twice), Aicruae wildlife/crops (twice), Cidet (3 overlapping entries), "Political Fractions" (twice).
- ☐ **Spelling:** "House Yuera" vs "House Yurea"; "loose canon" vs "loose cannon."

🟡 Not fully thought out

- ☐ **Knights missing** from the job-economy % breakdown (sums to 100% without them).
- ☐ **All Crandona's-Era capitals [TBD];** Aicruae Military + in-template Religion sections blank.
- ☐ **"48% of the world's eggs/berries/rice/peaches from the Aoner"** — very high, sanity-check.

? Questions

- ☐ **House Orana** (Sevtor's house) cross-referenced but not among the 13 houses or any faction — Aicruan? Vikitsv magic house?
- ☐ **Mount "Aicren"** (Vikitsv) shares a root with "Aicruae" — intentional?
- ☐ **Miuae = "third most valued" currency** — which two outrank it?

Timeline

🔴 Conflicts

- ☐ **The era gap (most important).** Solis ~7,250 BR, Crandona ~0–50 AR, Minara ~2,632 AR = a ~7,250-yr gap between Books 1 and 3 (~9,900 yrs across all four), yet the same noble houses are treated as continuous. Needs an in-world explanation or a date fix.
- ☐ **Saints predate their religion:** Saint Aliirusk dies 18,740 BR but the Circle of Eternal Light is "founded" 14,271 BR (self-flagged).
- ☐ **Magic Tower lineage** spans only ~2–3 generations for what should be centuries; unclear how it relates to Sevtor of House Orana.

● Errors

- ☐ **Broken placeholder links** in the Book 1 timeline; Books 1–4 timelines are empty templates.
- ☐ **Battle of Aishae (8,704 BR)** listed out of order among 8,100s entries.
- ☐ **Open inline notes:** "fix the queen name" (Massacre of Light), "clarify Yujari/Taverlo" (Little Hill).

● Not fully thought out

- ☐ **Era Overview table all blank** (Start/End for every era).
- ☐ **"Second moon raised; 13th month (Agarisono) established" [Date TBD]** — a second moon is a major cosmological event tied to princess "moon" honorifics; should be dated.
- ☐ **"Soli" (god) vs "Solis" (emperor)** naming collision — confirm readers won't conflate them.

? Questions

- ☐ **Reron is "the twelfth and final saint"** but only ~9 are named — are the rest defined?
- ☐ **Solisian Academy (Tarmet) vs Academy Island (near Civer/Atriki)** — same school or two?

👑 Historical Figures

● Conflicts / date & genealogy errors

- ☐ **Son born before the wedding:** King Ilaem Nefest Patton I dated 8,734 BR, but parents Benjaen & Vala marry 8,732 BR.
- ☐ **Impossible childbearing ages:** Queen Cawiloan (b. 8,730 BR) mothering Haliour II (b. 8,672) & Asayera (b. 8,674) = ~56–58 at birth.
- ☐ **Sayero Walica Patton has two date sets:** 8,608–8,533 BR vs 8,615–8,540 BR.
- ☐ **Karinoa death year:** 8,561 BR (header) vs 8,570 BR (Legacy).

- ☐ **Teravian age miscalc:** "died 8,577 BR at age 79" but $8,646 \rightarrow 8,577 = 69$; Appearance also describes a child.
- ☐ **Walica regency length:** "six years, took power at 24" vs dates 8,736–8,731 BR (5 years, age 23).

🟡 / ? Structural

- ☐ **"15–16 generations" Hailour I** → **Solis** can't be right: $\sim 1,540 \text{ yrs} \approx 50\text{--}60$ generations; family tree also has a $\sim 1,000\text{-yr}$ undocumented gap (8,459 BR → 7,408 BR).
- ☐ **Why is Solis the "rightful heir"?** He's the illegitimate son (of Lady Emillea Hige) while Orcus & Iris are Queen Mihai's legitimate children, yet they're called "usurpers."
- ☐ **~20-yr succession gap:** King Benjamin Lawrence Patton II dies 7,241 BR, but the succession war is 7,221–7,217 BR — who ruled between?

🤖 In Story Characters

🔴 Conflicts / ? Questions

- ☐ **War of Gods II** referenced ("child Vapaz killed during War of Gods II") but the Timeline only documents War of Gods I ($\sim 30,000$ BR) — add II or correct to I.
- ☐ **Minara's parentage unclear:** reads as Vandrea's biological daughter (ordered executed for being female; Vandrea sought a male heir) yet also "reincarnation of Soli & Apharia's daughter" — clarify blood vs. reincarnated soul.
- ☐ **Minara's magic = "Gnati division (uncontrolled/raw)"** — cross-check division name against Magic System.
- ☐ **Vandrea's "10,000 years of hatred"** is the only bridge across the era gap — confirm her timeline math matches the BR/AR dates.

🟡 Not fully thought out

- ☐ Only 3 characters have any content (Minara, Vandrea, Renedin), and even those have every structured field blank — all substance is in NOTES. Major

players (Soli/Leranoan, Apharia, the Emperor, Siadou Gonia) have no entries.

● Errors / cleanup

- ☐ Template artifacts in the body: stray `—`, `==`, `$$`, a `晴` character, empty `##` headings, lone `-` bullets.
- ☐ Three duplicate empty "[MAIN CHARACTER NAME]" templates trail the page.

✨ Magic System

● Conflicts

- ☐ **What % of people have magic? (headline).** Three Stages says magic users = "80% of the population, ~344M." Paosu section says magic has "~40% inheritance chance," most people are non-magical, and Paosu are "the silent majority." 80% vs minority — pick one canonical number.
- ☐ **"40% inheritance" used two ways:** Takar proved ~40% chance of inheriting a parent's magical *level*; Paosu section reuses it as the odds of having *any* magic at all. Separate the two claims.
- ☐ **Verna's dates:** "existed more than twenty thousand years ago" vs "founded Vikitsv in 7,945 BR" (~10,500 yrs before Minara). Conflict with Timeline.
- ☐ **Sevtor's lineage:** here = descendant of Verna's eldest son "Liaerto I"; Timeline = Ulian → Kiear & Liaerto III, current Grand Sorcerer is Kiear's child. Reconcile.
- ☐ **Utayer overlaps its sub-divisions:** defined as fire/water/earth/air, yet Daseri (Fire), Haliver (Water), Kari (wind) are separate divisions (self-flagged twice on the page).

● Resolves earlier questions

- ☐ **House Orana explained** — it's the Vikitsv pure-blood magic line descended from Verna (the Magic Tower family), not an Aicruae house. Surviving member Mekean → Equateiy → leads to Merigen Bleelack. (Closes the Locations "House Orana" question.)

☐ **Nellebrie confirmed a goddess** (disaster/renewal) — but tied to Mount Aicren here, not Rewqo; Rewqo association still needs a look.

☐ **Magic-timing flag softens:** magic was *integrated via intermarriage* under Goteivati III, not "introduced." Reword the Locations note rather than treat as a timeline break.

● Not fully thought out

☐ All 10 division pages are near-empty templates (HOW IT WORKS, LEVELS OF MASTERY, % of Users blank), despite the intro giving Makito 60% / Rusti 40%.

☐ Template artifacts throughout: stray `$$`, `—`, `□`, `LL`, `—`, `D SII SIII`, an `\xlongequal` symbol, an orphaned code block in the "[MAGIC DIVISION NAME]" template.

☐ Demon ranking stated twice ("OFFICIAL RANKING" then "DEMON CLASSIFICATION SYSTEM") — consolidate.

☐ "Verna's 27 sons married their 15 sisters" — lopsided numbers + full-sibling incest stated matter-of-factly; may want context.

? Questions

☐ **"People of the Mountain" / "People of the Sky"** (ancestral magic peoples whose mix produces Gnati) referenced but undefined here — covered in Key Words/Religion?

☐ **Minara "communicating with demons"** via Gnati — established in the outlines or new here?

☐ **Harnua Kulio's execution** ([Date TBD] in Timeline) can likely be set to ~7,214 BR (when she poisoned Esterica).

💬 Quote Bank

● Conflicts / structural reveals to reconcile

☐ **Vandrea & Apharia are sisters** (Book 2: Enyokia, Vandrea, Apharia Asleleri). The Book 4 villain and Soli's dead wife (whose child Minara reincarnates) are

siblings — not stated on In Story Characters or Timeline. Is Vandrea's revenge rooted in Apharia's murder? Make it explicit.

☐ **Apharia "mortal" vs Vandrea "10,000-yr lifespan" as sisters** — needs explanation (different fathers? transformed? partly divine?).

☐ **Renedin's monologue rewrites the cosmology** — Soli = Paxtino (god of rebirth, manifestation of Noirta, creator of world portals); twin half Ekhasostio; Renedin fathered Soli via the grieving "lesser god" (Zopha); Renedin corrupted Vandrea; gods die permanently (no reincarnation). None of this is on the Timeline's War of Gods entry; reflect it in Religion/Timeline, and reconcile "gods vanish" with the Pertari Stairs afterlife.

☐ **War of Gods I vs II** again — Vapaz kills Soli's wife & child here (undated); In Story says "War of Gods II," Timeline only has I.

● Errors / cleanup

☐ **Symbol legend broken/unused:** key lists $\star$, two different $-$ entries, $\circ$; quotes use a different inconsistent set ($[\langle/\bullet]$, $[\leftrightarrow/\bullet]$, $[\downarrow/\circ]$, $[\bullet/\circ]$, $[\circ]$) rendered as raw LaTeX. Pick one consistent legend.

☐ **Typos inside quotable lines:** "manifastion," "you're silly childish" (→ your), "favorbly him not of me," "stop be delusional," "I'I know."

☐ Trailing $\backslash xlongequal$ artifact at the bottom.

● Not fully thought out

☐ Books 2 & 3 have no quotes (just "(Continue format)" placeholders).

☐ All thematic buckets empty (Revenge, Family, Power, Faith, Love, Cycles); Promotional Picks, Tagline Candidates, Prose Moments, "Quotes to Write" all blank.

☐ Most Book 1/4 quotes still have [TBD] chapters/speakers.

? Questions

☐ **Prophecy:** "When the Eclipsing Sun and the False Star meet, the old god shall shatter the world." Eclipsing Sun = Minara, old god = Renedin — who is the **False Star**?

- ☐ **Esterica's "fate like that of the previous queen"** — who is the previous queen, and what happened to her?

Key Words and Terms

 This page is the Canon's "answer key" — it resolves several earlier flags (see below). It's also the most duplication-heavy page.

Resolves earlier flags

- ☐ **Era gap bridged:** Vandrea & sisters (Asleleri) are daughters of City Lord Ceval Asleleri of Torad, who dies in Solis's conquest of Vikistv (~7,217 BR). Book 2 = Solis's era; Vandrea persists to Minara's era (~2,632 AR) ≈ 9,850 yrs ≈ "10,000 years of hatred." Math works.
- ☐ **People of Sky/Mountain defined** (Fall of the Lesser Gods, ~28,490 BR) — closes Magic System question.
- ☐ **War of Gods II is canonical** here — so the Timeline is what's missing it (not an error in In Story Characters).
- ☐ **Harnua's execution = 7,214 BR** — fills the Timeline [Date TBD].
- ☐ **20-yr succession gap explained:** Benjamin II names Solis heir, dies ~7,241 BR → twins' coup → Solis ~20 yrs in exile as "Janrano/Jonathan Kiva" → returns for civil war 7,221–7,217 BR.
- ☐ **Yujari/Taverlo** (Timeline open note) fully explained in Little Hill/Bears entry.
- ☐ **Soli's parentage:** child of goddess Zopha (Vapaz's sister → why Vapaz spared him), secretly fathered by Renedin (per Quote Bank).

New conflicts

- ☐ **Twelve vs Thirteen Saints (systemic):** here Harnua = "13th & final Saint" (months table lists 13); Timeline says Reron = "12th & final"; Code Names cite "Twelve Saints." Likely fix: 12 honored + Harnua as disgraced 13th — make explicit and fix Timeline.

- ☐ **"Twelve gods" but only 11 named:** 7 New Gods (weekdays) + 4 Old Gods (Renedin, Mikani, Poaranji, Haxenylan) = 11. Who is the 12th?
- ☐ **Nerai contradiction:** an elixir "Queen Mihai is noted as drinking" vs a deadly neurotoxin (Joyless Death, "kills almost instantly"). Two things sharing a name, or an error?
- ☐ **Sevtor's lineage conflict deepens:** Magic Tower entry repeats Ulian → Kiear & Liaerto III; Magic System says Sevtor descends from Verna's eldest son "Liaerto I."
- ☐ **Two near-identical king names:** King Benjaen Nefest Patton (~8,700s BR) vs King Benjamin Lawrence Patton II (~7,241 BR) — different people ~3,500 yrs apart.

● Errors / cleanup

- ☐ **Heavy duplication:** Pataoiut (×2 + restated in "BR"), Matsiali (×2), Sun-Forged (×2), Ilkai (×3), Rern (×2), Warriors' Age (×2), Weekdays (×2), Battle of Little Hill/Bears (×2), Pekna(s) (×2), Code of Esa (×2), Nerai (×2).
- ☐ **Eternal Signs section broken:** "Thirteen Eternal Signs" followed by lone "1" + empty dividers; references signs (Baerin, Garisono) not listed.
- ☐ **Typos:** "Pireayena," "Grand Sorceer," "COQARDICE, STUPIDY/IGNORGANCE," "Posion," sentence cut off at "toward he," missing close-parens on Festival of the Moon dates.

● Not fully thought out / structural

- ☐ **Catch-all dumping ground:** full cuisine menus, dance steps, Liazen genealogy + Isalian's jewelry collections live here — most belongs on Material Culture / Fashion / Noble Houses. Consider migrating.
- ☐ Subpage **"Emperor Goteivati's Ten Rules"** hangs off the bottom — not yet audited.

? Questions

- ☐ Who is the **12th god**?

- ☐ Why did Harnua raise the second moon **"in Orcus's honor"**? (Fits if she was an Orcus loyalist — confirm intentional.)
- ☐ **"False Star"** (prophecy) still undefined.

Religion

 The cosmology bible — closes a stack of earlier flags (below), with a few new dating conflicts.

Resolves earlier flags

- ☐ **"12th god" found:** Zyrzithia lists the Pantheon of Twelve = the New Gods (Vapaz, Zopha, Razar, Allan, Sielaph, Nellebrie, Paha, Nimlye, Iswan, Finore, Paxtino, Ekhasostio). Weekdays honor only 7 of 12.
- ☐ **Saint count settled: 13, Harnua final.** So the Timeline's "Reron = 12th & final" is the error to fix.
- ☐ **Second moon dated:** Harnua raised it 7,214 BR "in Orcus's honor" (she loved him) — closes Timeline [Date TBD] + "why Orcus."
- ☐ **Minara's parentage resolved:** biologically the Emperor's firstborn (Macenja ordered her killed for being female); spiritually the reincarnation of Soli & Apharia's daughter; raised by Siadou Gonia (= reincarnation of Enyokia). "Macenja" IS Vandrea (identity theft via Renedin's shapeshifting; alive 10,000 yrs as a corrupted soul, not a reincarnation). Closes In Story Characters + Quote Bank flags.
- ☐ **Three sisters' arc closes:** Enyokia (→ Siadou), Vandrea (→ Macenja), Apharia (→ dead) reunite in the great emptiness.
- ☐ **War of Gods II is canon** (Soli+Apharia union triggers it) — Timeline must add it.

New conflicts

- ☐ **Twin gods' fatherhood contradicts Quote Bank:** here Paxtino/Ekhasostio are stated as fact to be fatherless (born of Zopha's tears); Renedin's monologue reveals he secretly fathered them. Likely intentional twist — frame the fatherless origin as "the myth mortals believe" (like Allan's concealed parentage), not fact.
- ☐ **Gherci founded before its founder's birth:** Saint Duri "incorporated lands into Gherci in 8,763 BR" but was born 8,747 BR (d. 8,670, age 77).
- ☐ **Pireaynea religion conflict:** listed here as a Circle of Eternal Light country; Key Words/Locations say it's monotheistic (Allan only).
- ☐ **Brotherhood founding math:** "~6,000 years after the gods of old's defeat," but War of Gods I ~30,000 BR → founded 9,360 BR = ~20,000-yr gap.
- ☐ **War of Gods II dating circular:** Twin Gods entry calls ~7,200–7,100 BR "the post-WoG II era," yet that's when Soli meets Apharia — the union that triggers WoG II.
- ☐ **Massacre of Light leader:** Religion says King Viake; Timeline note says "fix the queen name." Reconcile.

● Errors / cleanup

- ☐ **Harnua has two full saint entries** with different epithets ("The Infamous Thirteenth Saint" vs "The Great Tragedy").
- ☐ **Matsiali & Pataoiut duplicated** here (also full entries on Key Words) + a broken footnote artifact at page bottom.
- ☐ **Most god profiles: rich myth prose but blank structured fields** (Classification/Origin/Family/Worship/Powers/Status empty for nearly all gods).
- ☐ **Encoding/template artifacts:** "加酏," "—," "—," "*ex* □," overlined "概," "KaTeX parse error: Expected group after '_' at position 1: ____," broken raw <https://app.notion.com> image embeds.
- ☐ **Spelling:** "Veketa" vs "Vekta"; "Rilic" vs "Rillic"; "twelve primeval Saints" line inside the "Thirteen Saints" section.

? Questions

- ☐ Original moon is "named after Solis" but predates him — did he rename/claim it?
- ☐ Harnua's "forced into solitude, see Orcus twice a year" [TBD] — formal sainthood restriction or political?

A Tale of a Thousand Songs (Book Info)

 Richest, most polished page (character bible + Timeline insert + chapter bible). Loaded ~59% — Ch. 4–70 chapter bible not fully reviewed.

Resolves earlier flags

- ☐ **Nerai contradiction solved:** Nerai = the "Joyless Death" poison; Queen Mihai self-medicates/slowly poisons herself with it. Reword the Key Words "elixir" entry to make clear it's self-destruction, not a casual drink.
- ☐ **Why Sevtor attacked Valea:** his son Cequailian Orana was betrothed to Iris — he attacked to avenge her. Closes the Locations/Magic thread.
- ☐ **20-yr exile / succession gap reconfirmed** (coup 7,241 BR → Solis returns ~7,221 BR).
- ☐ **Era 8 Timeline block already drafted here**, marked "to be placed after the last era in the Timeline doc" — exactly the Book 1 content the Timeline is missing. Migrate it.

New conflicts (date slips)

- ☐ **Esterica: "met Solis at age 7" vs "sent away at age 6"** — the meeting that supposedly caused her exile is dated after the exile.
- ☐ **Coyre's birth year:** 7,214 BR (Solis/Esterica profiles) vs 7,215 BR (Coyre's own profile).
- ☐ **Snieoa born 7,209 BR but Tixsei married Solis ~7,210** (~4 yrs after Esterica's 7,214 death) — child predates marriage.

☐ **Harnua epithet still inconsistent:** "The Great Tragedy" here vs "The Infamous Thirteenth Saint" on Religion. Standardize.

● Not fully thought out

☐ Pervasive [To be filled]/[TBD] fields across every character profile (Solis, Esterica, Orcus, Iris, Mihel, Harnua).

☐ Page does three jobs (character bible + Timeline insert + chapter bible); chapter bible only covers Ch. 1–3 in depth. Consider splitting.

● Errors / cleanup

☐ Broken raw <https://app.notion.com> image embeds throughout (same as Religion).

☐ Profile data trapped in `plain text` code blocks; stray "py" artifact atop Solis's profile — renders as code, not readable bios.

? Questions

☐ Orcus narrates Ch. 1 retrospectively "already knowing the ending" but dies at book's end — is the posthumous/retrospective first-person framing intentional for the dying narrators?

☐ "Jonathan Kiva" vs "Janrano Kiva" (recurring) — which is canon?

☐ Founding dream: "two panthers" (Key Words) vs "two panthers fighting on a cliff, bleeding gold" (here) — confirm fuller version.

A Tale of Three Sisters

● The keystone that bridges the era gap. Confirms the big reveals; carries several naming/date conflicts (many self-flagged [CONFIRM]).

● Resolves / confirms earlier flags

☐ **Era-gap bridge fully fleshed out:** the three Asleleri sisters, Vikistv's fall (~7,214 BR), Vandrea's Renedin deal & 10,000-yr path, Macenja = Vandrea

(identity theft), Minara = reincarnation of Apharia & Soli's daughter.

☐ **War of Gods II dating clarified:** triggered by Apharia's pregnancy (~7,211 BR), spans ~7,200–7,100 BR — so Religion's "post-WoG II era" wording is what to fix.

☐ **"The Great Temptress" origin confirmed** — a name the gods gave Apharia posthumously. Closes the Key Words thread.

● New conflicts

☐ **Third wife has two names:** Madame Saiye (profiles) vs Madame Aimyeida (timeline backstory). Same person.

☐ **Soli's nature: one soul or two?** Here "two gods with different souls sharing one body"; Quote Bank says "two twin gods with one soul."

☐ **Immortality deal ~100-yr hole:** Apharia buried ~7,208 BR but the Renedin deal is dated ~7,100 BR — Vandrea unaccounted for as a mortal across ~100 yrs. (Self-flagged.)

☐ **When did saints end?** This page: gods stop making saints ~7,163 BR; but Harnua (13th & final saint) died 7,214 BR. ~51-yr gap.

● Errors / self-flagged [CONFIRM]s

☐ **Ceval's execution: beheaded or burned?** Canon says beheaded; Equateiy townsman says burned. (Self-flagged.)

☐ **Mother's name/origin:** "Isenaylini" vs "Tenami"; "Equateiy commoner" vs "House Leum of Vikistv." (Self-flagged.)

☐ **Sisters' ages vs mother's death too tight:** Isenaylini dies when Vandrea ~3, yet Apharia (3 yrs younger, different wife) must be born around then — no room for remarriage + pregnancy.

☐ **Encoding artifacts** (—, —, stray quotes/dashes,) and broken raw <https://app.notion.com> image embeds.

● Not fully thought out

☐ Most structured fields blank across every profile (Royin Yailk nearly empty); substance only in NOTES.

- ☐ House Yailk & House Leum (Vikistv houses) introduced but absent from Noble Houses (Aicruae-only). Vikistv houses need a home.
- ☐ Subpage "A Tale of Three Sisters Characters" not yet audited.

? Questions

- ☐ Is the "faint voice" telling Vandrea to choke the townsman Renedin reaching out early, or her own darkness? (Changes when his corruption begins.)
- ☐ Apharia's daughter is still unnamed — does Minara's predecessor get a name?

A Princess in Love (Book Info)

-  Book 3 (~1 BR–14 AR). Explains the calendar reset and the pivot into the Dark Ages. Cleaner than the other book bibles.

Resolves earlier flags

- ☐ **0 AR calendar reset explained:** Goteivati III born in exile at 0 AR resets the calendar ("Reconstruction" epoch). Cross-check epoch name vs Era's Reference.
- ☐ **Why Goteivati III is "The Damned":** carries the merged corrupted soul of Reio (Sueli's dark-magic child) → becomes the tyrant who destroys Matsiali & ushers the Dark Ages. Resolves the Key Words "Matsiali abolished 36 AR" cause.
- ☐ **Demon problem origin:** Vandrea ("the Wise Woman") corrupts the Mystic Isles world doors with Merigen's residual magic → gods trapped, 2,600+ yrs of incursions → into Crown of Glory.
- ☐ **House Orana → Bleelack lineage closes:** Merigen Bleelack confirmed a descendant of Verna (Magic Tower line) via Mekean Orana → Equateiy.
- ☐ **People of Sky + Mountain resolved:** Goteivati III combines sky people (Esterica's line via Crandona) + mountain people (Merigen).
- ☐ **Eveli = a FALSE "fourteenth saint"** (her father's fraud, not a real saint) — reinforces the 13-saints/Harnua-final canon.

● New conflicts

☐ **Merigen's reign length:** text says he "rules for six years," but Crandona overthrows him at ~14 AR — ~15 yrs after the ~1 BR coup. Reio (6 at the 14 AR siege → born ~8 AR) fits a 15-yr reign, not six. Fix the "six years."

● Not fully thought out

☐ **New setting unanchored:** the Caprlolan Kingdom (exile + entire rebellion) and Theolissea (Merigen's hometown) aren't on Locations (only the six kingdoms are).

☐ **New houses need a home:** House Connorrita, House Schmidtavaca, the Pontia clan — absent from Noble Houses.

☐ Subpage "A Princess in Love book characters" not yet audited.

● Errors / cleanup

☐ Profile template differs from Books 1–2 and uses two misspelled labels — "Kyprotonite" (kryptonite) and "Zodaic sign" (zodiac); most fields blank.

? Questions

☐ Is "94th royal princess" a literal dynastic count?

☐ 0 AR epoch is "Reconstruction" here — does that match Era's Reference ("Crandona's Era")?

A Crown of Glory (Book Info)

● The finale (~2632–2652 AR). Closes nearly every open thread; even contains author notes fixing earlier inconsistencies. Loaded ~94% (tail of Nightmare Realm cut off).

● Resolves earlier flags

☐ **Minara's parentage finally clean:** bio daughter of Emperor Veo + Macenja (=Vandrea), ordered killed at birth, rescued by Siadou (=Enyokia reincarnation),

AND reincarnation of Soli & Apharia's daughter. Untangles the In Story "blood vs soul" confusion.

☐ **Soli vs Solis explicitly disambiguated** by an in-text author note — closes the Timeline naming-collision flag.

☐ **Code names = Saint names confirmed** (Bura, Argellon, Malign, Aliirusk, Nairan, Dorthargel, Reron, Galamma).

☐ **Two moons confirmed w/ cycles:** Solis (29.53) and Orcus (35) — Orcus's spins faster, per Harnua's myth.

☐ **Renedin = master-villain & Soli's secret father** (provoked WoG I, co-created twins via Zopha, had Vapaz kill Apharia, corrupted Vandrea). Supports the Religion fix: "fatherless twins" = public myth, Renedin = hidden truth.

☐ **Eternal Signs defined here** (Darzi, Inari, Baerin, Adeta, Laca, Adeto... tied to the 13 months) — backfill the Key Words "Thirteen Eternal Signs" section.

☐ **Minara talks to demons (Gnati)** established on-page — closes the Magic System question.

New conflicts

☐ **Minara & Isaeri share identical birthday AND zodiac** — both "Dar 27th, 2632 AR," both "Darzi." Likely copy-paste slip.

☐ **"Lajazer" is both a kingdom and a city:** listed as one of the 6 countries (Kingdom Hierarchy) but also "capital of the Kingdom of Vellin" (Dahnyliein). Pick one.

☐ **Imperial capital has two names:** "Bela, Inner City (Imperial Palace)" vs "the capital Elgan." Clarify the seat.

☐ **"Firstborn" muddy:** Minara is "the actual firstborn," but the Empress's first child was Cevio (son of Sir Joro Noaner, died ~6½ yrs earlier). Specify firstborn overall vs Emperor's firstborn vs firstborn daughter.

☐ **"False Star" STILL undefined** — even the prophecy chapter only explains "Eclipsing Sun" (Minara). Survives all four books.

Errors / cleanup

- ☐ **Karniode's surname:** "Vesme" (Full Name) vs "Vesmen" (everywhere else).
- ☐ **"Kryptonite" (correct here) vs "Kyptronite" (Book 3)** — confirms Book 3's label is a typo.
- ☐ **Self-flagged:** main CANON student list calls Silaena "Tilaena Chairameron" — fix to Silaena.
- ☐ Encoding artifacts (一, 晴的, stray 施/D/4/1) and broken raw <https://app.notion.com> embeds.

● Not fully thought out

- ☐ Pervasive [TBD] fields (magic Levels, many traits, all Character Inspiration lines).
- ☐ Solisian Academy's location still unpinned (Timeline's "Tarmet vs Academy Island" question unanswered).

Era's Reference

A single continuous era spine, 8,900 BR → 2,632 AR. The cross-reference several earlier flags pointed to.

● Resolves earlier flags

- ☐ **The "era gap" is officially bridged here:** gap-free spine. The ~7,000-yr stretch between Solis (Bk1) and Crandona (Bk3) is filled by The Early Empire (7,163 BR~4,000 BR), Golden Millennia (~4,000~500 BR), Late Golden Period (~500 BR~0 AR). Fix = populate the Timeline's blank "Era Overview" table from this page.
- ☐ **0 AR calendar reset confirmed** = start of the Dark Ages (and Goteivati III's birth), consistent with A Princess in Love.

● Conflicts

- ☐ **Epoch name clashes with Book 3:** A Princess in Love calls the post-reset (0 AR) epoch "Reconstruction," but this page labels 0~50 AR the "Dark Ages," with

"The Restoration" only beginning ~50 AR. Reconcile (Book 3's "Reconstruction" may = "The Restoration," which doesn't start at 0 AR).

☐ **Two parallel era-naming systems:** book placements use "Solis's Era / Crandona's Era / Minara's Era," but this page uses period names (Warriors' Age, Classical Kingdoms, ... Late Modern Period). Map them together or unify.

● Not fully thought out

☐ **No era covers the present:** the spine ends at 2,632 AR — exactly when Crown of Glory begins — so the final book's events (~2,632–2,652 AR) fall into an unnamed era.

☐ **Era boundaries pinned to one man's life:** Civil War Period starts 7,250 BR (Solis's birth) and "Empire Founded" = 7,163 BR (the year Solis dies). Confirm those exact coincidences are intentional.

☐ Page is only a timeline bar — no era has any description of what defines it.

● Errors

☐ Title misspelled: "ERA'S REFERENCE" → "Era's Reference."

Aicruae Funeral Traditions

● A well-structured, self-aware draft (tags its own [INFERRED]/[TBD]/[RESOLVED]). Covers only Aicruae funerals. Closes one long-running thread.

● Resolves / cross-confirms

☐ **Resolves the Iris/Orcus burial mystery:** explains why Solis entombed them beneath a temple of Nellebrie (Goddess of Disasters) at Rewqo — framing the civil war as the "disaster." Cross-confirms the Nellebrie ↔ Rewqo association the Magic System page left open.

☐ **Self-resolves the "no death god" question:** funerals are polytheistic (Razar receives the soul, Nellebrie marks the loss); no underworld deity.

☐ **Adds a pantheon relationship:** Paha = Goddess of Horses and Nellebrie's mother — add to Religion's blank god family fields.

☐ **Cross-confirms second moon "Orcus" = Prince Orcus** (the brother Saint Harnua loved & honored with the moon).

● Conflicts

☐ **Patriarchy anachronistic for its own examples:** the male-only Eye Bind is justified by Aicruae being patriarchal ("men hold public authority"), but the only canonical example funerals (Iris & Orcus, 7,218 BR) predate the patriarchal Pataoiut system Goteivati III imposed ~36 AR (replacing Matsiali). Reconcile a patriarchal rite applied to a pre-Pataoiut funeral.

● Not fully thought out

☐ By the author's own tagging, a large fraction is [INFERRED]/[TBD] (female mourners' parallel rite, red-mark patterns, ash disposition, pyre site/lighter, procession route, mourning duration, tomb construction). Deliberate WIP.

☐ Not yet integrated into the Aicruae/Locations "Culture > Funeral Customs" section (per the page's own footer).

● Errors / cleanup

☐ New ritual vocabulary (Iksyre, Broep, Geina, Eye Bind) isn't on Key Words or Language — add for consistency.

☐ The page's own "rain of the dead" detail is self-flagged as possibly invented — confirm or cut.

Material Culture

A long research essay on "pre-kingdom/warrior age" material culture across six cultural zones. Its real value: it reveals the real-world template behind each kingdom.

● Useful — the kingdom ↔ real-world key

☐ Equateiy → Italic peninsula (Terramare/Villanovan/Etruscan); Gherci → Anatolian highlands + Ethiopian plateau (Hatti/Kaska/Phrygian + D'mt); Aicruae → Celtic Gaul (Hallstatt/La Tène); Coelum → Atlantic Scotland + Norse Iceland (brochs/Picts + Landnám); Vikistv → Korean confederacies + Tibetan highland (Mumun/Gaya + Zhang Zhung); Pireaynea → tribal southern Italy + Sicily (Samnites/Daunians + Sicels).

● The big one: research scaffolding, not in-world canon

☐ The entire body is real Earth history — Rome, Caesar, Diodorus, Cornwall, Norway, Odin, Freyja, Valhalla, the Althing, UNESCO, DNA studies, a "2025 discovery near Thetford." Zero in-world content (no Aicruan/Gherci names, houses, gods, or events). As a canon "Material Culture" page it describes our world, not the saga's. Needs either a clear "inspiration/reference" label or a translation pass into in-world specifics with real-world names swapped for World-Without-God equivalents.

● Not fully thought out

☐ Era coverage is "pre-kingdom" only — no material culture for the Empire era or Minara's era. The "pre-kingdom" framing also sits awkwardly against founding dates (Equateiy 8,900 BR, Aicruae 8,759 BR) that fall inside the Warriors' Age (8,900–7,945 BR).

☐ Aesthetic clash with the Funeral page: Aicruae = Celtic (real-world body paint = woad blue), but Aicruae Funeral Traditions centers on red mourning paint. Pick the canonical Aicruan body-paint color.

● Errors / cleanup

☐ Working-style title with a stray space ("pre-kingdom/ warrior age"); reads as a draft heading, not a canon page name.

Name Evolution Across Eras

High-value cross-reference: maps every territory & sea across the three eras. Resolves a cluster of location flags from the book audits.

Resolves earlier flags

☐ **Minara-era kingdom map complete & mostly matches Crown of Glory:**

Gherci → Tarmet (cap Bela, imperial capital), Pireaynea → Civer (cap Lorne), Coelum → Atriki (cap Elgan), Equateiy → Ociyaran (cap Zada), Vikitsv → Berlailia (cap Zemela). Ranks & capitals line up with Crown of Glory.

☐ **"Caprlolan Kingdom" (Book 3) resolved** = Caporiolan Kingdom = Gherci's Crandona-era name. So Crandona's rebellion is set in Gherci.

☐ **"Theolisseia" (Book 3, Merigen's hometown) resolved** = Vikitsv's Crandona-era name — fits Merigen being a descendant of Verna (Vikistv Magic Tower line).

☐ **Bela vs Elgan capital confusion resolved:** Bela = imperial capital (Tarmet/Gherci); Elgan = Atriki's regional capital. Different seats.

☐ **Mystic Isles / Thult confirmed** as the god–mortal world-door link, "now barren & desertified" by Minara's era — consistent with Vandrea corrupting the world doors (Bk3 → 4).

☐ **Partial era-naming reconciliation:** three macro eras (Six Kingdoms / Crandona's / Minara's) can sit above Era's Reference's finer period names.

Conflicts

☐ **Lajazer & Vellin swapped between pages:** here Aicruae → Kingdom of Lajazer (cap Vellin); Crown of Glory says "Lajazer, capital of the Kingdom of Vellin." Names exactly reversed — pick one.

☐ **Coelum/Atriki north vs south (reconfirmed):** this page calls Coelum/Atriki an "impoverished northern wasteland," but Locations places Minara-era Atriki in the southern row on the Fetora Sea (this page's own sea section calls Fetora the southern coastline).

☐ **Spelling:** "Caporiolan" (here) vs "Caprlolan" (A Princess in Love).

Not fully thought out

☐ **~7,000-yr imperial middle skipped:** table jumps from Six Kingdoms Era (ends 7,163 BR) straight to Crandona's Era (~1 AR), implying kingdoms kept original names ~7,000 yrs and were only reorganized into Grand Duchies at Crandona's era.

☐ Henem Bay's Crandona-era name = [TBD].

? Questions

☐ Why is the imperial seat in Gherci/Tarmet (Bela), not the Pattons' ancestral Aicruae? Dynasty rules from outside its homeland.

☐ Theolisseia scale: kingdom (Vikitsv) here vs "hometown" in Book 3 — confirm Merigen's home is the kingdom or its capital Hadirel.

Fashion Collections

Hub of 8 visual reference boards (six kingdoms + Saints' attire + Liazen jewelry). Image-only mood boards — no text, so findings are naming/structural.

● Coverage

☐ All six kingdoms have a board (Coelum, Equateiy, Vikistv, Pireaynea, Gherci, Aicruae) + Saints' Attire (Cidet) + Liazen Jewelry (Queen Isalian, House Liazen). Good completeness.

● Errors / cleanup

☐ Three kingdom names misspelled in subpage titles: "Coleum" → Coelum, "Equatiety" → Equateiy, "Pireayana" → Pireaynea. Each also differs from misspellings used elsewhere — standardize spellings Canon-wide.

☐ "Jewlery" typo in the Liazen page body.

● Not fully thought out

- ☐ Pure image boards, no text — none label who wears what, for which class/occasion/era. A short caption block per board (silhouette, materials, wearer) would make them usable as canon.
- ☐ No link to the Material Culture analogs (Aicruae=Celtic, Gherci=Anatolian/Ethiopian, etc.) — wordless boards can't be confirmed to match the templates; cross-check so boards & analog essay agree.
- ☐ Liazen featured but defunct: House Liazen is noted elsewhere as absorbed/extinct, yet gets its own jewelry collection while several living houses don't — confirm intentional spotlight.

Noble House Crests

-  Master crest registry — ~115 house crests. The most complete house list in the Canon; closes several "new house needs a home" flags.

Resolves earlier flags

- ☐ All 13 Aicruae great houses present (Patton, Vika, Vemer, Kulio, Najil, Hige, Arvento, Mena, Caraen, Aedria, Leva, Dajanyi, Yurea).
- ☐ Book 3 Caprlolan houses have crests here: Connorrita, Schmidtavaca, Pontia — partly resolves "new houses aren't anywhere" (they're in the registry, not on Noble Houses).
- ☐ Vikistv houses present: Orana (Sevtor/Magic Tower line), Yailk, Leum — closes "Vikistv houses need a home."
- ☐ House Vesmen spelled with -n here — supports "Vesmen" canonical; Crown of Glory's "Vesme" is the typo.
- ☐ House Catern (Dahnyliein) present; Liazen & Baliva present as historical (absorbed/destroyed) houses.

Conflict

☐ "House Chairamero" (crest) vs "Silaena Chairameron" (Crown of Glory) — pick one spelling.

● Not fully thought out

☐ Flat registry, zero metadata: ~115 houses with no kingdom / faction / status / era. Aicruae's 13 sit alongside Vikistv houses, Book-3 houses, and ~90 undocumented minors. Add a one-line caption per crest (kingdom + status).

☐ Only 13 of ~115 are documented (Noble Houses page is Aicruae-13 only); the other ~100 have a crest but no profile anywhere.

☐ A few book houses still missing crests: Bleelack (Merigen), Noaner (Sir Joro/Cevio), Mekean (Orana → Equateiy bridge).

● Errors / cleanup

☐ Label vs image-file mismatches: "Lorafonmenti" (file Lorafonmen), "Schmidtavaca" (file Schmidtava).

☐ Trailing space in "House Liazen " label.

Noble Houses

● Deep house archive: ~61 profile pages + a master "across the Eras" roster + 3 era subpages. Upgrades the Crests note — ~61 houses documented across all six kingdoms (not just Aicruae 13). Sampled Patton, Orana, Catern, Vesmen, Pontia, Schmidtavaca, Liazen, Baliva.

● Resolves / upgrades earlier flags

☐ "13 great houses" framing far too narrow. Cross-era roster sorts by kingdom + faction: Aicruae 26 (Divine/Neutral/Common), Gherci 7 (Royalists/Populists/Reformers/Believers), Vikistv 9 (Nationalist/Traditionalist), Equateiy 15 (First/Second Movement), Coelum 3 (Land/Moon/Sea), Pireaynea 1.

☐ House Orana fully resolved: Vikistv magic line (Verna → Liaerto I), destroyed by Solis post-Valea, Mekean → Equateiy → Merigen Bleelack.

☐ Book-3 houses have full profiles: Pontia (Amuseri), Schmidtavaca (Wioli & folk song), Malrancis (Danik's forest group).

☐ House Patton is the richest page in the Canon (full dynasty, heraldry, coronation rites, two-panther dream matching the crest, Maen/Coyre profiles).

Conflicts

☐ Lajazer/Vellin tangle now has THREE versions: Patton seat = "Lajazer, Capital City of Aicruae"; Name Evolution = "Kingdom of Lajazer, cap Vellin"; Crown of Glory = "Lajazer, capital of Kingdom of Vellin." Needs one canonical ruling.

☐ Patton genealogy reconfirms Historical Figures date errors: Queen Cawiloan (b. 8,730 BR) bears Haliour II (8,672) & Asayera (8,674) = childbearing at 56–58.

☐ Extreme name recycling: two Kings Ilaem Nefest Patton (I & II), two Benjamin Lawrence Patton (I & II), plus Benjaen Nefest; Benjaen (~8,754 BR) vs Benjamin II (~7,241 BR) ~3,500 yrs apart.

Not fully thought out

☐ Wildly uneven completion: Patton & Orana book-quality; Catern/Vesmen/Pontia/Schmidtavaca skeletons (most fields [TBD]); Liazen & Baliva pure [TBD] stubs.

☐ Lopsided coverage: Equateiy 15 & Aicruae 26 houses, but Pireaynea just 1 (House Tazem, faction "Unsorted") and Coelum only 3.

☐ Roster's own "Era Overview" & "Map Image" sections are empty headers. (CORRECTION: the 3 era-specific subpages ARE populated — see resolutions below.)

☐  The 4-part era roster is COMPLETE: pre-Conquest ~61 + post-Conquest 18 + Crandona 21 + Minara 15 ≈ 115 houses — matching the ~115 crests. So the Crests registry = the union of all era rosters; the earlier "~100 crested but no profile" gap is really "rostered by name + era, just no full profile page."

☐  House Connorrita IS placed (post-Conquest roster) — softens the long-running "Connorrita homeless" flag (rostered, just no profile page).

☐  House Chairameron on the post-Conquest roster, spelled -on (matches Crown of Glory) — confirms the Crests "Chairamero" is the typo. House Benen

present too (matches the Gesdic Benen conquest story); House Loraonmenti (Minara) matches the crest label.

☐  Era rosters are name-only — no faction / kingdom / seat / profile; later-era houses are bare stubs.

? Question

☐ Anachronistic faction names? Roster is "before Solis's Conquest" (Warriors' Age ~8,900–7,217 BR) yet Equateiy houses are "First/Second Movement Party" and Vikistv "Nationalist Party" — modern party language. Orana's seat "Berlailia" is Name Evolution's Minara-era name. Era labels bleeding across?

Errors / cleanup

☐ Encoding artifacts on Patton page (stray Hebrew "כה", a KaTeX parse error: Expected group after '_' at position 1: ____ artifact).

☐ "Yuera" vs "Yurea" (House Yurea vs person Jaifey Yuera) — reconfirms Locations flag.

☐ House Pontia heraldry blank (Crest/Symbolism empty) despite a defined peacock/azure identity.

Maps/Locations

 Hub = one master page: Six Kingdoms overview + full conquest chronology + name-evolution chain + era maps. Most consistency-edited page in the Canon — has its own corrections log and [CANON]/[INFERRED]/[TBD] sourcing key.

Resolves earlier flags

☐ Self-corrects two Locations flags: Pireaynea founded 7,400 BR (flags hub's "7,200 BR" as error); Gherci 8,763 BR (flags "8,663 BR" as 100-yr typo).

☐ Answers "Miuae = 3rd currency, which two outrank it?": Pel (\$50, Equateiy) and Kis (\$30, Vikitsv) outrank Miuae (\$26). First naming of Equateiy's currency

(Pel).

☐ Confirms Vikitsv → Equateiy conquest sequential; Ceval beheaded-vs-burned explicitly unresolved here too (matches Three Sisters flag).

Conflicts

☐ The Six Kingdoms "capitals" are actually the future Minara-era kingdom names — all six. Lists Aicruae → Lajazer, Gherci → Tarmet, Pireaynea → Civer, Coelum → Atriki, Equateiy → Ociyaran, Vikitsv → Berlailia, but the page's own Name Evolution chain says those are the Minara kingdom names with different capitals (Vellin, Bela, Lorne, Elgan, Zada, Zemela). Perfect 6-for-6 match = wrong-era names filled into the capital field. Root of the Lajazer/Vellin tangle.

☐ Coelum firmly "northern" here (Henem Bay north of Coelum; Fetora Sea south, shared by Vikitsv/Pireaynea/Aicruae — Coelum not listed; text: "impoverished northern wasteland"). Conflicts with Locations placing Minara-era Atriki in the south on the Fetora Sea.

☐ Civil-war dates now have three values: 7,222–7,217 (this page), 7,221–7,217 (Historical Figures), 7,250–7,217 (map subpage title).

Not fully thought out

☐ Duplicate canon: embeds a near-verbatim copy of the standalone Name Evolution page — two master copies of the same chain = drift risk.

☐ Population scale: Gherci 389M vs Aicruae 120M / Equateiy 97M / Pireaynea 67M / Vikitsv 46M — Gherci ~3× the next; sanity-check.

☐ Era map images linked but hub is otherwise just this one mega-doc.

Question / cleanup

☐ Internal working note leaked into canon: "Confirmed by Vicky as reasonable" sits in the corrections log — a process note, not lore.

☐ Heavy ASCII-art dividers (====) and monospace blocks read as scratch formatting, not a finished page.

Language

- Short page mapping languages to kingdoms + two Kurti alphabet/number images.

● Good

- ☐ Clear mapping: Aicruae = Ananara (script Kurti, 26 letters); Gherci & Coelum = Speail; Pireaynea = Pocorki; Vikitsv = Traer/Jal'vae/Dorrena; Equateiy = Audru + Lato (Lato as "romantic" fits the Venice/Italic template).

● Conflicts

- ☐ "Dorrena = combination of Kurti and Audru" mixes a writing system (Kurti) with a spoken language (Audru) — category error; the other blends (Traer, Jal'vae) combine two spoken languages. Kurti's spoken counterpart is Ananara.
- ☐ No divine language "Asata" on the dedicated Language page, though it's referenced elsewhere as the gods' tongue — a gap.
- ☐ Coelum shares Speail with Gherci, yet Material Culture pairs Coelum with Norse/Scottish and Gherci with Anatolian/Ethiopian — far-flung pairing needs justification.

● Errors / cleanup

- ☐ Kingdom spelled "Vikistv" here vs "Vikitsv" on Maps — reconfirms systemic spelling split for the kingdom name.
- ☐ Typos: "there written language" (their), "language of the wales" (whales), "Coleum" (Coelum), "Alpahebt" caption (Alphabet), "plug on numbers," "If wanted to create" (missing you).

● Not fully thought out

- ☐ Only Kurti has a documented alphabet + number system; the other seven languages have no script, sample, or grammar — heavily Aicruae-centric.

Religion — 2nd hub (The Gods + The Saints)

SEPARATE Religion page from the main cosmology bible — a parallel "The Gods" + "The Saints" hub with diverging lore. Two full Religion hubs now coexist in the Canon.

Resolves / cross-confirms

- ☐ 12 New Gods roster matches the main Religion Pantheon of Twelve; 4 Old Gods (Mikiani/Mikani, Poaranji, Renedin, Haxenylian + minor Loart) consistent.
- ☐ Identifies the Battle of Relirian: Saint Reron ("ender of worlds") died there (~7,402 BR) leaving no survivors — explains Maps' note that Gherci's 78% female population is "a legacy of the Battle of Relirian."
- ☐ Confirms each saint's patron god (Aliirusk ← Finore, Bura ← Vapaz, Galamma ← Sielaph, Dorthargel ← Nellebrie, Eren ← Nimlye, Argellon ← Paha, Siriande ← Zopha, Nairan ← Allan, Malign ← Finore, Duri ← Allan, Reron ← Vapaz) — detail the main page lacks.

Conflicts

- ☐ TWO competing War of the Gods myths. Here: four brother-gods born "of the same song"; Haxenylian loves human Gaialana, fathers Zopha & Vapaz, Renedin murders Gaialana, new gods win, Vapaz becomes first king — Renedin is just one of four brothers. Quote Bank/Crown of Glory cast Renedin as the master-villain (provoked WoG I, co-created twins, had Vapaz kill Apharia, secretly fathered Soli). Pick one cosmology.
- ☐ THIRD version of the twins' fatherhood: here Zopha is "married to Loart" and Zopha = Paxtino + Ekhasostio (Loart implied father). Main Religion = fatherless (Zopha's tears); Quote Bank/Crown of Glory = secretly Renedin. Three accounts.
- ☐ Saint count: this page backs "12, Reron last" — documents only 12 saints, ends at "12. Reron," omits Harnua (though it calls Bura "second of thirteen"). This

is the source of the Timeline's "Reron 12th & final" that conflicts with Key Words/Religion's "Harnua 13th & final."

- ☐ Gherci founded-before-founder reconfirmed: Saint Duri "founded, created, and ruled" Gherci but is dated 8,747–8,670 BR while Gherci's founding is 8,763 BR — 16 yrs before her birth.
- ☐ Vapaz is half-human (son of Haxenylian + mortal Gaialana) yet enacts the First Divine Law banning mortal–immortal unions — the king of the gods is a product of what he outlaws.

● Errors / cleanup

- ☐ Saint numbering off by one: "Malign the ninth saint" sits at list position 10 (after 9. Karniode); ordinals vs positions disagree.
- ☐ Name drift on one page: "Mikiani" (vs Mikani elsewhere); "Nimyle" vs "Nimlye" in the same section.
- ☐ Nearly all god portraits are broken image embeds; Gods page is mostly empty galleries with little text per deity.

● Not fully thought out

- ☐ Two full Religion hubs coexist (cosmology bible vs this Gods+Saints hub) with diverging lore — biggest consolidation risk found. Designate one canonical, merge/retire the other.
- ☐ This Saints page has no month associations (Key Words/Religion do) and no Harnua, so neither Religion page is independently complete.

Subpages: Goteivati's Ten Rules & Book-2 Characters

- ☐ "Emperor Goteivati's Ten Rules" (under Key Words) is a strong in-world decree. "A Tale of Three Sisters Characters" (under the Three Sisters book page) is completely empty.

Goteivati's Ten Rules — strong page

- ☐  Cross-confirms threads: Article III defines the calendar reset (BR = Before Reconstruction, AR = After Reconstruction); Article II = abolition of old faiths; Articles IV & VI = the patriarchal turn (Pataoiut); Article VII = registration of magic users ("known to the state and bound to its needs").
- ☐  Reinforces the epoch-name conflict: brands the 0 AR epoch the "Reconstruction" (matches A Princess in Love) vs Era's Reference's "Dark Ages / Restoration." Strong evidence to settle the canonical epoch name as Reconstruction.
- ☐  Emperor's name misspelled twice on his own decree: "Goteivati Zivc Patton III" vs "Goteivati Zivic Patton III"; plus "regin" → reign.
- ☐  Filed under Key Words and never names "Pataoiut" or "Matsiali," so a reader can't connect the Ten Rules to that system. Cross-reference to Religion / Era's Reference.

"A Tale of Three Sisters Characters" — empty

- ☐  Completely blank (no title, no content). Book 2's character roster is an empty placeholder; the Asleleri sisters & Book-2 cast have no profile page — detail lives only in the Three Sisters book-info NOTES.

Note: the Locations and Historical Figures pages are very long and were only partially reviewed so far (Pireaynea/Coelum/Equateiy/Vikitsv country entries and the later Solis-era bios still pending a deeper pass).
