TIMELINE — Proposed Build (Draft for approval). A working draft, **not live canon**. It stages a populated TIMELINE against the locked era spine from Inferred Canon Fixes and Inferred Canon Fixes — Part 2. Nothing here is written into the live hub until you approve it. First deliverable: the **ERA OVERVIEW** backbone — the skeleton every later entry (era events, ruler succession, lifespans) hangs off.

Per-era event entries

Every dated event currently scattered across the live [TIMELINE](#), slotted onto the locked spine in chronological order so each era has its own event spine.  pulled from existing canon ·  continuity flag needing your ruling ·  **gap** era still needs events developed.

Era of the First Song · ~30,000 – 8,900 BR

- **~30,000 BR — War of the Gods I.** Four god-brothers (Mikani, Poaranji, Renedin, Haxenylian). Haxenylian's union with the mortal Lady Gaialana produces Vapaz & Zopha, the first New Gods. Renedin murders Gaialana; the New Gods win; Haxenylian and Loart die; Vapaz becomes the first King of the Gods.

- **~14,300 – 14,200 BR — The twin prophets Aryanara & Vekta** teach the nature of the soul and Noirta's cycle, found the first temples of what becomes the Circle of Eternal Light, and discover the Ilkai herb.
- **14,271 BR — The Circle of Eternal Light is formally founded** by Aryanara & Vekta.  live page flags a possible duplicate founding entry — reconcile.
- The Age of Saints (the thirteen saints):
 - **18,740 BR — Battle of Wena; death of Saint Aliirusk;** the Tragedy of Enaner (his family killed by humans).
 - **17,540 BR — Death of Saint Bura.**

- **10,952 BR — Saint Argellon establishes the first temple to Paha** (and dies the same year).
- **10,533 BR — Saint Siriande poisoned by her son Ritav.**
- **10,528 BR — Ritav takes his own life; Zopha floods his grave.**
- **9,983 BR — Death of Saint Nairan.**
- **9,351 BR — Death of Saint Karniode;** his village is devastated by a tsunami.
- **9,305 BR — Saint Malign killed** during a holy celebration.
- **? Continuity flag — the Age of Saints overruns this era.** Saint deaths run as late as Saint Duri (8,670 BR) and Saint Reron (7,402 BR), which fall in the Warriors' Age and Classical Kingdoms by date. The spine assigns the Age of Saints to the First Song — decide whether it's a *theme* that closes ~8,900 BR or a *thread* that genuinely runs to Reron's death.

Warriors' Age · 8,900 – 7,945 BR

- **8,900 BR — Equateiy founded** by Yemaser of House Kivier.
- **8,763 BR — Gherci founded** by Saint Duri, who folds Aryanara & Vekta's old territories under House Catern's protection.
- **8,759 BR — Aicruae founded;** King Haliour Layern Patton I unites the clans, declares House Patton, and builds Lajazer atop a cliff.
- **8,746 BR — House Arvento founded** by Lenkitta Arvento, sworn to the Pattons.
- **8,704 BR — Battle of Aishae;** Arvento repels House Baliva and builds a port — first seed of the Arvento–Baliva feud.

- **8,558 BR — The Massacre of Light;** King Viake Recreation Patton & Queen Mari slaughter 90,000 followers of the Order of the Pure Ones.
- **8,559 – 8,094 BR — Revival of the Pure Ones** underground among the nobility.
- **8,494 BR — Coelum founded** by Yuavekio the Wise.
- **8,264 BR — Battle of Little Hill;** Yujari & Taverlo's revolt sparks the class-war chain.
- **8,262 BR — Battle of Bears;** Taverlo is betrayed by his closest friend and defeated.
- **8,259 BR — Bloody Winter;** the first successful coup against the Aicruan royals (3,000+ dead) before its leaders are hanged.
- **~8,250 BR — Battle of Summers;** loyalist House Vika tips a noble rebellion and begins its rise.

- **8,248 BR — Battle of Rivers Point, Battle of GreyNest, and the Treaty of Oahiat** — the Patton–Vika partnership cements as war and diplomacy run in parallel.
- **8,226 BR — The Dispute at Tericaer**; Arvento beats Baliva for the breadbasket, igniting open feud.
- **8,201 – 8,152 BR — The War of World's End (War of Fera)**; ~49 years of Arvento–Baliva annihilation.
- **8,160s BR — The Kalip Plague** (Battle of Jatlya) ravages the war zone; Hailea Kulio tends the sick.
- **8,151 BR — Battle of Afera**; the Arvento–Vika coalition destroys House Baliva as a line.
- **8,126 BR — The Arvento Code**, Aicruae's de facto constitution.
- **8,094 BR — The Taguar Murders**; shadow assassinations of nobles spread paranoia.
- **8,051 BR — The Council of the Forsaken** formed in secret by Houses Arvento, Aedria, and Caraen.
- **7,945 BR — Vikitsv founded** by Verna, closing the era.
- **?** feud-length wording: the War of World's End is variously called "~49 years," "century-long," and part of a "five-hundred-year" arc (Aishae 8,704 → Afera 8,151). Pick one framing.

The Classical Kingdoms · 7,945 – 7,400 BR

- **7,749 BR — The Magic Tower is built** on Mount Aicren by Verna's descendants (Ulian, then sons Kiear & Liaerto III); it becomes Vikitsv's seat of power.
- **7,489 BR — House Hige founded** by Mokar Hige, timed to dodge the Highwater chaos.
- **7,463 BR — The Siege of Highwater**; the class-war chain's payoff — peasants and disenfranchised soldiers besiege the capital during a historic flood.
- **7,402 BR — Battle of Relirian; death of Saint Reron** (twelfth and final saint, "Ender of Worlds," age 48) in mutual annihilation.
- **7,400 BR — Pireaynea founded** — the last of the six kingdoms (the *ver sacrum*), the destabilizing sixth.

The Pre-Unification Period · 7,400 – 7,250 BR

- The 150-year fuse: the old Aicruan order rots; Emillea's elevation and public murder light the Civil War's spark (Emillea / Solis / Iris).
- **7,250 BR — Solis Elias Patton born.**
- **!** gap: defined but almost no dated events on the live page — Emillea's arc needs dating out.

The Civil War Period · 7,250 – 7,217 BR

- Solis vs. The Twins (Iris & Orcus) for the Aicruan throne.
- **7,221 BR — Year One of the Civil War** (live page's Book 1 structure). ? the spine says fighting begins 7,222 BR; the Quick Reference and book timeline say 7,221 — reconcile the start year.
- **7,217 BR — Orcus dies in the throne room**; the war ends.
- ! the per-year breakdown (Years 1–5) is still blank scaffolding on the live page — needs its events.

The Great Conquest · 7,217 – 7,163 BR

- Solis unifies all six kingdoms by five different methods; the Solisian Empire is born.
- **7,214 BR — Esterica dies.**
- **7,163 BR — Emperor Solis Elias Patton dies** (age 87).
- ! gap: the five unification methods aren't individually dated yet.

The Early Empire · 7,163 – ~4,000 BR

Per your locked ruling (Inferred Canon Fixes §7), this ~3,000-year span is no longer one undifferentiated block — it is **five named imperial phases**, and its first succession is a **matrilineal pass** that keeps Solis's blood on the throne through a daughter (not a throne-name break).

- **7,163 BR — Emperor Solis dies** (age 87); his son **Maen** inherits at 54 and renames the realm the **Solisian Empire**.
- **7,140 BR — Emperor Maen dies childless** at 77 (three wives, no surviving issue); the throne passes to his sister **Coyre's** eldest son.
- **~7,140 – ~7,092 BR — Emperor Elleinaj Patton I** (Solis's grandson via the female line) inherits at 55, rules ~48 years, and stabilizes the empire after Maen's barren reign; later weds his daughter Cenainaya to Snieoa's grandson Eavanileto Yurea, reuniting the two branches of Solis's descendants.
- **Phase I · The Founding & the Matrilineal Settlement (7,163 – ~7,000 BR)**: the female-line succession sets precedent; conquered kingdoms are renamed (Pireaynea → Lingia, Coelum → Hikai); House Leva's pre-imperial **Divine Matriarch** (Brimena Leva, ~8,902 BR) is scaled up into the imperial **Matsiali** state ideology.
- **Phase II · The High Matsiali / First Golden Age (~7,000 – ~6,200 BR)**: the matriarchal order at its confident height; Roman-style codified law, roads, aqueducts, and citizenship-as-integration; the conquered patriarchies simmer beneath.

- **Phase III · The First Great Crisis (~6,200 – ~5,800 BR):** the empire's first true rupture — a usurping general or disputed succession (the first real throne-name break per Fix 3), with revolt in restless Lingia and the Vikitsv magic-provinces.
- **Phase IV · The Reconsolidation (~5,800 – ~5,000 BR):** a restorer dynasty rebuilds; Matsiali re-entrenched, harder and more bureaucratic; the standing army fully professionalized.
- **Phase V · The Long Plateau (~5,000 – ~4,000 BR):** prosperity calcifying into complacency — the drift that makes the Golden Millennia possible and the slow ossification of Matsiali that Goteivati III will later exploit.
- ⚠ Phases II–V are **proposed scaffolding** (the frame is locked; named reigns and crises still to be authored from the Fix 4 friction list: succession & regency wars, religious schism, provincial secessions, plagues/famines, the slow rise of the magic order).

Golden Millennia · ~4,000 – ~500 BR

- The empire's millennium-long height; magic kept provincial and suppressed; the Circle's great schism.
- ⚠ gap: no dated events yet — the schism in particular needs a date.

The Late Golden Period · ~500 BR – 0 AR

- Terminal decline; the suppressed magic line breaches the palace — Merigen Bleelack's coup against Emperor Hevet Xacrey Patton; Crandona reclaims the throne; Vandrea corrupts the world-doors (*A Princess in Love*, ~0 AR).

Dark Ages · 0 – ~50 AR

- **0 AR — Birth of Goteivati III** to Empress Crandona Sarleia Patton; the calendar resets (BR → AR, "Reconstruction").
- **~25 AR — Goteivati III ascends** the throne and turns tyrannical.
- **~35 AR — "Goteivati the Damned"** murders his wife, her lover, and their children.
- **36 AR — Matsiali abolished, Pataoiut established** — women stripped of authority and education outlawed.
- **~40 AR — Pataoiut religious reform** — men worshipped as gods on earth; Leneyez twisted; the Council of the Forsaken repurposed as enforcers.
- **~50 AR — Reconstruction aftermath:** purges, decline, provinces drifting toward warlordism.

The Restoration · ~50 – 400 AR

- Goteivati is deposed; his bastard son Hefu becomes the Sun King; the Pataoiut hardens into permanent law.

- ⚠ gap: Hefu's accession and the deposition aren't dated yet.

The Long Stability · 400 – 1,326 AR

- The longest unbroken peace; the Pataoiut becomes gravity; the registry quietly builds the Blood Trials' precondition.
- ⚠ gap: no discrete events logged.

The Blood Trials · 1,326 – 1,528 AR

- **1,326 – 1,528 AR — The Blood Trials;** ~400,000 women and ~600,000 children killed over the false premise that mismatched magic meant infidelity.
- **1,528 AR — Great Mage Takar proves magical inheritance is only ~40% likely,** shattering the premise and ending the Trials overnight.

The Age of Reforms · 1,528 – 1,852 AR

- Takar's proof ignites reason; reform without revolution.
- **~1,852 AR — Emperor Astyan II** closes the reform era (reverses Goteivati's worst governance ~780 years before Minara's time; Pataoiut culture lingers).

The Post-Reform Period · 1,852 – 2,400 AR

- Reform frozen as a ceiling; mundane industry remakes the world; magic stays an elite, Academy-gated craft.
- ⚠ gap: no discrete events logged.

The Late Modern Period · 2,400 – 2,632 AR

- Confident imperial noon — the empire's last full daylight.
 - **2,632 AR — *A Crown of Glory* begins** (Massacre at Aresada; Minara enters the Solisian Academy). The full beat-sheet exists on the live page but runs past the threshold, 2,632 → ~2,652 AR.
-

Continuity flags & open questions surfaced while slotting events — these need your rulings before they go to live canon:

- **Age of Saints span:** does it end ~8,900 BR (theme) or run to Saint Reron's death at 7,402 BR (thread)?
- **Civil War start year:** 7,222 BR (spine) vs 7,221 BR (Quick Reference / book timeline).
- **War of World's End length:** ~49 years vs "century-long" vs the 500-year Aishae → Afera arc — pick one framing.
- **Naming:** "The Late Modern Period" (live spine / Fix 1) vs "The Late Modern Age" (Section 16).
- **Undated thread:** Execution of Harnua Kulio; the second moon raised; the 13th month (Agarisono) established — still [Date TBD].
- **Largest gaps to develop next:** Early Empire, Golden Millennia (schism date), the Restoration accession, and the Long Stability / Post-Reform stretches.

Crown Prince Elleraian Betenadia Patton — remaining dates ⚠ [TBD].

Lifespan continuity flags (in addition to the era-level flags above):

- **Lady Agari Liazen:** tree dates (8,663–8,660 BR = 3 yrs) vs profile's "died before age two."
- **Princess Karinoa Nalia Patton:** death 8,561 BR (tree, age 50) vs 8,570 BR (profile, age 41).
- **King Sayero Walica Patton:** 8,608–8,533 BR (tree) vs 8,615–8,540 BR (Walica's profile).
- **Apharia:** ~7,233 → ~7,100 BR gives a ~133-year mortal lifespan — almost certainly a stray date.
- **Civil War principals — now dated** ✅: the twins Orcus & Iris (both b. 7,256 BR; d. 7,217 & 7,218 BR) and Esterica (7,248–7,214 BR), from the Book 1 character bible. The early saints' births are likewise backfilled from Religion (see The Saints table above).
- **New flag — the twins' reign length:** Book 1 says Orcus & Iris "ruled ~7 years" before Solis's return, yet the coup (7,241 BR, at age 15) to Solis's return (7,221 BR) spans ~20 years. Either the "~7 years" is loose or the coup date needs revisiting — it sets the contested-throne window in Ruler succession.
- **Minor — Coyre's birth:** the same bible gives both 7,214 BR and 7,215 BR for Princess Coyre; pick one when her row is finalized.

- **Undated institutions:** the **Cidet** (Temple of the Gods, the holiest pilgrimage site), the **Solisian Academy**, the **Danepelie** (senior-Cidet priests' council), the **Matsiali** ideology's *origin* (only its 36 AR abolition is dated), and the **13th month Agarisono** (created at Harnua's death, ~7,214 BR) — all  [founding TBD].
- **Noble houses with no recorded founding date** — ~55 of the houses on Noble Houses have no date yet: Vika, Kulio, Vemer, Aedria, Yurea, Najil, Caraen, Dajanyi, Leva, Tikan, Anaiopana, Hert, Cowsrer, Gaset, Yainaro, Kauliv, Amecken, Miada, Kilina, Baliva, Dai, Veir, Liazen, Yailk, Brumik, Mava, Pontia, Malrancis, Iarnailo, Catern, Renalagardo, Orana, Renililas, Qari, Navefa, Miaran, Iriandet, Anasetanya, Leum, Rendenten, Imbrer, Toallu, Ganane, Dasbe, Schmidtavaca, Balewer, Ashonve, Uaver, Vesmen, Maro, Reidskelisia, Adiye, Ochanan, Tazem, Jivaya, and Kifan. (Asterisked houses have an approximate anchor in the table above.)*

Founding continuity flag: the **Order of the Pure Ones** is dated to ~8,600 BR "out of the massacre that followed the deaths of early saints," yet it is also said to mourn the saints killed in King Viake's **Massacre of Light (8,558 BR)** — ~40 years *later*. Clarify whether these are two separate massacres or whether one of the dates needs to move.

Ruler succession (proposed)

Reign-by-reign succession across the six kingdoms. **One important caveat up front:** canon records *birth–death* dates, **not** formal accession years — so every reign window below is **derived** from the death-to-death sequence except the few with a hard anchor (). And only **Aicruae / House Patton** (with its imperial continuation) has a continuous, datable ruling line;

the other five kingdoms have only scattered anchors.  accession year anchored in canon ·  derived / approximate · **[TBD]** undeveloped.

—	— contested throne / Aicruan Civil War (7,241 → 7,217 BR) —			

On the ~1,060-year gap (8,468 → 7,408 BR): per your locked ruling (Inferred Canon Fixes §3), "Patton" is a **throne-name carried across numbered dynasties**, not one unbroken bloodline — so this hole is not a single missing line of ~30 kings but **several lost or unrecorded dynasties**, punctuated by usurpations, cadet-branch restorations, and interregna. The genealogy impossibilities it used to create (Queen Cawiloan bearing heirs at ~56–58; King Ilaem I "born" two years before his parents' wedding) dissolve under that model. The framework is locked; the individual named reigns that fill the gap are still to be authored.

The Patton gap — proposed lost dynasties ♦

Everything here is **net-new invention** offered for approval (♦ = proposed) — built to the locked throne-name model (§3) and threaded through the real anchors already inside the gap (Council of the Forsaken 8,051 BR, the Magic Tower 7,749 BR, House Hige 7,489 BR, the Siege of Highwater 7,463 BR). It spans the ~1,000 years from the First Royal Line's end (~8,409 BR) to the canon Second Royal Line (Ilaem II, b. 7,408 BR) as **four claimant dynasties broken by two interregna** — not one bloodline. Only notable rulers are named; each line implies ~6–9 reigns at the ~30-year Patton average.

Line (proposed) ♦	Span	How it began → how it ended	Notable rulers (proposed) ♦
Second Line — House Patton-Mena <i>(the Distaff Restoration)</i>	~8,409 – ~8,150 BR	The First Royal Line's male line fails (Queen Tani Evalia last, d. 8,459 BR); the crown passes through a Patton princess wed into House Mena , whose heir takes the throne-name — a cadet-branch restoration. → Male line extinct again; collapses into the First Interregnum.	King Olar Layern Patton (founder, r. ~8,409–8,381); Queen Vesaila Mena-Patton (regnant, ~8,360–8,322, continuing the queen-regnant precedent); King Haliour Layern Patton III (~8,300–8,270, reviving the founder's name for legitimacy).
First Interregnum <i>(the Council's shadow)</i>	~8,150 – ~8,040 BR	No undisputed Patton; the great houses (Arvento, Vika, Caraen) rule through a regents' council — the soil the Council of the Forsaken (8,051 BR) grows from.	— (rule by noble council; no crowned monarch)

Line (proposed) ♦	Span	How it began → how it ended	Notable rulers (proposed) ♦
		→ A war-leader seizes the throne by force.	
Third Line — House Patton-Vika (<i>the Boar Kings; a usurpation</i>)	~8,040 – ~7,700 BR	A Vika war-leader seizes the crown by force and claims the Patton name by conquest plus a thin marriage tie — the first true usurpation. Militarist and expansionist; their reign sees Aicruae's first hard contact with Vikitsv's magic-clans around the Magic Tower (7,749 BR) . → Dynastic exhaustion splits the line into rival branches.	King Recar Vika-Patton (usurper-founder); King Viake Patton II (a deliberately ominous revival of the Massacre-of-Light name); Queen Sarelina Vika-Patton.
Fourth Line — House Patton-Caraen (<i>the Sacral Kings</i>)	~7,700 – 7,463 BR	Backed by the Circle of Eternal Light and House Caraen ("Gift from the Gods"), a pious branch restores the throne-name — the crown briefly riding the era's sacral drift and five-kingdom marriage diplomacy (a Gherci match foreshadowing Caelindra Hessa). → Toppled in the Siege of Highwater (7,463 BR) , the class-war payoff.	King Aedric Caraen-Patton (sacral founder); Queen Caelora Patton (Gherci alliance-bride); King Lacaseian Patton II (last sacral king, falls at Highwater).
Fifth Line — the canon Second Royal Line (<i>restoration out of Highwater</i>)	~7,463 – 7,408 BR → onward	A surviving Patton claimant restores the main line from Highwater's wreckage. → Becomes the canon Second Royal Line — its first dated figures are King Ilaem Nefest Patton II (b. 7,408 BR) and Queen Rayaliem , whose suicide canon already ties to "generational trauma from the Siege of Highwater."	(canon resumes) King Ilaem Nefest Patton II; Queen Rayaliem Tani Patton.

Reign-by-reign — the proposed ~30 reigns ♦

Each claimant line is now filled out reign-by-reign at the dynasty's ~30-year Patton average, threaded so the locked anchors (Council of the Forsaken 8,051 BR, Vikitsv 7,945 BR, Magic Tower 7,749 BR, House Hige 7,489 BR, Siege of Highwater 7,463 BR) fall inside the right reigns. **Every name, reign window, and ordering is proposed (♦), not canon** — accept, rename, reorder, merge, or collapse any of it. Reigns are derived from a death-to-death cadence, so windows are approximate.

The Solisian Empire — Imperial House Patton

#	Emperor	Reign	Lifespan	Notes
1	Emperor Solis Elias Patton	7,217 – 7,163 BR ✓	7,250–7,163 BR	Won the civil war (7,217 BR); conquered all six kingdoms; the empire is founded 7,163 BR.

The other five kingdoms — only scattered anchors

None of these has a recorded reign-by-reign succession, and three don't even use simple hereditary kingship. Best available anchors:

- **Equateiy — House Kivier** (*rule without a crown*): founded 8,900 BR by **Yemaser** (dates unknown); House Kivier wields power without ever taking a throne. Only later dated figure: **Duke Reasaec Kivier** (d. 7,217 BR, beheaded by Solis). No succession chain recorded. ⚠
- **Gherci — House Mava** (*throne subordinate to the Teire priesthood*): founded by **Saint Duri** (8,747–8,670 BR) in 8,763 BR; the Main Master of the Teire outranks the king. Mava founder & members [TBD]; only dated Gherci royals are **Princess Caelindra Hessa** (7,369–7,301 BR, m. into Patton) and **Princess Kamerida** (d. 7,218 BR). ⚠
- **Coelum**: founded 8,494 BR by **Yuavekio the Wise**; no later rulers recorded before it becomes the atheist "Forsaken Land." ⚠
- **Pireaynea**: founded 7,400 BR via the *ver sacrum* migration; no rulers recorded. ⚠
- **Vikitsv — House Orana** (*magocracy, not hereditary kingship*): ruled through the Grand Sorcerer & Council of Scholars; line descends from Verna's eldest son **Liaerto I**. Last head:

Grand Sorcerer Sevtor (d. 7,217 BR); the house is destroyed by Solis in 7,217 BR (only **Mekean Orana** escapes). No dated succession. ⚠

Succession continuity flags — these need your rulings before this goes to live canon:

- **The ~1,060-year Patton gap — reign-by-reign skeleton now drafted** (see *The Patton gap — proposed lost dynasties* above): per Fix 3, the hole is filled as **four claimant dynasties broken by two interregna**, landing on the canon Second Royal Line. All ~30 individual reigns are now drafted reign-by-reign (✦) and await your approval.
- **Reigns are derived, not recorded:** canon gives only birth–death, so every reign window above is inferred except Haliour I's founding start and the three imperial accessions. Confirm or supply true accession years.
- **Civil War interregnum:** Benjamin II dies 7,241 BR but the throne isn't settled until Orcus dies 7,217 BR — a ~24-year contested gap (Emillea's regency → the coup → the war proper from ~7,221 BR). Ties into the existing 7,222-vs-7,221 start-year flag.
- **Elleinaj's birth:** "~7,185 BR" (from "died at 93") vs "~7,195 BR" (from "inherited at 55 in 7,140 BR") — a ~10-year conflict.
- **Empire founding vs Solis's death:** the founding table dates the empire to 7,163 BR, the same year Solis dies — yet Maen "renaming" it implies it already existed. Confirm whether the empire dates from the conquest's completion (7,163 BR) or Solis's victory (7,217 BR).
- **Non-dynastic thrones:** Equateiy (crownless), Vikitsv (magocracy), and Gherci (Teire outranks the king) won't fit a simple dynastic-succession format — they'll need a different shape when developed.
