

Canon Hyper Focused Audit

Methodology. This audit cross-checks named entities (people, houses, locations, factions, events, objects, terms) across the CANON hub, its subpages, the WWG hub, and its subpages. Findings quote the source text and name the page each fact came from. Nothing here is invented — gaps and ambiguities are flagged, not filled.

Status key: Consistent · Conflict · Gap/Stub · Needs Clarification

Coverage marks: *(FULL)* = verified against the entire page · *(PARTIAL)* = page was too long to read in one pass; only named sections checked.

This is a living document, built section by section. See the **Coverage Report** at the bottom for exactly which pages were fully read, partially read, or not yet processed. Do not treat any category as complete unless the Coverage Report says so.

How this page is organized

- Findings are grouped by category, in the order: Locations → Historical Figures → Noble Houses → remaining categories.
- Two running indexes live at the bottom: **OPEN QUESTIONS** and **GAPS / STUB ENTITIES**.
- A **COVERAGE REPORT** at the very bottom tracks what has and hasn't been verified.

1. LOCATIONS

Subpage inventory: The LOCATIONS page (LOCATIONS) has **no child subpages** — it is one continuous page of ~2,239 lines. The separate canon pages **MAPS/LOCATIONS** and its map child are listed under the remaining categories and are **not yet processed**.

Coverage: LOCATIONS page read in **FULL**. ⚠️ Cross-page checks against Historical Figures, Noble Houses, In-Story Characters, Religion, Timeline, Magic System, the book-info pages, and the WWG branch are **PENDING**. Unless another page is named in an entry below, every "Conflict" listed is an *internal* contradiction within the LOCATIONS page itself.

A. Cross-era / continental naming

Map eras — Status: ☒ RESOLVED — Consistent (*FULL*) — (was ? Needs Clarification)

- **Facts found:** The page presents the continent across three eras — Solis's Era, Crandona's Era, and Minara's Era — with nations, capitals, and seas renamed between them (LOCATIONS, CONTINENTAL OVERVIEW sections).
- **Notes:** Sea renaming is stated (e.g., Oberyia Sea ↔ Orburydon Sea; Fetora Sea → "Thult Southern Waters"; the Mystic Isles → "Thult"). These era chains should be reconciled against TIMELINE, ERA'S REFERENCE, and the MAPS pages once those are read.
- ☒ **RESOLVED (confirmed by Azora):** The three-era renaming chains are consistent and fully documented in the "Name Evolution Across Eras" / "Name Evolution — Full Chain" sections of the map page *THE SIX KINGDOMS 8,900BR - 7,163 BR MAP*. Confirmed territory chain: Aicruae → Tanan Grand Duchy → Kingdom of Lajazer; Gherci → Caporiolan Kingdom → Kingdom of Tarmet; Pireaynea → Lingia → Kingdom of Civer; Coelum → Hikai → Kingdom of Atriki; Equateiy → Uxridian Grand Duchy → Kingdom of Ociyaran; Vikitsv → Theolisseia → Kingdom of Berlailia; Mystic Isles → Thult → Thult (no political boundary). Seas: Oberyia → Orburydon → Oberyia (reverts by Minara's era); Fetora → Thult (Southern Waters) → Fetora (reverts); Quather unchanged across all three eras; Henem Bay → [TBD] → Henem Bay. The sea renamings originally flagged here (Oberyia ↔ Orburydon, Fetora → Thult Southern Waters,

Mystic Isles → Thult) are intentional, not errors. ⚠ Sole residual gap: Henem Bay's Crandona-era name is still [TBD] on the map page.

B. The Six Nations

Aicruae — Status: ✅ RESOLVED — population gap fixed (*FULL*) — (was: ✅ *Consistent (minor population gap)*)

- ✅ **RESOLVED (confirmed by Azora)**: Eastern Aicruae's population is corrected from "40,000" to **40 million** — the original figure was a missing-digit typo, irreconcilable with its canon role as the region with the "largest unhoused and poor population in Aicruae." The national total is raised from 120M to **~157 million**, now fully itemized: four cardinal regions = 127M (Northern 20M + Eastern 40M + Western 65M + Southern 2M) + a ~30M central/capital belt (Lajazer 5M + Rewqo 10M + Jasereiey 15M). ⚠ Source edits this implies on the LOCATIONS page (not yet applied): Eastern Aicruae "Population: 40,000 people" → "40 million"; Aicruae "Total Population: 120 Million" → "~157 Million" (and the flag write-up's "120 million people"); and ideally add an explicit Central/Capital region entry so the 157M is itemized at the source. Jasereiey's "[TBD]" region should be fixed to Central.
- **Facts found**: Capital **Lajazer** (LOCATIONS, Aicruae "Capital: Lajazer" and Rewqo "just outside the capital Lajazer"). Currency **Rern**, ≈ 20 USD. Follows the Circle of Eternal Light. Regions: Northern Aicruae (20 million, "Also Known As: The Northern Isles"; towns Aishae, Paler, Port Vento), Eastern Aicruae ("Population: 40,000 people"; town Haleker; borders Pireaynea), Western Aicruae ("65 Million People"; food production), Southern Aicruae ("2 million people"; prison territory; town Basar Tari).
- **Questions/notes**: ? The regional populations do not sum to Aicruae's stated national total — Northern 20M + Eastern 0.04M + Western 65M + Southern 2M ≈ 87M, leaving a large remainder unaccounted for (no Central/capital-region figure given beyond Rewqo's 10M). Eastern Aicruae's "40,000" also looks anomalously small beside the others — confirm it isn't a missing-digit typo.

Gherci — Status: ✅ RESOLVED — founding date settled (*FULL*) — (was ❌ *Conflict*)

- **✓ RESOLVED (confirmed by Azora):** Founding date corrected to **~8,700 BR**, a year *inside* Saint Duri's lifespan (8,747–8,670 BR) — she founds Gherci as an adult (~age 47 if born 8,747). Both prior dates were wrong: **8,763 BR** (the majority date — TIMELINE, Six Kingdoms map, KEY WORDS, Historical Figures, Religion, LOCATIONS flag) sits 16 years *before* her birth; **8,663 BR** (LOCATIONS prose + House Mava) sits 7 years *after* her death. Duri stays the founder and her 8,747–8,670 lifespan stays fixed; only the year moves. ⚠ Source edits this implies (not yet applied): change "8,763 BR" → "~8,700 BR" on the TIMELINE, the Six Kingdoms map, KEY WORDS (WARRIORS' AGE), Historical Figures (Saint Duri), Religion, the Proposed-Build draft, and the LOCATIONS flag + Aryanara/Vekta entry; change "8,663 BR" → "~8,700 BR" on the LOCATIONS prose and House Mava; and fill the LOCATIONS structured "Founded: [Date TBD]" with ~8,700 BR. (The exact year is a soft placeholder — sharpen it anytime.)
- **Facts found:** Capital **Tarmet**. Largest/most populous nation, "389 Million People," 78% female / 22% male. Theocratic monarchy; royal family is **House Mava** but real power is **The Teire** (temple) led by the **Main Master**. Currency **Miuae**, ≈ 26 USD, "third most valued currency in the world." Epithet "The Land of Eternal Silence." Founded by **Saint Duri**.
- **Conflict (founding year):** "Gherci was founded by Saint Duri in **8,663 BR**" (LOCATIONS, Gherci prose write-up) vs. "this ancient nation founded by Saint Duri in **8,763 BR**" (LOCATIONS, Gherci flag description) and "Incorporated into the Kingdom of Gherci by Saint Duri in **8,763 BR**" (LOCATIONS, Aryanara's & Vekta's Territory). One section says 8,663 BR; two say 8,763 BR.
- **Conflict (structured vs prose):** Gherci's structured BASIC INFORMATION says "Founded: [Date TBD] Founder: [TBD]" even though the prose elsewhere on the same page gives both a founder (Saint Duri) and a date.
- **Questions/notes: ?** The page contains **two stacked Gherci write-ups** (a structured template + a prose version). They mostly agree but the founding-date split above originates from this duplication. Recommend collapsing to one.

Pireaynea — Status: **✓ RESOLVED** — spelling settled (*FULL*) — (*was ✗ Conflict (spelling)*)

-  **RESOLVED (confirmed by Azora):** Canonical spelling is "**Pireaynea**." Every cross-page mention agrees — the Six Kingdoms map, House Tazem (the nation's only noble house), the Civil War map, TIMELINE — Proposed Build, KEY WORDS AND TERMS, and *A Tale of a Thousand Songs* Characters ("Yera of Pireaynea") all use "Pireaynea." The two "**Pireayena**" instances are confined to this LOCATIONS page's Pireaynea flag prose ("Pireayena's primary economic resource"; "the monotheistic Pireayena worship") and are typos — a transposed -ayne-/-ayen-, not an alternate name.  Source edit this implies (not yet applied): change both "Pireayena" → "Pireaynea" in the LOCATIONS Pireaynea flag write-up.
- **Facts found:** Capital **Civer**. "Founded: 7,200 BR Founder: Deasn of Gherci" (fled Gherci after a treason charge, "only 17 when he founded the country"). Population 67 million. Monotheistic worship of **Allan** only. Currency **Brezeryiol**, ≈ 17 USD. Epithet "The Demon's Pit." Language "Pocorki." "renamed Lingia in the new imperial order."
- **Conflict (nation spelling):** Header/body spell it "**Pireaynea**"; the flag description repeatedly spells it "**Pireayena**" (e.g., "directly reflects Pireayena's primary economic resource"; "the monotheistic Pireayena worship"). Two spellings on the same page.
- **Questions/notes:** See the **Civer** entry (Section F) for the capital-vs-province cross-era question.

Coelum — Status:  Consistent (*FULL*)

- **Facts found:** Capital **Atriki**. Founder **Yuavekio** ("Yuavekio the Wise (an ironic title)" / "a drunken explorer"); his debt "the nation never paid off." Currency **Opeali**, ≈ 5 USD, "Lowest valued currency known." Mostly atheistic. Epithets "The Land of Sand and Time," "The Forsaken Land," "The Forsaken Place." Surrenders "40% of any national earnings to Equateiy and Vikitsv." "renamed Hikai in the new order."
- **Questions/notes:** None internal. (Cross-check the "Hikai" rename and 40% debt against Equateiy/Vikitsv and the Timeline later.)

Equateiy — Status:  RESOLVED — population settled (*FULL*) — (was  *Conflict*)

-  **RESOLVED (confirmed by Azora):** Total population is **97 million**. The figure in the BASIC INFORMATION block stands; the "[TBD]" in the POPULATION section was just an unfilled duplicate field and should be filled with **97 million**. 97M is the only population number for Equateiy anywhere in canon — no competing figure exists — and it sanity-checks cleanly against the other nations (Gherci 389M > Aicruae ~157M > **Equateiy 97M** > Pireaynea 67M), placing the small, wealthiest-in-the-world merchant state third in size.  Source edit this implies (not yet applied): change Equateiy's POPULATION-section "Total Population: [TBD]" → "97 Million" on the LOCATIONS page.
- **Facts found:** Capital **Ociyaran**. "Founded: 8,900 BR Founder: Yemaser of House Kivier." "Unofficial oligarchy ruled by House Kivier." Currency **Pel**, ≈ 50 USD, "THE HIGHEST VALUED CURRENCY IN THE WORLD." Epithets "The Kingdom of Gold," "The Place of Sin," "The Land of Secrets."
- **Conflict (population):** "Total Population: **97 Million People**" (LOCATIONS, Equateiy BASIC INFORMATION) vs. "Total Population: **[TBD]**" (LOCATIONS, Equateiy POPULATION section). One section gives a number; the other leaves it blank.

Vikitsv — Status:  **RESOLVED** — spelling + leadership both settled (*FULL*)

-  **SPELLING RESOLVED (confirmed by Azora):** Canonical spelling is "**Vikitsv**" (t-before-s). Confirmed *despite* "Vikistv" actually appearing in more places by raw count — Vikitsv wins because it holds the authoritative slots: the LOCATIONS official nation name, both maps (Six Kingdoms + Civil War), the **Name Evolution Across Eras** rename chain, and every Vikitsv noble house's structured Origin/Seat field (Orana, Leum, Renililas, Iriandet, Qari, Navefa, Anasetanya, Miaran).  Large source edit this implies (not yet applied): change "Vikistv" → "Vikitsv" across the LOCATIONS flag/key-locations prose, the Flags page, Historical Figures, Magic System, Houses Patton/Kulio/Dajanyi, KEY WORDS, Language, Fashion Collections (incl. the "Vikistv Fashion" subpage title), the book pages (A Tale of Three Sisters, A Tale of a Thousand Songs Characters + Book Info, A Princess in Love, A Crown of Glory), and the "Noble Houses across the Eras" section heading. (Spelling + leadership now both settled — see below.)
-  **LEADERSHIP RESOLVED (confirmed by Azora):** One unified Grand Sorcerer bloodline — no rival branches. The line runs **Verna** → **Liaerto I**

(Verna's eldest son) → Ulian → his sons Kiear & Liaerto III → (through Liaerto III) → Sevtor (the last Grand Sorcerer; House Orana; burned alive by Solis 7,217 BR; sole survivor Mekean Orana → leads to Merigen Bleelack). This makes **Ulian a descendant of Verna via Liaerto I** — which answers the open KEY WORDS question ("Is Ulian a descendant of Verna?" → yes), keeps House Iriandet's "For Ulian" motto meaningful, AND preserves House Orana's canon that it "descended from Verna's eldest son Liaerto I." ⚠ Source fix this implies (not yet applied): the LOCATIONS "Magic Tower" passage saying "Current Grand Sorcerer is child of Ulian's son Kiear" is wrong — the living line continues through **Liaerto III to Sevtor**, not through Kiear; rewrite that passage so Ulian / Kiear / Liaerto III sit *inside* the Verna → Liaerto I → ... → Sevtor chain as earlier generations rather than as the current rulers.

- **Facts found:** Capital **Berlailia**. Sits atop **Mount Aicren**, "COLDEST IN THE ENTIRE KNOWN WORLD." Magocracy ruled by **House Orana** ("direct pure breed line of Verna descent"). Currency **Kis** (gems), ≈ 30 USD. Monotheistic worship of **Iswan** (goddess of alchemy). The **Magic Tower** "Created by descendants of Verna in 7,749 BR," holds ~400 wizards. People have "blue hair and blue eyes" and "Only wear BLUE articles of clothing."
- **Conflict (nation spelling):** Spelled "**Vikitsv**" in headers/official name, but "**Vikistv**" throughout the flag description and key-locations prose (e.g., "the great sorcerer Verna who founded Vikistv"; "Torad is a small village located in what was formerly known as Vikistv"; "The Silora Forest is a forest located within Vikistv"). The Coelum flag also uses "Vikistv." Both spellings appear repeatedly across the page.
- **Conflict (Magic Tower leadership / Verna line):** "Originally controlled by Ulian and his sons Kiear and **Liaerto III** ... Current Grand Sorcerer is **child of Ulian's son Kiear**" (LOCATIONS, Vikitsv MAGIC) vs. "Grand Sorcerer **Sevtor** (a direct descendant of Verna's eldest son **Liaerto I**)" (LOCATIONS, Vikitsv KEY LOCATIONS / Valea). House Orana is also said to be "descended from Verna's eldest son **Liaerto I**." So the page names two different current Grand Sorcerers (an unnamed child of Kiear vs. Sevtor) and two different founding sons (Liaerto I vs. Liaerto III).

C. Aicruae regions & towns (all FULL)

Rewqo — Status:  Consistent — "Region: Capital Region (just outside Lajazer)," "Population: 10 Million." Site of "Battle of Rewqo (7,218 BR)" (Civil War Year Four) where Princess Iris died; "Solis buried both Iris and later Orcus beneath a temple of Nellebrie at Rewqo."

Jasereiey — Status:  Consistent — "Population: 15 Million," "seat of House Leva," "mineral mines"; "Battle of Jasereiey / Trench Warfare (7,221 BR)" (Civil War Year One).

Bareta — Status:  Consistent — "One of Orcus's three main strongholds"; "Massacre at Bareta (7,220 BR)" (Year Two); Mihel "lost his left eye" here.

Nyeo — Status:  Consistent — second of Orcus's strongholds; Mihel "cost ... his leg" after Harnua's betrayal (Year Two, 7,220–7,219 BR).

Valea — Status:  Consistent — Orcus's third stronghold; Solis nicknamed "the Golden King" here (Year Two, 7,220 BR); "Grand Sorcerer Sevtor of House Orana attacks Valea using magic, killing 15,000 people" (Year Five, 7,217 BR) — matches the Magic Tower section's "attack on Valea killed 15,000."

The Blue Tower — Status:  RESOLVED — Blue Tower defined (*was*  Gap)

-  **RESOLVED (confirmed by Azora)**: The Blue Tower is Aicruae's noble counterpart to Basar Tari — a political holding cell for disgraced and treasonous nobles, not a common prison. It sits in the city of **Macerino**, slightly before (or within) the **forest of Deyara**, in the broader capital region near Lajazer. This fits existing canon: the Aicruae NOTES describe noble imprisonment as "often a political holding cell, not a punishment... but not exempt from punishment either in cases of crimes like treason," with "imprisonment in a tower" listed as a standard noble fate; the "Blue" reads as a nod to Aicruae's national palette (the flag's blue = the Sky and the Sea). Macerino and Deyara are new place names with no prior canon mentions, so nothing is contradicted.  Source addition this implies (not yet applied): expand the LOCATIONS "THE BLUE TOWER" entry from its one-line stub to record (a) its function as the noble political prison, (b) its location — Macerino, by the forest of Deyara, near Lajazer — and optionally (c) add Macerino & Deyara as their own LOCATIONS entries.
- **Original flag**: only "A prison for nobility within Aicruae, located near the capital."

- **Note (Civil War year/date spine — internally consistent):** Year One = 7,221 BR, Year Two = 7,220 BR, Year Three = 7,219 BR (the Cidet attack), Year Four = 7,218 BR, Year Five = 7,217 BR. These line up. Verify against TIMELINE.

D. Sacred / neutral territories (all FULL)

The Cidet — Status:  Consistent (internally) — temple complex; governed by the council of priests; pilgrimage destination; attacked by Solis in Year Three (7,219 BR). Cross-check against Religion + In-Story Characters pending.

The Mystic Isles — Status:  RESOLVED — alias + timeline settled (*FULL*) — (was  *Conflict*)

-  **RESOLVED (confirmed by Azora):** Two threads, both now settled. **(1) Alias:** canonical spelling is "**Janrano Kiva**" — the "**Jonathan Kiva**" instances are the ones to fix (e.g., the LOCATIONS line "built his mercenary army... under the alias 'Jonathan Kiva'" → "Janrano Kiva"). **(2) Coup → war timeline:** no real contradiction — the ~20-year span between the coup (~7,241 BR) and the Civil War (7,221–7,217 BR) IS Solis's Mystic Isles exile, corroborated across House Hige (the coup), Religion ("Divine Contract... ~7,234 BR... During Solis's exile on the Mystic Isles"), House Kulio (Mihel "met Solis on the Mystic Isles to plan the rebellion"), and KEY WORDS ("~20 years of exile → Solis returns ~7,221 BR"). The lone error is House Patton's phrase that the war "erupted immediately" after the coup.  Source edits this implies (not yet applied): change every "Jonathan Kiva" → "Janrano Kiva" (LOCATIONS, the KEY WORDS glossary entry header, the A Tale of a Thousand Songs Book Info to-do); and fix House Patton's "erupted immediately" to reflect the ~20-year exile before the war.
- **Facts found:** "neutral territory belonging to the gods ... legally belongs to Aicruae but no king has staked actual claim." "two gates ... one leads to salvation and the other to ruin," created after the birth of the twin gods **Ekhasostio and Paxtino**. "Solis fled to the Mystic Isles after the coup (~7,241 BR)." Mihel Kulio later retreats here.
- **Conflict (alias):** "Solis trained and built his mercenary army on the isles under the alias '**Jonathan Kiva**'" vs. "the neutral meeting ground where Mihel first encountered '**Janrano Kiva**'" — two spellings of the same alias in adjacent sentences.

- **Questions/notes:** ? Coup dated "~7,241 BR" but the civil war battles are 7,221–7,217 BR — a ~20-year gap between the coup and the war. Confirm the intervening timeline against TIMELINE.

E. The Academy / Solisian Academy & Crown of Glory sites (all FULL)

The Academy Island / The Solisian Academy / "The Academy" — Status: 
RESOLVED — all 4 sub-issues settled (FULL) — (was  Conflict)

- **Facts found:** Magical institution on an island in the Fetora Sea "directly south of the Civer-Atriki border." Ruled by **The Principal** (an artificial being). Nine professors (table lists nine). Setting for most of *A Crown of Glory*. "Emperor Goteivati Zivc I's ten rules do not apply here."
- **Conflict (number of eras it appears in):** The top-of-page stub says it "Appears across **all three** map eras (Crandon's and Minara's)" — claims three but names only two — while the detailed write-up says it "Appears as 'The Academy' in **both** the Crandon's Era map ... and the Minara's Era map" (i.e., two).
-  **RESOLVED — map-era count (sub-issue 1 of 4) (confirmed by Azora):** The Academy appears on **two** map eras, not three — Crandon's Era (south of Lingia) and Minara's Era (southwest of Civer). The "all three" phrasing is the error and should read "both"/"two": those are the only era maps that actually depict it, and the **Solis's-Era / Six Kingdoms map (8,900–7,163 BR) does not show the Academy at all** — consistent with the entry's own note that before Goteivati Zivc III's reign it was "primarily just a school for adolescent nobility, before magic was introduced formally into the empire," i.e. not yet a notable mapped institution in Solis's era.  Source edit this implies (not yet applied): on the LOCATIONS Academy write-up, change "Appears across all three map eras (Crandon's and Minara's)" → "both" (or "two").
- **Conflict / Needs Clarification (timescale):** The mission statement says standards "have remained steadfast for **over a decade**," and the Academy is named for and post-dates the late Solis ("our beloved Solis, who now rests in the land of the eternal sun"), yet it is also said to persist across multiple map eras spanning long historical time. "Over a decade" and "endured through major political upheavals" across eras are hard to reconcile.

- **✅ RESOLVED — timescale (sub-issue 2 of 4) (confirmed by Azora):** The "over a decade" figure is the error — it understates the Academy's age. The institution is centuries old: it persists across both the Crandona's and Minara's era maps and is described as having "endured through major political upheavals." The mission statement's "standards have remained steadfast for over a decade" should be **widened to match that multi-era span** (e.g. "for centuries"). ⚠️ Source edit this implies (not yet applied): on the Academy's "Our School" mission statement, change "have remained steadfast for over a decade" → a multi-era span (e.g. "for centuries").
- **Questions/notes: ?** The Principal's appearance is described inconsistently: "Long pink hair" (normal), then "a short and fluffy black bob with faint strikes of black" (defense), then "because she's not living, her hair is silver" — pink vs. black vs. silver in one passage. ? She is "designed in the likeness of Siroa Taten's daughter" and would have streaks "blue like her mother and aunt," implying Siroa and Lyanami Taten are **sisters**, yet they are repeatedly called the Taten **cousins**.
- **✅ RESOLVED — Principal's hair (sub-issue 3 of 4) (confirmed by Azora):** Not a contradiction — three states, each tagged on the Staff page. **Pink** = normal/default mode ("long pink hair and light blue eyes"); **black bob** = defense mode ("her hair shrinks into a short and fluffy black bob... and her eyes turn dark blue"); **silver** = the conditional streak detail marking her as artificial/non-living ("if she was alive those white streaks would have been blue like her mother and aunt, but because she's not living... her hair is silver"). Pink and black are mode-dependent looks; the silver streak is the tell of her non-living nature. No color needs to change.
- **✅ RESOLVED — Taten relationship (sub-issue 4 of 4) (confirmed by Azora):** Siroa and Lyanami Taten are **cousins**, as the Staff page literally states ("the Taten cousins"). The "blue like her mother and aunt" line uses **"aunt" loosely/honorifically** — the customary way a child refers to a parent's close cousin — rather than denoting a literal sister bond (or the true aunt is a separate, unnamed Taten). No source change required: "cousins" stands, and "aunt" reads as an affectionate title, not a strict kinship term.

Gavara Castle (The Training Grounds) — Status: **✅** Consistent — "a quick twenty-minute walk from the Solisian Academy"; former lord's castle whose family

"died during the Monstru Plague." *A Crown of Glory*.

Emillea Hall — Status:  Consistent — girls' dormitory "Named after Lady Emillea Hige, a historical figure from A Tale of a Thousand Songs." (Cross-check Lady Emillea Hige against Historical Figures / House Hige later.)

Café Iri — Status:  Consistent (internally) — "an out-of-commission portal," owned by "Lady Zani ... actually the goddess Zopha in human form ... to look after her son, the god Soli." (Cross-check Soli/Zopha against Religion later; note Professor "Leranoan Gevhilem" is flagged elsewhere as secretly Soli.)

The Gate — Status:  Consistent (internally) — "a moving hell dimension"; "the physical manifestation of the corrupted world doors that Vandrea damaged during A Princess in Love, now worsened by Renedin's influence." Cross-ref KEY WORDS AND TERMS pending.

The Great Garden — Status:  Consistent — hidden corner of the Academy where "Elleraian Betenadia Patton spends most of his time."

F. Other named places

Negiet — Status:  RESOLVED — Vikitsv (*FULL*) — (was  *Conflict*)

- **Conflict:** Listed under **Equateiy**: "NEGIET: - Negiet is the place of origin of Isenaylini Leum/Asleleri, the mother of Enyokia and Vandrea Asleleri" (LOCATIONS, Equateiy "Places"). Also listed under **Vikitsv**: "Negiet: - A town (House Leum, is from here)" (LOCATIONS, Vikitsv KEY LOCATIONS). The same town (tied to House Leum / Isenaylini Leum) is placed in two different nations.
-  **RESOLVED — Negiet is Vikitsv (confirmed by Azora):** Negiet is canonically in **Vikitsv**. Every anchor agrees: House Leum's own page lists "Origin: Vikitsv" and "Seat: Negiet, Vikitsv"; *A Tale of Three Sisters* ties the family to "House Leum of Vikitsv (white rose crest)"; and the LOCATIONS Vikitsv key-locations entry places the town there. The lone Equateiy "Places" listing is the outlier — it only names Negiet as the origin of **Isenaylini Leum/Asleleri** (a House Leum woman), not as an Equateiy town, exactly what you'd expect for someone *from* Vikitsv. (Also closes the standing §1.G/§1.N cross-ref leaning toward Vikitsv.)  Source edit this implies (not yet applied): remove/correct the Negiet entry under Equateiy's "Places" on the LOCATIONS page — it belongs

under Vikitsv; optionally keep a note of Isenaylini's Vikitsv origin where she's referenced in the Asleleri context.

Civer — Status:  RESOLVED — city → realm (*FULL*) — (was  Needs Clarification)

- **Facts found:** Capital of Pireaynea (LOCATIONS, COUNTRIES & CAPITALS and Pireaynea write-up). "The Civer Civil War" is listed as a historical event (Academy course list). The Academy is placed "southwest of Civer" on the Minara's Era map even though Pireaynea was "renamed Lingia" — i.e., "Civer" persists as a place name across eras while the nation's name changes.
- **Questions/notes:**  Confirm whether "Civer" denotes only the city/capital, or also a later province/region name, once MAPS/LOCATIONS, TIMELINE, and ERA'S REFERENCE are read (this was your example entity — full cross-page sweep still pending).
-  **RESOLVED — Civer = city → realm (confirmed by Azora):** "Civer" denotes both, across eras. In **Solis's era** it is the **capital city of Pireaynea** (LOCATIONS "Pireaynea – Capital: Civer"; the Civil War Period map's  Canon: Pireaynea's capital is Civer"). By **Minara's era** the entire successor kingdom is renamed the **"Kingdom of Civer"** (Name Evolution Across Eras: "By Minara's Era it became the Kingdom of Civer"). This is the same city → kingdom promotion all six nations undergo — the CANON AUDIT tracking doc notes each Solis-era capital becomes its Minara-era kingdom name (Aicruae → Lajazer, Gherci → Tarmet, Pireaynea → Civer). So Civer persists across eras precisely because it graduates from capital city to realm name; the Academy "southwest of Civer" on the Minara map points to the Kingdom/city of Civer, and "The Civer Civil War" reads as a realm-scale event. No contradiction — no source fix strictly required; optionally annotate the LOCATIONS Civer reference to note its city → kingdom evolution.

Nedi Forest & Aslwal (Equateiy) — Status:  Consistent — Vandrea & Apharia Asleleri's refuge after fleeing Vikitsv (~7,213–7,212 BR); where Apharia met "Soli (Paxtino/Ekhasostio in mortal form)"; Aslwal is the nearby market town. *A Tale of Three Sisters*.

Torad & Silora Forest (Vikitsv) — Status:  Consistent — Torad governed by "City Lord Ceval Asleleri" (father of Enyokia, Vandrea, Apharia); targeted when "King

Solis ... began trying to conquer Vikitsv (~7,214 BR)." Silora Forest is the sisters' escape route and where Vandrea first hears Renedin's voice. *A Tale of Three Sisters*.

Esteraia — Status:  RESOLVED — small Nedi Forest town under Uada (*was*  Gap) — "Esteraia - A City" (Equateiy). Beyond this LOCATIONS line, the Civil War-period map does place it.

-  **RESOLVED** — **Esteraia = small Nedi Forest town under Uada (confirmed by Azora):** The full canon sweep found exactly two substantive mentions: the bare LOCATIONS line "Esteraia – A City," and the Civil War-period map, which places Esteraia in Equateiy's far-southwest **"Nedi Forest & the Vikitsv border"** region as **"a smaller town inside Uada"** (the same relationship Aslwal has to Uada), in the woodland "sloping toward the Vikitsv frontier" near the **Caduto** crossing into Vikitsv. No characters, houses, or events reference it. Defined as a small timber/woodland border town nested under Uada — not an independent city. **Source fix needed:** LOCATIONS currently reads "Esteraia – A City"; change it to match the map, e.g. "Esteraia – a small woodland town in the Nedi Forest, under Uada, near the Vikitsv border."

Vekit — Status:  RESOLVED — Torad-valley village under Junjeo (*was*  Gap) — "Vekit: - A Town" (Vikitsv). Beyond this line, the Civil War-period map places it.

-  **RESOLVED** — **Vekit = Torad-valley village under Junjeo (confirmed by Azora):** The full sweep found exactly two mentions: the bare LOCATIONS line "Vekit – A Town," and the Civil War-period map, which places Vekit in Vikitsv's **Torad valleys** region as **"a smaller town inside Junjeo."** Defined as a small mountain-valley village in **Torad's orbit** — set within the Asleleri family's home country (Torad is City Lord Ceval Asleleri's seat and the Asleleri sisters' home in *A Tale of Three Sisters*), giving Vekit a natural tie to that storyline. Fits the cold, blue-clad, Iswan-worshipping Vikitsv setting. No characters or events reference it yet. **Source fix needed:** annotate the LOCATIONS "Vekit – A Town" line with its placement — a valley village inside Junjeo, in the Torad valleys near Torad.

Greater Gherci, Mother's Hip, Beka (Tanya Beka), Malin, The Outer Walls — Status:  RESOLVED — all five Gherci places now settled (Greater Gherci, Mother's Hip, Beka/Tanya Beka, Malin, The Outer Walls); see the five  bullets below. (*Was*  Gap/Stub) — Gherci places with one line or less each. Beka is "a

hospital town created by Saint Duri"; Malin is "created in honor of Saint Malign, Saint Duri's long-time hero"; Mother's Hip has a header but no body.

- **✓ RESOLVED — Greater Gherci = the greater capital metropolitan district around Tarmet (confirmed by Azora):** The full sweep found only two mentions: the bare LOCATIONS flag line, and the Civil War-period map, which places it in the **capital core** — "Tarmet (capital) sits at the center of the continent, **ringed by Greater Gherci, the Outer Walls, Asmeta, Tanya Beka, and Mother's Hill.**" No house, character, or event names it directly. Defined as the **greater capital metropolitan district** — the wider urban sprawl wrapping Tarmet city proper, fitting Gherci's role as the holy heart of the world (capital draws pilgrims and nobility). Not an independent settlement; it's the metro region around the capital. **Source fix needed:** expand the LOCATIONS "Greater Gherci" stub to record this — the greater capital district sprawling around Tarmet, grouped with the Outer Walls in the capital core. *(Group heading stays 🟩 until Mother's Hip, Beka, Malin, and The Outer Walls are also settled.)*
- **✓ RESOLVED — Mother's Hip = a sacred memorial hill honoring Saint Duri, the Mother of Gherci (confirmed by Azora):** The full sweep found exactly two mentions: the bare LOCATIONS header (no body), and the Civil War-period map placing it in the **capital core** ring around Tarmet ("ringed by Greater Gherci, the Outer Walls, Asmeta, Tanya Beka, and Mother's Hill"). Defined as a **sacred memorial hill in the capital ring honoring Saint Duri** — the founder-saint repeatedly titled "the Mother of Gherci" (Religion / The Saints: "Duri, the Mother of Gherci, Duri the Wise, Queen of the People"). A memorial high ground in her honor, not her tomb (Duri is among the four saints buried in the Kingdom of the Gods). **Spelling settled:** "Mother's **Hip**" is intentional/canonical — NOT a typo. **Source fix needed:** (a) add a body to the LOCATIONS "Mother's Hip" header describing it as Saint Duri's memorial hill in the Tarmet capital ring; (b) correct the Civil War map's "Mother's **Hill**" → "Mother's **Hip**" to match the canonical spelling.
- **✓ RESOLVED — Beka = the hospital town; Tanya = Saint Duri's public-hospital institution (two linked things, confirmed by Azora):** The full sweep resolves both halves of the name. **Tanya** = the public-hospital institution founded by Saint Duri as one of her civic reforms in Gherci — KEY WORDS

AND TERMS: "Public hospitals, created by Saint Duri"; TIMELINE — Proposed Build: "Tanya's (public hospitals) & the first legal court... Among Duri's reforms in Gherci." **Beka** = the **hospital town** in Gherci's capital-core ring around Tarmet (Civil War-period map: "...Asmeta, **Tanya Beka**, and Mother's Hip — the whole kingdom radiates outward from this central heartland"). So "**Tanya Beka**" = the Tanya (public hospital) located at Beka — the town and the institution are distinct but linked, both rooted in Duri's "Queen of the People" welfare reforms. No characters or events reference them beyond this. **Source fix needed:** (a) give the LOCATIONS "Beka / Tanya Beka" entry a body — Beka = hospital town in the Tarmet capital ring; Tanya = Duri's public-hospital institution sited there; (b) ensure "Tanya" has its own KEY WORDS glossary entry as Duri's public-hospital reform (currently only a one-liner).

-  **RESOLVED — Malin = a Gherci capital-core town Saint Duri created in honor of Saint Malign, her hero (confirmed by Azora):** The full sweep ties the place to a documented Saint. **Malin** sits among Gherci's capital-core settlements near Tarmet (Civil War-period map, with Lendara and Treas), and was **created/named by Saint Duri in honor of Saint Malign** — the earlier Saint (9,323–9,305 BR, blessed by Finore) whom Duri revered as her lifelong hero. Confirmed from both sides: Religion says of the saint before her, "Saint Duri (the next saint) was obsessed with him and worshipped him"; Historical Figures carries his line in Duri's profile ("If you have no enemies, then you have no friends.' — Saint Malign"). Fits Duri's role as Gherci's founder-builder honoring her hero. **Spelling settled:** the town is "**Malin**" (no g) — **intentional**, named after but spelled differently from "**Saint Malign**" (NOT a typo). *(Note: a separate, already-logged Category 4 conflict covers Saint Malign's 10th-vs-9th ordinal — not part of this Malin item. Also note an unrelated reuse: a Crown of Glory character, Dahnyliein Catern, carries the code name "Malign" — flagged only to avoid cross-wiring.)* **Source fix needed:** give the LOCATIONS "Malin" entry a body — a Gherci capital-core town near Tarmet created by Saint Duri in honor of Saint Malign.
-  **RESOLVED — The Outer Walls = Saint Duri's ring of saint-statues encircling Gherci's capital, which are BOTH monuments AND real defensive walls (confirmed by Azora):** Canon explains them directly in Duri's profile on The Saints: "Duri believed highly in the gods and divine order in her city Gherci she had monuments of all the saints before her built. **Their statues stood all**

around the city, acting as walls, her statue was located in the center visibly smaller than the others." The Civil War-period map places "the Outer Walls" in Tarmet's capital ring ("Gherci, the Outer Walls, Asmeta, Tanya Beka, and Mother's Hip"). **Settled reading (Azora)**: The Outer Walls are the ring of monumental statues of all eleven saints before Duri, standing around the capital (Tarmet) with Duri's own deliberately-smaller statue at the center — and they function as **actual defensive fortifications too**, not just symbolic monuments (statues + real walls). Ties the whole Gherci cluster together as Duri's single monument-building program (Mother's Hip = her memorial hill; Malin = the town for her hero Saint Malign; The Outer Walls = the saint-statue ring with her humbly centered). **Source fix needed**: give the LOCATIONS "The Outer Walls" entry a body — Saint Duri's ring of saint-statues around Tarmet that serve as both monuments and the capital's defensive walls, her smaller statue at center.

Aryanara's Territory & Vekta's Territory — Status:  Consistent — eastern/northern Gherci lands tied to the "twin prophets" Aryanara and Vekta (teaching centers "around 14,300–14,200 BR"), "Protected by House Catern." (Cross-check the twin prophets + 14,300 BR dating against Religion + Timeline.)

G. Cross-reference pass — Locations entities vs other canon pages

Coverage for this pass: Historical Figures was only ~38% read this pass (opening family trees through the Vandrea entry, plus Saint Reron); the middle ~62% is UNREAD. In-Story Characters, Timeline, Maps/Locations, and the book-info pages are not yet read. Alias, capital, and era cross-checks below are flagged where they depend on unread pages.

Saint Duri & the Gherci founding date — Status:  RESOLVED (same item as §1.B Gherci) (*was*  *Conflict (cross-page)*) — Confirmed by Azora: founding moved to **~8,700 BR**, inside Duri's 8,747–8,670 lifespan, with Duri kept as founder. Original analysis retained below. — Religion's Saint entry gives Duri "Birth: 8,747 BR ... Death: 8,670 BR (aged 77-longest-living saint)." Both LOCATIONS founding dates

fall OUTSIDE that lifespan: 8,763 BR is 16 years before her birth; 8,663 BR is 7 years after her death. Religion also says the twins' lands were "incorporated into Gherci by Saint Duri in 8,763 BR" — matching one LOCATIONS date but still impossible against her stated birth year. No stated founding date is chronologically possible as written. (Sources: Religion — Saint Duri entry + Aryanara/Vekta section; LOCATIONS — Gherci write-ups.)

Aryanara & Vekta (twin prophets) — Status:  RESOLVED — spelling settled: canonical name is **Vekta** (was  Conflict (spelling), otherwise  confirmed) — LOCATIONS' "twin prophets" and "Protected by House Catern" are corroborated by Religion ("House Catern's Sacred Role," Archduke rank) and the ~14,300–14,200 BR dating matches; Religion dates the Circle's formal founding to 14,271 BR. BUT the name is spelled "Vekta" in Religion's twin-prophets and House Catern sections and "Veketa" in its Circle-of-Eternal-Light founding line ("founded by Aryanara and Veketa, twin sisters").

-  **RESOLVED — canonical spelling is "Vekta" (confirmed by Azora):** The sweep is lopsided: **"Vekta"** holds every authoritative slot — TIMELINE ("the Circle of Eternal Light is formally founded by Aryanara and Vekta"), TIMELINE — Proposed Build, Magic System ("Vekta and Aryanara, the great scholars... discovered Ilkai"), Historical Figures ("Vekta was one of the twin prophets who co-founded the Circle"), House Catern ("the territories of Aryanara and Vekta"), the Civil War-period map ("Vekta's territory, Aryanara's territory"), AND the Religion page's own twin-prophets + House Catern sections.

"Veketa" appears exactly once — a transposed-vowel variant (Vek-ta → Vek-e-ta) in Religion's lone Circle-of-Eternal-Light founding line ("founded by Aryanara and Veketa, twin sisters"). Same profile as the Pireaynea typo.

Settled: "Vekta" is canon; "Veketa" is the typo to fix. (Also closes the matching §2.B Historical-Figures spelling flag for the same pair.) **Source fix needed:** change the single "Veketa" → "Vekta" in the Religion page's Circle-of-Eternal-Light founding sentence.

Pireaynea — religion — Status:  RESOLVED — monotheist (Allan only); Pireaynea removed from the Circle's member list (was  Conflict (cross-page)) — LOCATIONS: "the monotheistic Pireayena worship" of Allan only. Religion: "Countries That Follow This Religion: Aicruae, Gherci, Pireaynea, and Coelum" under the polytheistic Circle of Eternal Light. Monotheism-of-Allan vs Circle

membership disagree. (Sources: LOCATIONS — Pireaynea flag; Religion — Circle of Eternal Light.)

- **✓ RESOLVED — Pireaynea is monotheist, Allan only (confirmed by Azora):** LOCATIONS wins — Pireaynea practices "the monotheistic Pireayena worship" of **Allan only** and is **NOT** a member of the polytheistic Circle of Eternal Light. The Religion page's member list ("Aicruae, Gherci, Pireaynea, and Coelum") is over-broad and should drop Pireaynea. This fits the nation's outsider framing — epithet "The Demon's Pit," its own crude language (Pocorki), and its founding by the Gherci exile Deasn — a breakaway state that narrowed worship to a single deity (Allan, who is herself one of the Circle's 12 New Gods, the goddess of nature) rather than the Circle's full old+new pantheon. **Source fix needed:** remove "Pireaynea" from the Religion page's "Countries That Follow This Religion: Aicruae, Gherci, Pireaynea, and Coelum" line under the Circle of Eternal Light. *(Note: the identical Coelum case — "atheistic" in LOCATIONS vs listed as a Circle nation in Religion — is the next §1.G item, still open.)*

Coelum — religion — Status: **✓ RESOLVED** — once followed the Circle, now atheistic; the Circle country list reads as historical/legacy (was **✗ Conflict** (internal to Religion; LOCATIONS agrees on atheism)) — LOCATIONS: "mostly atheistic." Religion says both "Coelum stands as the only known atheistic society on the continent" AND lists Coelum among the Circle of Eternal Light's countries. Religion contradicts itself; LOCATIONS sides with atheism.

- **✓ RESOLVED — Coelum once followed the Circle, now atheistic; the country list is historical/legacy (confirmed by Azora):** The atheism is canon and triple-attested — LOCATIONS: "Mostly atheist (people feel abandoned by gods)"; and Religion's own dedicated anomaly section: "Coelum stands as the only known atheistic society on the continent," its atheism "born of despair" after "plagues, famines, and abandonment by its ruling class." The reconciliation comes from that same section: "Coelum may have once followed the Pantheon (perhaps under Yuavekio they nominally worshiped like Gherci), but over time shrines fell into disuse." So Coelum is **not a current Circle of Eternal Light nation** — it once was, then lapsed into atheism. The Religion page's "Countries That Follow This Religion: Aicruae, Gherci, Pireaynea, and Coelum" line therefore reads as a **historical/legacy** roster, not

present-day practice. **Source fix needed:** on the Religion page's Circle "Countries That Follow This Religion" line, mark Coelum as a former/lapsed member (turned atheistic) rather than a present follower — e.g. drop it from the present-tense list and note its lapse. ⚠ Consequence: with Coelum reframed as historical and Pireaynea removed in the prior §1.G item, the Circle's present-day state-faith nations are just **Aicruae and Gherci**.

Pireaynea — founding — Status:  **RESOLVED** — Deasn unified the four pre-existing territories; founding dated 7,400 BR (was  Needs clarification) — LOCATIONS: "Founded: 7,200 BR Founder: Deasn of Gherci." Religion: the "Four Territories (Aseraga, Baeistic, Urdeio, or Feacener) that would form Pireayena." Unclear whether Deasn unified pre-existing territories or these are competing origin accounts.

-  **RESOLVED — Deasn unified the four pre-existing territories into Pireaynea; not competing origin accounts (confirmed by Azora):** The "Four Territories" predate Deasn by roughly two thousand years and were consolidated by him into the nation — they are a sequence, not rival accounts. Religion (Saint Karniode's entry) gives her "Origin: Unknown village, possibly one of the Four Territories (Aseraga, Baeistic, Urdeio, or Feacener) **that would form Pireayena,**" and Karniode lived **9,365–9,351 BR** — so those four lands already existed as distinct places in the ~9,300s BR. Deasn founds the unified kingdom far later: LOCATIONS "Founded: 7,200 BR — Founder: Deasn of Gherci" (a Gherci exile, "only 17 when he founded the country"). The future-tense phrasing "that would form Pireayena" is the tell — the territories came first, then Deasn unified/founded them into Pireaynea. (Sources: Religion — Saint Karniode; LOCATIONS — Pireaynea write-up.) ⚠ Open sub-facet (next): the founding **year** disagrees — LOCATIONS says 7,200 BR, but the Six Kingdoms map and Inferred Canon Fixes both say 7,400 BR; settling that date is the next step on this item.
-  **RESOLVED — founding date is 7,400 BR (confirmed by Azora):** The **7,400 BR** date is canon; the LOCATIONS "7,200 BR" is the lone outlier (a likely transposed/dropped digit). Two independent sources give 7,400 BR — the Six Kingdoms map ("Canon confirms Pireaynea was founded in **7,400 BR** by Deasn of Gherci") and the Inferred Canon Fixes ("Five kingdoms exist by 7,945 BR; the sixth (Pireaynea) only at **7,400 BR**"). It also slots cleanly into the WWG

15-era framework, whose **Pre-Unification era runs 7,400–7,250 BR** — i.e. Pireaynea's founding marks the very start of that era, the last of the six nations to form. Deasn-as-unifier (resolved above) is unchanged; only the year moves from 7,200 → 7,400 BR. **Source fix needed:** change LOCATIONS' Pireaynea "Founded: 7,200 BR" → "7,400 BR" (the maps + Inferred Canon Fixes already read 7,400 BR).

Vikitsv / Vikistv spelling — Status:  RESOLVED (same item as §1.B Vikitsv) — canonical spelling is "Vikitsv" (t-before-s), confirmed by Azora; this cross-page pass only adds that the Religion-page "Vikistv" instances join the §1.B source-fix list (was  Conflict (confirmed cross-page)) — the "Vikistv" spelling also appears on the Religion page ("a high mountain country called Vikistv"; "the fall of Vikistv"), reinforcing that both spellings are in active use beyond LOCATIONS.

Magic Tower leadership / Sevtor / Liaerto — Status:  RESOLVED (same item as §1.B Vikitsv leadership) — canon lineage is Verna → Liaerto I → Ulian → Kiear & Liaerto III → Sevtor (confirmed by Azora); the LOCATIONS "current Grand Sorcerer is the child of Kiear" phrasing is the outlier to rewrite (was  Conflict (cross-page leans toward the Sevtor version)) — Historical Figures: "Grand Sorcerer Sevtor of House Orana ... Direct descendant of Verna's eldest son, Liaerto I," whose attack on Valea "killed 15,000," with only "Mekean escaped ... continuing the line that eventually produces Merigen Bleelack." This matches the LOCATIONS "Sevtor / Liaerto I / 15,000 / Mekean → Merigen Bleelack" account and conflicts with the LOCATIONS "Ulian and his sons Kiear and Liaerto III; current Grand Sorcerer is the child of Kiear" account, which now looks like the outlier. (Still verify against the unread 62% of Historical Figures.)

Soli vs Emperor Solis (Café Iri, Academy professor) — Status:  Confirmed distinct — LOCATIONS' "the god Soli" (Café Iri) and "Professor Leranoan Gevhilem ... secretly Soli" are corroborated by Religion ("Professor Leranoan Gevhilem is Soli") and Historical Figures ("'Soli' is NOT the same person as Emperor Solis Elias Patton"). Café Iri's "Lady Zani ... the goddess Zopha ... to look after her son, the god Soli" aligns with Religion: Zopha is the mother of the twin gods (Paxtino/Ekhasostio = Soli).

The Cidet — Status:  Confirmed / expanded — Religion confirms Solis "attacked the Cidet ... during Year Three," and adds "9 million pilgrims yearly," "the Hall of Twelve, the Room of Glory, and the Hero's Hall." Historical Figures

names the governing council "the Danepelie (the council of senior priests governing the Cidet)" — LOCATIONS only said "council of priests."

Mystic Isles world doors / The Gate — Status:  Confirmed (one nuance) — Religion (Vandrea's timeline) confirms she "corrupt[ed] the world doors on Mystic Isles," trapping the gods and unleashing demons — matching LOCATIONS' "The Gate ... corrupted world doors that Vandrea damaged." Nuance: LOCATIONS states the "two gates of the twin gods" as fact; Religion calls the twins guarding the gates "a religious legend mortals created."

Solis's coup (~7,241 BR) — Status:  Supported — Historical Figures dates Lady Emillea Hige's death (forced to "drink poison during his half-siblings' coup") to 7,241 BR, supporting the LOCATIONS coup date. (Religion separately dates Solis's Mystic Isles divine pledge to ~7,234 BR, i.e. during the later exile.)

Equateiy / House Kivier — Status:  Confirmed — Historical Figures' "Duke Reasaec Kivier of Equateiy" corroborates LOCATIONS' "unofficial oligarchy ruled by House Kivier."

Negiet / House Leum — Status:  Resolved toward Vikitsv — House Leum's own page lists "Origin: Vikitsv" and "Seat: Negiet, Vikitsv," matching the LOCATIONS Vikitsv placement and the Asleleri sisters' Vikitsv origin. The Equateiy "Places" listing of Negiet is the outlier.

Solis's alias ("Jonathan Kiva" / "Janrano Kiva") — Status:  RESOLVED (same item as §1.D Mystic Isles) (*was*  *Open*) — Confirmed by Azora: canonical spelling is "**Janrano Kiva**"; the "Jonathan Kiva" instances are the variants to fix.

2. HISTORICAL FIGURES

Subpage inventory: Historical Figures (Historical Figures) is one long page — **894 lines, now read in FULL**. It ends with a single embedded child subpage *a/so* titled "Historical Figures" (a likely duplicate) that has **not** been opened yet.

Coverage: page read in **FULL**. Entries whose confirmation depends on a still-unread page (TIMELINE, IN STORY CHARACTERS, the book-info pages) are marked ⌚.

A. House Patton royal line (two family trees + twelve profiles)

The page opens with two trees — "1st Generation ... 8,759 BR–8,409 BR" and "2nd Generation ... 7,400 BR–7,163 BR" — then twelve full ruler profiles. Parentage and the founder → Solis descent are internally consistent. The date/spelling problems:

King Hailour / Haliour Layern Patton I (founder) — Status: ☒ RESOLVED — canonical spelling is "Haliour" (was ☒ Consistent · ☒ name spelling) (*FULL*)

- **Facts:** Born 8,789 BR, died 8,736 BR ("died at only 53"); "Founded the Kingdom of Aicruae at age 30" → 8,759 BR, matching LOCATIONS ("Founded: 8,759 BR Founder: King Hailour Layern Patton I"). Bastard servant; vision from the sun-god **Razar**; built Lajazer; founded House Arvento for Lenkitta Arvento in 8,746 BR.
- **Conflict (spelling):** his own profile alternates "**Hailour**" (IDENTITY/bio) and "**Haliour**" (family tree #3 and title line); LOCATIONS uses "Hailour."
- ☒ **RESOLVED — canonical spelling is "Haliour" (confirmed by Azora):** The sweep is lopsided toward "**Haliour**" (li-before-o): it holds the reference/meta docs — TIMELINE, KEY WORDS AND TERMS ("Founded by King Haliour Layern Patton I"), and Inferred Canon Fixes ("founded by Haliour Layern Patton I in 8,759 BR") — plus House Patton (throughout), House Arvento, House Mena, House Caraen (for Patton II), the Historical Figures family tree + title line, and the duplicate HF subpage. "**Hailour**" (ai-before-l) is the variant, confined to the two structured "Founder:" fields (LOCATIONS and the Six Kingdoms map), the Historical Figures main prose bio, and Aicruae Funeral Traditions. Same profile as the Vekta/Pireaynea typos — the variant clusters in a few prose/identity slots while the dominant form holds the reference spine. (Applies to King Haliour Layern Patton II as well, already spelled "Haliour.")

Source fix needed: change "Hailour" → "Haliour" in the LOCATIONS Founder field, the Six Kingdoms map Founder field, the Historical Figures main bio/IDENTITY section, and Aicruae Funeral Traditions.

- **Note:** the page itself flags ? "whether Dures surrendered willingly or was defeated in battle is somewhat ambiguous."

King Sayero Walica Patton — Status:  RESOLVED — canon dates are 8,608–8,533 BR (was  Conflict (dates)) (*FULL*)

- "King Sayero Walica Patton (**8,608 BR – 8,533 BR**)" (family tree #27) vs "King Sayero Walica Patton (**8,615 BR - 8,540 BR**)" — the latter stated twice, in Queen Walica's LEGACY and in King Hailour I's Monuments. Two birth/death pairs, 7 years apart.
-  **RESOLVED** — canon dates are 8,608–8,533 BR (confirmed by Azora): Both the source weight and the father-son chronology point to **8,608–8,533 BR** (a 75-year lifespan). Sources: the Historical Figures **family tree #27**, **House Patton** ("8,608 BR – 8,533 BR... Died at 75"), and the **TIMELINE — Proposed Build** primary row all use it. Decisive tie-breaker: Sayero is "Son of King Viake Recreation Patton" (Viake b. **8,629 BR**, verified consistent) — so a birth in 8,608 BR makes Viake **21** at his heir's birth (natural), whereas 8,615 BR would make him only **14** (implausible for a king fathering an heir). The **8,615–8,540** pair is the slip, confined to two Historical Figures prose asides (Queen Walica's LEGACY + King Haliour I's Monuments) — the TIMELINE — Proposed Build even flags it ("Walica's profile cites 8,615–8,540"). His wife Queen Cecea Sanitte (8,618–8,545) fits either reading. **Source fix needed:** change the two "8,615 BR – 8,540 BR" prose mentions on Historical Figures (LEGACY + Monuments sections) → "8,608 BR – 8,533 BR."

Princess Karinoa Nalia Patton — Status:  RESOLVED — canon death year is 8,561 BR (was  Conflict (death year)) (*FULL*)

- Header + tree: "Born 8,611 BR, **Died 8,561 BR**" (DATES & ERA; family tree #26). LEGACY: "Her peaceful death in **8,570 BR**, before her parents died in a suspicious fire (8,552 BR)." 8,561 vs 8,570.
-  **RESOLVED** — canon death year is 8,561 BR (confirmed by Azora): Birth is agreed at 8,611 BR; the death year is **8,561 BR**. It carries the source weight — Historical Figures header/tree (#26), **House Patton** ("8,611 BR – 8,561 BR...

Died at 50"), and the **TIMELINE — Proposed Build** row all use it — and it's the only value consistent with her stated age at death: $8,611 - 8,561 = 50$ ✓ ("Died at 50"), whereas 8,570 BR would make her only **41** ✗. The **8,570 BR** figure lives in exactly one place, the Historical Figures **LEGACY** aside ("Her peaceful death in 8,570 BR"), and is the slip. (Both dates fall before her parents' 8,552 BR fire, so that detail doesn't distinguish them.) **Source fix needed:** change the Historical Figures **LEGACY** "8,570 BR" → "8,561 BR."

Queen Isalian Liazen & her sister Agari — Status: ✓ Agari's age **RESOLVED** (~3, 8,663–8,660 BR) · ✓ **RESOLVED** — parents died 8,660 BR (*FULL*)

- Agari's age at death is given **three** ways: family tree #15 "Agari Liazen (**8,663 BR - 8,660 BR**)" (~3 yrs); Isalian's bio "Agari Liazen ... passed away from illness **before the age of two**"; the song *The Ashes of Liazen* calls her a "**three-year-old** sister."
- ✓ **Agari's age RESOLVED — ~3 years old (8,663–8,660 BR) (confirmed by Azora):** Her birth/death dates are agreed everywhere — the Historical Figures family tree (#15), House Patton, and **TIMELINE — Proposed Build** all give "8,663 BR – 8,660 BR," a ~3-year span. Three independent sources converge on **~3**: the dates themselves ($8,663 - 8,660 = 3$), House Patton ("Died in infancy at **age 3**"), and the song *The Ashes of Liazen* ("a **three-year-old** sister"). The lone outlier is Isalian's bio phrase "passed away from illness **before the age of two**" — irreconcilable with the agreed span (a child born 8,663 and dead by 8,660 is ~3, never under 2). **Source fix needed:** change Isalian's bio "before the age of two" → "around age three" on Historical Figures. (*Parents' death-year sub-issue still open — see below.*)
- Isalian's parents (Lady Naern Mena, Count Jinegi Liazen) both die "**8,660 BR**" in the tree (#9, #14), but Isalian's bio says they "were killed in a territorial dispute" dated "**8,662 BR**."
- ✓ **RESOLVED — parents died 8,660 BR (confirmed by Azora):** Lady Naern Mena and Count Jinegi Liazen both died in **8,660 BR**. Three independent structural sources agree — the Historical Figures family tree (#9 Jinegi, #14 Naern), House Patton, and House Mena ("Lady Naern Mena (8,716 BR – 8,660 BR)") — and it matches their daughter Agari's death the same year (8,660), so the whole family is lost together. The lone outlier is Isalian's bio's "8,662 BR" — the same bio already corrected on Agari's age, confirming it's the unreliable

source for this family. **Source fixes needed (both on Isalian's bio, Historical Figures):** (1) change the parents' "killed in a territorial dispute ... 8,662 BR" → "8,660 BR"; (2) because the parents now die when Isalian (b. 8,670) was 10, change her "fled at eight years of age" → "fled at ten" (or reframe so her flight follows the 8,660 tragedy). All other Isalian dates stand (8,670–8,590; rose-crown tournament 8,658, Haliour 14 / Isalian 12).

- Otherwise ☒: Isalian 8,670–8,590; "fled at eight years of age" in 8,662 (8 ✓); rose-crown tournament 8,658 with "Haliour ... fourteen ... Isalian ... twelve" (✓ vs birth years).

Queen Walica Kevena Patton — Status: ☒ RESOLVED — regency was 6 years, 8,736–8,730 BR (*FULL*)

- Regent "for **six years** until he officially took full power at the age of **24**" (→ 8,730 BR) but the LEGACY parenthetical says "Walica's regency (**8,736 BR – 8,731 BR**)" (5 years, to age 23).
- ☒ **RESOLVED — regency was 6 years (8,736–8,730 BR); Benjaïen took full power at 24 (confirmed by Azora):** Queen Walica Kevena Patton (8,779–8,709 BR) ruled as regent for her son King Benjaïen Nefest Patton (b. 8,754 BR) from 8,736 BR until he officially took full power at age 24 in 8,730 BR — a six-year regency. The "six years / age 24" prose framing is canon; the LEGACY parenthetical "(8,736 BR – 8,731 BR)" (5 years, to age 23) is the slip. Both agree the regency began in 8,736 BR; only the end-year moves, 8,731 → 8,730 BR. **Source fix needed:** change the Historical Figures LEGACY parenthetical "Walica's regency (8,736 BR – 8,731 BR)" → "(8,736 BR – 8,730 BR)."

The other eight profiles — Status: ☒ Consistent (*FULL*) — Vala, Cawiloan, Rayaliem, Benjaïen, Ilaem I, Haliour II, Teravian, and Viake all reconcile on internal ages/spans (e.g. Benjaïen 8,754–8,674 = "80 years," widower "≈41 years"; Rayaliem b.7,402 d.7,370 = "age 32"; Viake b.8,629 d.8,552, Massacre of Light 8,558 "when Viake was 71"). Viake's **Massacre of Light** (90,000 Order of the Pure Ones, 8,558 BR) matches LOCATIONS.

- **Cross-page note:** the Massacre of Light, Lady Emillea Hige's death (7,241 BR coup), Civil War Year Five = 7,217 BR, Sevtor/Valea/15,000, and House Kivier/Equateiy all match the LOCATIONS findings in §1.G.

B. Aryanara & Vekta (twin prophets) — Status: RESOLVED — spelling settled (Vekta is canon; see §1.G) (FULL)

Profiles here confirm "co-founded the Circle of Eternal Light in 14,271 BR," the "~14,300–~14,200 BR" dating, and lands "incorporated into Gherci by Saint Duri in 8,763 BR ... protected by House Catern." Spelled "**Vekta**" here. The 8,763 date feeds the Duri conflict below.

C. The Thirteen Saints

Twelve full Saint profiles appear (Aliirusk #1 → Reron #12) in correct chronological order (18,765 BR → 7,402 BR). Most are internally consistent; the recurring weakness is blank "Name Meaning: [TBD]," "Ethnicity: [TBD]," "Appearance: [TBD]" fields throughout.

Saint Duri (#11) — Status:  RESOLVED — same item as §1.B Gherci founding (~8,700 BR) (FULL)

- This page states both "Born: **8,747 BR** ... Died: **8,670 BR** (77 years)" AND "Founded the Kingdom of Gherci ... in **8,763 BR**" — founding Gherci 16 years before her own birth. The Aryanara/Vekta entries on the same page repeat "incorporated into Gherci by Saint Duri in 8,763 BR." So the impossible date flagged in §1.G is not only a Locations-vs-Religion clash — **Historical Figures contradicts itself**, while agreeing with Religion's 8,747/8,670 lifespan. Her birth/death years or the 8,763 BR founding must move.
-  **RESOLVED — same item as §1.B (confirmed by Azora):** This is the same founding-date problem already settled in §1.B Gherci — the founding moves to **~8,700 BR** (a year inside Duri's 8,747–8,670 BR lifespan), with Duri kept as founder. That fix resolves the internal Historical Figures contradiction here too: her 8,747/8,670 lifespan stands, and the impossible "8,763 BR" founding (plus the matching "incorporated into Gherci by Saint Duri in 8,763 BR" in the Aryanara/Vekta entries) corrects to ~8,700 BR. No separate decision needed. (Tally unchanged — counted once under §1.B.)

Saint Harnua (the 13th Saint) — Status:  RESOLVED — identity confirmed = Harnua Kulio (profile exists on House Kulio) (FULL)

- Named only in passing — Reron's "infamy is second only to **Saint Harnua (the 13th Saint)**," and the Civil-War figures cite "Esterica's death by **Harnua's**

poison." No DATES/IDENTITY/profile block exists, despite being framed as the most infamous Saint and an active poisoner in Solis's era. **?** Is this the same "Harnua" as the "Mihel/Harnua Kulio" referenced in LOCATIONS? Needs In-Story Characters.

- **✓ RESOLVED — identity confirmed = Harnua Kulio (confirmed by Azora):**
The "Saint Harnua" referenced in passing here IS **Harnua Kulio**, who has a full profile on House Kulio: "Harnua Kulio (7,251 BR – executed 7,214 BR)... Thirteenth Saint... Full sister to Mihel, half-sister to Esterica." Every passing reference matches — she poisoned Solis's cup with **Ilkai** (a god-killing herb), Esterica drank from it and died, and Harnua was burned at the stake. So the **?** ("same person as Mihel/Harnua Kulio?") is answered **yes**, and this is not a true gap — it's a missing profile block. **Source fix needed:** add a proper Saint Harnua / Harnua Kulio profile block to the Historical Figures / The Saints "Thirteen Saints" section, drawn from House Kulio (dates 7,251 BR – executed 7,214 BR; full sister to Mihel; half-sister to Esterica; Ilkai poisoning; burned at the stake). *(Separate open item: the infamy-ranking reversal — House Kulio "second only to Reron" vs Historical Figures "second only to Harnua" — is logged under §3.D and handled on its own.)*

Saint Reron (#12) — Status: **✓ RESOLVED** — internally consistent; hidden child is an intentional dangling thread (*FULL*)

- "Ender of Worlds," blessed by Vapaz, Battle of Relirian 7,402 BR. His "youngest child, hidden in Equateiy and never seen again" is an explicit open narrative thread. (Cross-ref LOCATIONS Battle of Relirian pending TIMELINE.)
- **✓ RESOLVED — intentional dangling thread (confirmed by Azora):** Saint Reron's profile is internally consistent; the only flag was his "youngest child, hidden in Equateiy and never seen again." Canon is silent on the child's fate by design — Azora confirms this is an **intentional dangling narrative thread**, left open on purpose. No fix needed and nothing to develop; logged as a deliberate loose end.

D. Civil War / Solisian-era figures — Status: **✓ largely consistent (*FULL*)**

- **Emperor Maen Patton:** 7,217 BR–7,140 BR (77); "Born during Civil War Year Five"; inherited at 54 in 7,163 BR; "ruled for 23 years" — all internally

consistent and matching LOCATIONS' Year Five = 7,217 BR and Solis's death 7,163 BR.  minor: the profile lists his "Spouse(s): Three wives (names TBD)" though the family tree names all three (Empresses **Saiye, Tenami, Kesdeivoa**).

-  **RESOLVED — Maen's three wives are Empresses Saiye, Tenami, and Kesdeivoa (confirmed by Azora):** The names were never missing — the family tree on the same page already lists all three. Fill Emperor Maen's profile "Spouse(s): Three wives (names TBD)" with **Saiye, Tenami, and Kesdeivoa**. (Note: Vandrea's mother "Tenami" and stepmother "Saiye" reuse two of these names a generation later — name-reuse, not the same people.) **Source fix needed:** replace "Three wives (names TBD)" in Maen's Spouse(s) field with the three named empresses from the family tree.
- **Princess Coyre Patton:** mother Esterica "death by Harnua's poison" ~7,214 BR; married Duke Shaniser Dajanyi → Emperor Elleinaj Patton I.
- **Queen Consort Tixsei Yurea:** Solis's second wife after Esterica; daughter of Jaifey Yurea (Solis's military advisor).
- **Grand Sorcerer Sevtor of House Orana:** confirms the "descendant of Liaerto I / attacked Valea / killed 15,000 / only Mekean escaped → Merigen Bleelack" version — i.e. the LOCATIONS "Ulian/Kiear/Liaerto III" account is the outlier. Children: Cequailian (betrothed to Iris), Maeret, Mekean.
- **Duke Reasaec Kivier of Equateiy:** financed Orcus; beheaded at sea by Solis; note "written in **Ananara**."
- **Princess Kamerida Mava of Gherci:** assassinated by Iris in Year Four (7,218 BR); her death ("**The Fight of Blood**") converted Gherci into Solis's ally.
- **Emperor Solis Elias Patton:** brief entry; "died at age 87 with four children"; empire renamed "Solisian Empire" by Maen.  explicit disambiguation: "Solis Elias Patton is **NOT** the same person as 'Soli'."
- **Soli (mortal form of Ekhasostio/Paxtino):** god-in-disguise during *A Tale of Three Sisters* (~7,200–7,100 BR);  matches Religion + LOCATIONS Café Iri.
-  **Empress Esterica Kulio** has no profile here (referenced only; deferred to In-Story Characters).
-  **RESOLVED — profile exists on House Kulio (confirmed by Azora):** Esterica is not actually undocumented — House Kulio carries her full profile ("Esterica

Kulio, 7,248 BR – 7,214 BR... died six months after giving birth to Coyre... 'Mother of a Dynasty'; children Maen 7,217 and Coyre 7,214). Resolved via §3.D; her record simply lives on the House page rather than in Historical Figures. **Optional source fix:** add a short Esterica entry or cross-link to House Kulio in the Historical Figures Civil-War section. (*Tally unchanged — resolution points to the §3.D House Kulio profile.*)

E. Vandrea of Torad — Status: **RESOLVED** — chronology settled (was **major chronology question**) (FULL)

- **Facts:** b. ~7,236 BR in Torad, Vikistv; "approximately 22 years old at fall of Vikistv" (~7,214 BR ✓). Father City Lord Ceval; sisters Enyokia (~7,239–~7,211) and Apharia (~7,233–~7,100); fiancé Heian Orana "killed alongside House Orana by Solis" (✓ vs the Sevtor entry). Deal with **Renedin** (imprisoned Old God of Dreams) grants immortality/shapeshifting; later "The Wise Woman," then "Empress Macenja Loraonmenti Patton," killed ~2,652 AR. Corrupts the Mystic Isles world doors (✓ §1.G).
-  **Lifespan problem:** Vandrea is born ~7,236 BR but does not gain immortality until "~7,100 BR" (after Apharia's death) — ~136 years as an ordinary mortal. Likewise Apharia is dated "~7,233 BR – ~7,100 BR" (~133 years) and bears an infant daughter just before dying ~7,100. The page never explains how the mortal sisters live 130+ years; either the ~7,100 BR dates or the birth years need revisiting.
-  **RESOLVED — compress the dates; the "~7,100 BR" endpoints are the slip (confirmed by Azora):** Vandrea and Apharia weren't 130-year mortals — the "~7,100 BR" death/immortality dates drifted ≈100 years too late and should pull back into the **~7,200s**, right after the *Three Sisters* arc (dated ~7,214–7,208 BR in the *Crown of Glory* book info; the flight runs ~7,213–7,211 BR). Soft target: **Apharia ~7,233 – ~7,200 BR** (dies ≈age 33, bearing Soli's child early in Soli's own ~7,200–7,100 mortal span), and **Vandrea gains immortality ~7,200 BR** (≈age 36), not ~7,100. Vandrea's birth (~7,236, anchored by ≈22 at the fall of Vikistv ~7,214) and her immortal death (~2,652 AR) both stand — only the two ~7,100 BR events move. (*Exact landing year is a soft placeholder — sharpen anytime.*) **Source fixes needed:** on Historical Figures, change Apharia's "~7,233 BR – ~7,100 BR" → "~7,233 – ~7,200 BR" and Vandrea's immortality

date "~7,100 BR" → "~7,200 BR"; re-check any reference to Apharia's infant daughter's birth year against the new ~7,200 date.

- **?** "Total Lifespan: **Over 10,000 years**" vs the stated endpoints ~7,236 BR → ~2,652 AR (≈ 9,888 years) — "10,000" looks like thematic rounding; confirm.
 - **✓ RESOLVED — thematic rounding; soften the wording (confirmed by Azora):** Keep the dates — Vandrea's stated span (~7,236 BR → ~2,652 AR) is ≈**9,888 years**, and "Over 10,000 years" is a dramatic flourish, not a literal count. Soften the phrase to fit the math — e.g. "**nearly 10,000 years**" or "**~9,900 years.**" (Rejected alternative: pushing her birth back to ~7,348 BR to literally clear 10,000 — that breaks the "~22 at the fall of Vikitsv ~7,214" anchor, so the dates stand and only the wording changes.) **Source fix needed:** on Historical Figures, change Vandrea's "Total Lifespan: Over 10,000 years" → "nearly 10,000 years" (or "~9,900 years"). *(With this, §2.E Vandrea is fully resolved.)*
 - **Note (name reuse, not a conflict):** Vandrea's mother "**Tenami**" and stepmother "Madame **Saiye**" share names with Emperor Maen's wives "Empress Tenami" / "Empress Saiye" — flagged only to prevent future cross-wiring.
-

3. NOBLE HOUSES

Subpage inventory: The Noble Houses hub ([Noble Houses](#)) lists **62 house subpages** plus one "**Noble Houses across the Eras**" page. The separate canon pages **Noble House Crests** and the **WWG → NOBLE HOUSES** branch are not part of this hub and remain pending.

Coverage this pass (Batch 1): all **61** house pages read in **FULL** — Batch 1: House Patton, House Vika, House Hige, House Kulio, House Orana, House Mava, House Kivier; Batch 2: House Leum, House Arvento, House Caraen, House Liazen, House Mena; Batch 3: House Vemer, House Aedria, House Yurea, House Najil, House Dajanyi, House Leva (prioritized because they drive Categories 1–2); Batch 4 (faction/stub sweep): House Catern, House Baliva, House Toallu, House Navefa, House Miaran, House Iriandet; Batch 5: House Anasetanya, House Veir, House Rendenten, House Dasbe, House Kifan, House Jivaya; Batch 6: Tikan, Anaiopana, Hert, Cowsrer, Gaset, Yainaro, Kauliv, Amecken, Miada, Kilina, Dai, Yailk, Brumik, Malrancis, Iarnailo, Pontia; Batch 7 (final 15): Renalagardo, Renililas, Qari, Imbrer, Ganane, Schmidtavaca, Balewer, Ashonve, Uaver, Vesmen, Maro, Reidskelisia, Adiye, Ochanan, Tazem. (The hub's "62 subpages" counted the "across the Eras" index as a house; there are **61** actual houses plus that index, and the roster independently lists exactly 61.) The "across the Eras" master roster is read; its **3 era subpages** (Solis +18 / Crandona +21 / Minara +15 houses) and the **Noble House Crests** gallery are now **read in FULL**. The **WWG → NOBLE HOUSES** dossier-hub **index** is read, but its **~114 individual house dossiers** have now been **sampled in full** — 15 of 114 opened (all 9 A-section dossiers plus Patton, Vika, Caraen, Kulio, Dajanyi, Malrancis), and **every one is an identical blank template** with no filled fields. The hub is an **unfilled scaffold**; the remaining ~99 were not opened individually but are almost certainly empty. Branch coverage is **PARTIAL** (15/114 verified blank). Findings are cross-checked against LOCATIONS and Historical Figures; checks against Religion, Timeline, In-Story Characters, and the book-info pages remain pending.

Resolved this pass: two standing §2 items — **Esterica Kulio** now has a full profile (House Kulio), and **Saint Harnua's identity** is confirmed (= Harnua Kulio, the 13th Saint). See D below.

A. House Patton — Royal/Imperial family (*FULL*)

The dynasty's own page. The chain founder → Solis → Maen/Coyre → Elleinaj is internally coherent, but several dates clash with Historical Figures and one is internally broken.

Founder's name —  RESOLVED (same item as §2.A — canonical spelling is "Haliour") — spelled "**Haliour Layern Patton I**" throughout House Patton, but Historical Figures' bio uses "**Hailour**" (its tree uses "Haliour") and LOCATIONS uses "**Hailour**." Founding facts agree: born 8,789 BR, founded Aicruae at 30 = 8,759 BR, died at 53 = 8,736 BR.

Solis's birth & death —  now anchored — Maen "inherited the throne at fifty-four when his father finally died at eighty-seven" → Solis died 7,163 BR, born **7,250 BR**, matching House Hige's explicit "7,250 BR — Solis is born."

The coup vs. the Civil War (~20-year gap) —  RESOLVED (same item as §1.D Mystic Isles — "erupted immediately" is the slip; the gap is Solis's ~20-year Mystic Isles exile) — House Patton: King Benjamin II "**7,284 BR – 7,241 BR ... He died at 43 ... and the civil war erupted immediately**," and dates Emillea Hige's poisoning to that same coup (Emillea "7,270 BR – 7,241 BR"; Solis age 9 → born 7,250 ✓). But the **Aicruan Civil War is dated 7,221–7,217 BR** on this very page and everywhere else — a **~20-year gap**. LOCATIONS bridges it ("Solis fled to the Mystic Isles after the coup (~7,241 BR)" and built a mercenary army), and House Kulio confirms "Mihel ... met Solis on the Mystic Isles to plan the rebellion." So the gap is the **exile period**, and Patton's "erupted immediately" is the inaccurate phrase. (This largely resolves the §1 coup/war open question.)

King Sayero Walica Patton —  RESOLVED (same item as §2.A — canon dates 8,608–8,533 BR) — House Patton: "**8,608 BR – 8,533 BR ... Died at 75**," siding with the HF *family tree* against the HF prose ("8,615 BR – 8,540 BR," stated twice). The tree version now has two sources.

Princess Karinoa Nalia Patton —  RESOLVED (same item as §2.A — canon death year 8,561 BR) — House Patton: "**8,611 BR – 8,561 BR ... Died at 50**," again siding with the HF tree (d. 8,561) against the HF legacy (d. 8,570).

Agari Liazen & the Liazen parents —  RESOLVED (same item as §2.A — Agari ~3 / 8,663–8,660 BR; parents died 8,660 BR) — House Patton: "Lady Agari Liazen (**8,663 BR – 8,660 BR**) ... Died in infancy at age 3," and both parents (Naern Mena,

Count Jinegi Liazen) die **"8,660 BR"** — matching the HF tree and conflicting with the HF Isalian-bio versions ("before the age of two"; parents killed "8,662 BR").

Emperor Elleinaj Patton I —  Conflict (internal) — "**~7,185 BR – ~7,092 BR ... died at ninety-three ... ruled for forty-eight years**" (crowned when Maen died in 7,140 BR → age **45**), yet the prose twice says he was **"fifty-five years old"** / spent "his first fifty-five years" as a duke's heir. 45 (from his own dates + 48-year reign to death at 93) vs 55.

-  **RESOLVED — he was 45 at accession; "fifty-five" is the slip (confirmed by Azora):** His own figures form a clean triangle on **45**: born ~7,185 BR → crowned at Maen's death in 7,140 BR = **age 45**, and 45 + his stated 48-year reign = **93** at death in ~7,092 BR, exactly matching "died at ninety-three." The two "fifty-five" mentions are the lone outliers — keeping them would force changes to his birth year, death year, AND reign length and still wouldn't reconcile with age 93. So 45 is canon. **Source fix needed:** on Historical Figures and House Patton, change "fifty-five years old" / "his first fifty-five years" → "forty-five" (he was a duke's heir for his first forty-five years before inheriting from Maen).

Esterica's death year — see D — House Patton's Coyre profile ("born approximately six months before her mother's death," Coyre b. 7,214 BR) corroborates Esterica's death in **7,214 BR**, against the HF "Maen ... five when his mother died" (→ ~7,212 BR).

Consistent anchors —  Massacre of Light 8,558 BR / 90,000 Order of the Pure Ones; Bloody Winter 8,259 BR; Siege of Highwater 7,463 BR; Razar as Patton patron god; Goteivati III "0 AR" Dark Ages — all match HF and/or LOCATIONS.

Gap —  the two documented "generations" cover ~8,759–8,468 BR and ~7,408–7,140 BR, leaving a **~1,000-year blank** in a dynasty said to rule "nearly two millennia." "Active Years" in Quick Facts is empty.

-  **RESOLVED — logged as a known, intentional gap; the mid-dynasty rulers existed but are simply unnamed in canon so far (confirmed by Azora):** A full canon sweep for any House Patton ruler between the two documented family trees (the ~8,468 → ~7,408 BR window) turned up nothing — every hit was just the standard era-banner boilerplate ("...The Classical Kingdoms — 7,400 BR...") that sits on every house page. So the ~1,000-year span is genuinely

undocumented, not contradicted: the dynasty did rule continuously across it (consistent with "nearly two millennia"), but the intervening kings and queens are not yet named anywhere in canon. Nothing is invented to fill it — it's a deliberate, acknowledged blank to be developed later if wanted. **Source note (optional):** the House Patton "Active Years" Quick-Facts field can be filled with the full dynastic span (~8,759 BR – ~7,092 BR), with an explicit note that the rulers between the 1st and 2nd documented generations remain unnamed.

B. House Vika — Eradicated; the twins' maternal house (*FULL*)

Internal consistency —  founded 8,520 BR by Axiker (b. 8,542, founded at 22, d. 8,470 at 72 ✓); "after 1,303 years, House Vika ceased to exist" (8,520 – 7,217 = 1,303 ✓); eradicated 7,217 BR after Orcus's death. Iris "7,256 BR – 7,218 BR" (Battle of Rewqo ✓ vs LOCATIONS), Orcus "7,256 BR – 7,217 BR." Beazen d. 7,223 BR "two years before the civil war" (→ war 7,221 ✓).

Religion —  Conflict (cross-house) — House Vika's religion is "Rillic," but House Kulio says it "shares this religion [Leneyez] with Houses Patton, Vika, Vemer, Najil, and Hige." Vika is Rillic on its own page, Leneyez on Kulio's.

-  **RESOLVED — House Vika is Rillic; Kulio's Leneyez grouping is the slip (confirmed by Azora):** Three independent sources file House Vika under **Rillic** — its own page lists "Religion: Rillic," and Houses **Caraen** ("Religion: Rillic... matches Houses Vika and Mena") and **Mena** both echo it. The lone outlier is **House Kulio**, whose line "shares this religion [Leneyez] with Houses Patton, Vika, Vemer, Najil, and Hige" sweeps Vika into the Leneyez bloc — that inclusion is the error. **Source fix needed:** correct House Kulio's Leneyez grouping to drop House Vika (Vika is Rillic).  Flagged for Category 4: Kulio's same Leneyez list also files **Patton, Vemer, Najil, and Hige** under Leneyez — the full Rillic-vs-Leneyez house-mapping is a larger Religion-category thread to settle separately.
 -  **RESOLVED — full Leneyez mapping verified house-by-house (confirmed by Azora):** A direct read of each house's own page confirms Kulio's Leneyez grouping is **correct for every house except Vika**. **Leneyez** is independently stated in the Quick Facts of **House Patton** ("Religion: Leneyez"), **House Vemer** ("Religion: Leneyez"), **House Najil** ("Religion: Leneyez"), and **House Hige** ("Religion: Leneyez (Circle of Eternal Light)")

— plus **House Kulio** itself. The lone outlier stays **House Vika**, whose own page reads "Religion: Rillic" (echoed by Caraen and Mena). Notably, **Vemer is genuinely Leneyez on its own page — not Barqeten** — despite sharing Basar Tari with the Barqeten House Yurea. So the canonical faith map locks as: **Rillic** = Vika, Caraen, Mena; **Leneyez** = Patton, Kulio, Vemer, Najil, Hige. **Source fix needed (not yet applied)**: the only correction is still dropping **Vika** from House Kulio's Leneyez line (Vika is Rillic); the other four houses need no change. Live canon pages untouched per standing policy.

Iris/Orcus — ☒ both pages name them "Patton" (father's house), "half-Vika by blood"; Iris = "Final Head of House Vika." Consistent with House Patton.

Shared events — ☒ Bloody Winter & the Siege are the same events as on House Patton, told from the opposite side. ☒ minor spelling: "Siege of **High Water**" (Vika) vs "Siege of **Highwater**" (Patton, Hige).

- ☒ **RESOLVED — canonical spelling is "Highwater" (one word); Vika's "High Water" is the typo (confirmed by Azora)**: The sweep is overwhelmingly lopsided toward "**Highwater**" — it holds House Patton, House Caraen, House Hige, the TIMELINE, the TIMELINE — Proposed Build, Inferred Canon Fixes, and even the Academy "Foreign Relations" course list, all for the same 7,463 BR peasant uprising. "**High Water**" (**two words**) appears in exactly one place: House Vika's keyword/cross-reference list — the lone outlier, same profile as the Vekta/Pireaynea/Haliour spelling slips. **Source fix needed**: change "Siege of High Water" → "Siege of Highwater" on House Vika.

C. House Hige — Solis's maternal house (*FULL*)

Solis's birth = 7,250 BR — ☒ stated outright; anchors the date used elsewhere.

The 7,241 coup — ☒ Hige's timeline matches House Patton: "7,241 BR — Solis named heir ... when he's nine ... King Benjamin dies. The twins coup. Emillea ... forced to drink poison." (Same ~20-year gap to the 7,221 war as in A.)

Lady Emillea Hige — ☒ "7,270 BR – 7,241 BR," matching House Patton and Historical Figures.

Pasilerad / Breleys — see H — Hige's Breleys dates are chronologically impossible against House Kulio's Pasilerad.

Internal note — ? "Status by Era" says House Hige was not destroyed but "folded ... into" House Arvento, yet the timeline says "House Hige members largely eradicated" in 7,241 BR. Eradicated at the coup, or faded and merged? Both are stated.

-  **RESOLVED** — not a contradiction; the two statements are sequential stages of one decline (confirmed by Azora): "Largely eradicated" and "folded into Arvento" describe the same fall in sequence, and the operative word is **"largely"** (not totally). House Hige's main line was gutted in the **7,241 BR coup** when Lady Emillea was publicly executed ("House Hige members largely eradicated"), but a remnant survived — the Status-by-Era section: "House Hige no longer exists as an independent noble house... the house couldn't sustain itself. **The last head of House Hige married his only surviving daughter to House Arvento, folding the Hige bloodline into the ducal house**" — and Minara's Era confirms "the Hige bloodline continues through House Arvento." So: largely (not wholly) eradicated at the 7,241 coup → diminished remnant can't stand alone → folds into House Arvento by marriage → bloodline survives as an Arvento sub-lineage. No source change strictly required; optionally tighten the timeline line to "members largely eradicated; the surviving remnant later folds into House Arvento" so the two stages read as one arc.

Gaps —  empty "House Culture" section; Crandona's Era = TBD.

D. House Kulio — Esterica's & Harnua's house (*FULL*)

This page **resolves two §2 items**.

Esterica Kulio — gap **RESOLVED** —  (one cross-page conflict) — full profile: **"7,248 BR – 7,214 BR ... died in 7,214 BR, six months after giving birth to Coyre ... Harnua ... poisoned Solis's cup with Ilkai. Esterica drank from the cup instead."** Children Maen (7,217) and Coyre (7,214); titled "Mother of a Dynasty." Fixes her death at **7,214 BR** (House Patton's Coyre entry agrees).  **RESOLVED** — Maen was ~3 when Esterica died (confirmed by Azora): Esterica's death in 7,214 BR is multi-anchored (House Kulio "7,248 – 7,214... died 7,214, six months after Coyre's birth"; House Patton's Coyre b. 7,214, "born ~6 months before her mother's death"), and Maen's birth in 7,217 BR is anchored ("born during Civil War Year Five"). So Maen was ~3 at her death, not five — the lone outlier is the Historical

Figures aside, which should change "five when his mother died" → "three."
Original flag retained: HF says Maen was "**five** when his mother died" (→ ~7,212 BR); by these dates Maen (b. 7,217) was ~3 in 7,214.

Saint Harnua — identity RESOLVED —  "**Harnua Kulio (7,251 BR – executed 7,214 BR) ... Thirteenth Saint** ... Full sister to Mihel, half-sister to Esterica." The "13th Saint" referenced in Historical Figures **is** Harnua Kulio; the §2 question is answered **yes**. She poisoned Solis's cup with **Ilkai** ("a god-killing herb"), killed Esterica by mistake, and was burned at the stake.

Most infamous Saint —  Conflict — House Kulio: Harnua is "the last Saint to ever be recorded, **second only to Reron** in terms of infamy." Historical Figures: Reron's "infamy is **second only to Saint Harnua**." The two pages reverse who ranks higher.

-  **RESOLVED — Harnua is the most infamous Saint (#1); Reron ranks second only to Harnua (confirmed by Azora):** Historical Figures' phrasing is canon — "Reron's infamy is second only to Saint Harnua." Harnua tops the ranking as the forbidden **13th Saint**: she poisoned Solis's cup with Ilkai (a god-killing herb), was burned at the stake by Solis, and had the thirteenth month *Agarisono* added to the calendar after her death. Reron stays the "taboo Saint" whose body the gods refused to inter — a close second, but second. The **House Kulio** and **Religion**-page wording ("Harnua... second only to Reron in terms of infamy") is the reversed slip. (*Note: this is the opposite of the source-count lean — two pages said the reverse — but it's Azora's confirmed story call.*) **Source fixes needed (both):** on **House Kulio** and the **Religion** page, change Harnua's "second only to Reron in terms of infamy" → frame Harnua as the most infamous Saint with Reron ranking second only to her.

Ilkai —  partially defines a §2 term — Kulio "Ilkai, a god-killing herb"; House Orana, the Ilkai "herb's existence on Mount Aicren ... forbidden" knowledge. Consistent — a god-killing herb native to Mount Aicren (mechanics still belong to Magic System).

Mihel Kulio — / — "7,259 BR – 7,205 BR ... met Solis on the Mystic Isles" (corroborates the exile).  injury timing: Kulio says he lost an eye in **Year One (7,221 BR)**; LOCATIONS says he lost his left eye at the **Massacre at Bareta, Year Two (7,220 BR)**.

- **✓ RESOLVED** — eye lost in Year One (7,221 BR), leg in Year Two (7,220 BR); **House Kulio is correct, LOCATIONS is the slip (confirmed by Azora, after a direct canon check)**: Three independent sources agree the eye is a **Year One / 7,221 BR** injury and the leg a **Year Two / 7,220 BR** one: **House Kulio** ("In Year One of the war (7,221 BR), he lost an eye. In Year Two (7,220 BR), he lost a leg."), **Mihel's character sheet** in *A Tale of a Thousand Songs* ("Loses an eye in Year One (Ch. 23) and a leg in Year Two (Ch. 28-34)"), and the **book-info TIMELINE era entries** (Year One / 7,221 BR lists "Mihel losing his eye"; Year Two / 7,220 BR "loses his leg"). The lone outlier is **LOCATIONS**, which folds the eye-loss into the **Massacre at Bareta** — a Year Two / 7,220 BR event. (Note: this *reverses* the initial source-snippet lean, which had leaned Year Two because Bareta is firmly Year Two; reading the full canon flips it — only the leg belongs to Year Two, via Nyeo.) **Source fix needed**: on the LOCATIONS **Bareta** entry, correct Mihel's injury so the eye-loss is no longer pinned to Bareta/Year Two — the eye is a Year One (7,221 BR) injury; only his leg (lost at **Nyeo**, Year Two, after Harnua's betrayal) belongs to Year Two. The LOCATIONS Nyeo leg-loss already reads consistently and stays.

Sky People origin — **✓** corroborates Vikitsv lore — Kulio's "People of the Mountain ... atop a high mountain that would eventually become Vikistv ... Grand Mage Verna struck a bargain with the goddess Iswan ... vulnerable to sun and fire" matches House Orana's cold/fire weakness and LOCATIONS' "Verna who founded Vikistv." **?** Orana frames the fire weakness as a secret Solis *discovered* via experiments on Maeret; Kulio treats it as a known result of the bargain. Also "Grand **Mage** Verna" (Kulio) vs "Grand **Sorcerer**" elsewhere.

- **✓ RESOLVED** — **"Grand Mage" stands as an older/alternate title for Verna; not a slip (confirmed by Azora)**: "Grand Sorcerer" remains the standard title of Vikitsv's ruling magic office, held by Verna's descendants down the line (Liaerto I → ... → Sevtor) and used everywhere else — TIMELINE — Proposed Build, *A Tale of a Thousand Songs* ("Grand Sorcerer Sevtor"), *A Tale of Three Sisters* ("Grand Sorcerer-to-be"), Historical Figures, and LOCATIONS ("the great sorcerer Verna"). But House Kulio's **"Grand Mage Verna"** is **intentional**: as the founding progenitor of Vikitsv magic, Verna may be styled with the older/alternate honorific "Grand Mage," distinct from the later institutional "Grand Sorcerer" office his heirs hold. (Note: this is the opposite of the source-count lean — every other page uses "Sorcerer" — but it's Azora's

confirmed story call.) **No source fix needed:** House Kulio's "Grand Mage Verna" stays as-is. (*Sky People line still carries one open ? — the fire/sun-weakness known-vs-secret question — handled next.*)

- **✓ RESOLVED — not a contradiction; the same weakness seen from inside vs. outside (confirmed by Azora):** The sky people's sun/fire vulnerability is an ancient *internal* truth baked into their nature by the **Verna-Iswan bargain** ("Grand Mage Verna struck a bargain with Iswan") — and they have always known it themselves: in *A Tale of Three Sisters* City Lord Ceval lights the **red torch**, "a danger symbol to his people (fire can kill them)," and the Six Kingdoms map repeats that red-torch fire-danger signal. What Solis *discovered* via experiments on **Maeret Orana** (Historical Figures' "Fire Weakness discovery"; House Orana's Maeret / Fire-Weakness link) was **not** new to the sky people — it was the **empire** prying loose their closely-guarded secret and weaponizing it (the Liacaion burning of House Orana, the Valea assault). So House Kulio (a known result of the bargain) and House Orana / Historical Figures (Solis's discovery) describe the **same** weakness from inside vs. outside. **No source fix needed** — optionally add a one-line note on House Orana / the Magic System that the weakness was always known *within* the sky people but secret to outsiders until the Maeret experiments. (*With this, all §3.D House Kulio sub-issues are resolved.*)

Name spellings — ? keywords list three spellings: "Mihel ... Michael ... Miachel Kulio."

- **✓ RESOLVED — "Mihel" is canon; "Michael" and "Miachel" are both variants/typos to drop (confirmed by Azora):** Every authoritative slot uses **Mihel Kulio** — his own character profile in *A Tale of a Thousand Songs* ("Full Name: Mihel Kulio"), the House Kulio profile throughout, LOCATIONS, the *Mihe. Aesthetic* page, the trailer log, and the In-Story Characters references. **"Michael"** appears only as the name his father introduces him by at court in the *Thousand Songs* chapter breakdown ("Introduced by his father as 'Michael'"), and **"Miachel"** appears only in House Kulio's keyword list with no prose anywhere — both are variants, not alternate canonical names. Same profile as the Vekta / Pireaynea / Haliour spelling slips. **Source fix needed:** drop "Michael" and "Miachel" from House Kulio's keyword/spelling list (and anywhere else they appear) in favor of the single canonical "Mihel."

E. House Orana — Vikitsv; destroyed (*FULL*)

Liaerto I lineage —  confirms the §1 resolution — "descended from Verna's eldest son **Liaerto I**," head Grand Sorcerer **Sevtor** — matching Historical Figures and against the LOCATIONS Magic-Tower "Uljan/Kiear/**Liaerto III**" account, which stays the outlier.

Magic Tower 7,749 BR; Valea attack (15,000) —  matches LOCATIONS.

Fire weakness, Liacaion, Mekean → Merigen Bleelack —  matches HF (Mekean sole survivor; line continues to Merigen Bleelack). **Liacaion** (the substance that burned the house) stays an undefined term pending Magic System / Key Words.

Spelling — uses "**Vikitsv**" (vs "Vikistv" on the Patton & Kulio pages) — reinforces the nation-spelling conflict.

Gaps —  founder, founding date, wealth, military, allies/rivals, traditions, values, reputation, and the Crandona/Minara eras are all [TBD].

-  **RESOLVED** — **House Orana's blank fields filled from canon (confirmed by Azora):** Shaped canon-anchored fills for every gap except domestic rival houses (left [TBD]). **Founder:** Liaerto I, Verna's eldest son — House Orana profile: "House descended from Verna's eldest son Liaerto I," and "Verna personally had Liaerto I drink his blood" — with Verna as progenitor. **Founded:** the Magic-Tower era; the page's Founding note pairs the Liaerto I line with "The Magic Tower was created in 7,749 BR," so the house's founding sits in that era. **Wealth:** immense, from Vikitsv's monopoly on magical exports (the "monopoly on magical exports that makes Vikitsv the second most influential country globally"), denominated in Kis (gem currency). **Military:** no conventional standing army — defense is geographic (Mount Aicren's three-month climb + freezing climate) plus the Magic Tower itself as a weapon (~400 trained wizards; Sevtor's Valea strike as proof). **Allied Houses:** Renililas, Yailk, and Qari (the Nationalist Party bloc named under Faction Allies), plus Equateiy as the international strategic ally. **Traditions:** magocracy/meritocracy rule through the Council of Scholars, preservation of the pure Verna bloodline, and guarding the forbidden Ilkai secret. **Values:** blood purity, magical mastery, scholarship, and loyalty to the realm (heraldry: nobility, truth, unwavering loyalty; motto "The Blood of the Fallen, True and

Strong"). **Reputation:** the supreme magical house — High Kings and Masters of the Tower, the purest and most powerful bloodline in existence; feared and revered. **Crandona's Era:** extinct as a house (burned by Solis in 7,217 BR); only the hidden bloodline survives via Mekean in Equateiy. **Minara's Era:** the name stays extinct, but the bloodline persists secretly through Mekean's descendants → Merigen Bleelack. **Rival Houses:** left [TBD] by Azora's call — canon names an international rival (Gherci) and the existential threat (the Solisian Empire under Solis, who destroyed the house), but no clearly-named domestic rival house. **Source fix needed:** fill these fields on the House Orana page (Founder, Founded, Name Meaning aside, Wealth, Military, Allied Houses, Rival Houses left TBD, Traditions, Values, Reputation, Crandona's Era, Minara's Era).

F. House Mava — Gherci royal family (*FULL — largely a stub*)

Gherci founding —  Conflict (reinforces the Saint Duri problem) — Mava: "Founded when **Saint Duri established Gherci in 8,663 BR or later.**" Sides with LOCATIONS' "8,663 BR" prose against the "8,763 BR" versions — and, like both, is impossible against Duri's lifespan (8,747–8,670 BR): 8,663 BR is 7 years *after* her death. The founding date now reads 8,663 BR (LOCATIONS prose + Mava) and 8,763 BR (LOCATIONS flag + Historical Figures), with neither fitting Duri's life.

Vapaz / The Teire / Main Master —  matches LOCATIONS' Gherci structure (House Mava subordinate to the Teire; the Main Master outranks the king).

Gap —  Major stub — founder, crest/symbolism, wealth, notable members, dates, allies, rivals, narrative role, and every post-Pre-Empire era status are [TBD]. Known Gherci royals from other pages — **Princess Kamerida Mava** (HF; assassinated by Iris, Year Four 7,218 BR) and the Kulio bride Ayera married "into the royal family of Gherci" — appear **nowhere** on the Mava page.

 **House Mava stub — RESOLVED (canon-anchored fills, confirmed by Azora):**

- **Founder & Founding:** The royal line of **Saint Duri** — Gherci's founder ("Queen of the People" / "Mother of Gherci"). Founded with Gherci's establishment, **~8,700 BR** (per §1.B). (*Prior canon left the Mava founder unnamed; Azora's call: Mava descends from Saint Duri's line.*)
- **Wealth:** Crown treasury of Gherci — the largest, holiest nation (~389M people, capital Tarmet, currency Miuae ≈ 26 USD); substantial royal/state wealth, with

the temple economy partly controlled by the Teire.

- **Allied Houses:** Fellow Gherci Royalist-faction houses — **House Catern** (guardians of Gherci's sacred ground) and **House Dai** — plus the binding Key Relationship with the Teire.
- **Traditions:** Heirs serve as generals/military figureheads by custom; devotion to **Vapaz**; ritual subordination to the Teire / Main Master.
- **Reputation:** The revered but ceremonially-constrained ruling house of the holy land — sovereigns who answer to the faith.
- **Solis's Era:** Ruling house of Gherci that backed Solis financially after **Princess Kamerida's** assassination ("The Fight of Blood," Year Four / 7,218 BR) flipped Gherci to his side; later folded into the empire.
- **Notable Members:** **Princess Kamerida Mava** (assassinated by Iris, 7,218 BR; appears in *A Tale of a Thousand Songs*) and **Ayera** (the Kulio bride who married into Gherci's royal family).
- **Vulnerabilities / Major Events:** Kamerida's assassination & Gherci's pivot to Solis; chief vulnerability is political dependence on the Teire (priestly veto over mobilization; figurehead status).
- **Note:** the page's Military and Values fields were already filled; this fill targets the genuinely-blank fields. Left **TBD** (no canon): Name Meaning, Theme Song, Rival Houses (no domestic rival named), and Crandona's/Minara's-era specifics.
- ☒ The "Founded when Saint Duri established Gherci in 8,663 BR or later" flag here is the **same item as §1.B** (resolved → ~8,700 BR) — no separate tally bump.

G. House Kivier — Equateiy; the secret rulers (*FULL*) — Status: ☒ RESOLVED — all stub fields filled (*was* *Gap*)

Founding — ☒ "Founded: 8,900 BR ... Yemaser of House Kivier," matching LOCATIONS (Equateiy founded 8,900 BR by Yemaser). Oldest house/nation.

Duke Reasaec Kivier — ☒ financed Orcus, beheaded at sea by Solis, head sent to Gherci with a note "written in **Ananara**" — matches Historical Figures + House Orana. "Ananara" stays an undefined language pending Language / Key Words.

Pel currency (~50 USD) —  matches LOCATIONS (highest-valued currency); Coelum's "40% to Equateiy" also echoes LOCATIONS.

Gaps —  seat, wealth, military, religion, internal structure, allies/rivals all [TBD].

-  **RESOLVED (confirmed by Azora)**: Every stub field for Equateiy's "secret rulers" is now filled. **Seat** → **Ociyaran**, Equateiy's capital. **Wealth** → the **Pel** (~50 USD, the highest-valued currency in the world), the continental banking system, Coelum's 40% tribute, jewel/precious-metal mining, maritime trade, and luxury goods — the foundation of "The Kingdom of Gold." **Military** → deliberately **minimal and indirect**: House Kivier finances wars (it bankrolled Orcus) rather than fielding armies, leveraging economic power over force — and that lack of direct military force is exactly what doomed Duke Reasaec (beheaded at sea by Solis). **Internal structure** → an **unofficial oligarchy** — ducal rule without a crown, the power behind the throne. **Allies** → the **Second Movement Party** bloc (Imbrer, Ganane, Balewer, Uaver, Vesmen, Adiye); internationally, Coelum's vassalage + Orcus's wartime backing. (Equateiy's other ducal house, **Veir**, sits in the rival **First Movement Party**, so it is a structural counterweight rather than an ally.) **Traditions** → secrecy, wealth-based meritocratic status, and ruling without ever claiming a crown. **Religion** → **tolerant melting-pot, no state faith** — canon was silent here, and a cosmopolitan merchant state where wealth outranks birth fits an open, no-established-church society. **Still TBD (documented soft spots)**: no *named* domestic rival house — Kivier's real antagonist is the **Solisian Empire / House Patton** (Solis beheaded Reasaec) — and Kivier's fate in the Crandona/Minara eras is undocumented (Equateiy continues as the Uxridian Grand Duchy → Kingdom of Ociyaran).  **Source fix needed (not yet applied)**: the House Kivier canon page should have its seat/wealth/military/internal-structure/allies/religion fields written out from the above; live canon pages stay untouched per standing policy.

H. Cross-house pass (Batch 1)

Pasilerad Kacer's era —  **RESOLVED** — fresh anchor set (*was*  *Conflict*) — a shared character with impossible cross-page dates. House Hige: Breleys Hige "7,436 BR," married Pasilerad at 12 (~7,424 BR). House Kulio: "**Pasilerad Kacer (7,401 BR – 7,302 BR)** ... 30 when he married 12-year-old Breleys" (→ marriage ~7,371 BR). The two houses place the same marriage ~50 years apart, and Hige's

date puts the wedding *before* Kulio's Pasilerad is even born. Every other detail matches (age 12 vs 30, partially blinded her, she escaped at 18 with half his money).

-  **RESOLVED (confirmed by Azora)**: Fresh anchor set, built on Kulio's fully-bracketed lifespan. **Pasilerad Kacer stays 7,401–7,302 BR** (a clean 99-year life). The immutable, twice-corroborated marriage facts hold — he married at **30**, Breleys at **12** (an 18-year gap), and she escaped at **18** with half his fortune — so everything else is derived from them: the **marriage falls ~7,371 BR**, **Breleys is re-dated to ~7,383 BR** (born 12 years before the wedding), and **she flees ~7,365 BR**. Hige's "Breleys b. 7,436 BR" is the error — it's chronologically impossible (it puts the wedding ~23 years before Pasilerad is even born) and it's the lone orphan figure, so it loses to Kulio's complete entry.
 **Source fix needed (not yet applied)**: on the House Hige page, change Breleys Hige's birth from "7,436 BR" → "~7,383 BR" (and align her marriage to ~7,371 BR / escape to ~7,365 BR); House Kulio's Pasilerad dates stay as-is. Live canon pages untouched per standing policy.

House Vika's religion —  Rillic (Vika) vs Leneyez (per Kulio). See B/D.

Civil-war timeline — / — coup (7,241 BR) → ~20-year Mystic-Isles exile → war (7,221–7,217 BR) is coherent across LOCATIONS + Kulio; only House Patton's "erupted immediately" contradicts it.

Shared deities/sites —  Razar (Patton patron; protects Solis — Kulio), Nellebrie (Iris/Orcus's burial temple — Vika; anoints Harnua — Kulio; created Mount Aicren — Orana), Iswan (Orana + Kulio), and the Mystic Isles all corroborate across houses.

Minor spelling watch — "Jaifey **Yurea**" (HF) vs "Jaifey **Yuera**" (Orana); "Mihel/Michael/Miachel" (Kulio); "High Water/Highwater"; "Vikitsv/Vikistv" (now split across house pages).

I. House Leum — Vikitsv (Negiet) (FULL — stub) — Status: 
RESOLVED — stub built out (was  Gap)

Negiet's nation — RESOLVES a §1 open question —  House Leum lists "Origin: Vikitsv" and "Seat: Negiet, Vikitsv." Its home page places Negiet in **Vikitsv**, matching the LOCATIONS Vikitsv key-locations entry and the Asleleri sisters'

Vikitsv origin — so the LOCATIONS Equateiy "Places" listing of Negiet is the outlier/error.

Faction — Traditionalist Party (with Houses Navefa, Miaran, Iriandet, Anasetanya); religion Iswan (matches the Vikitsv houses).

Gap — 🕒 near-total stub: status, founder, founding date, wealth, military, members, and every era status are [TBD]. Isenaylini Leum/Asleleri (the Asleleri sisters' mother, per LOCATIONS) is not on the page.

-  **RESOLVED (confirmed by Azora):** House Leum is a **prominent mage-adjacent Vikitsv house** whose rise is woven directly into the Magic Tower line. It began as a modest family of **Kiear's mentees/students** in Negiet, then leapt to noble rank when **Kiear himself — eldest son of Ulian (Verna → Liaerto I → Ulian → Kiear & Liaerto III) — married into the family and took the Leum surname**. He did so deliberately to step *out* of the Magic Tower succession, so he wouldn't have to compete with his **younger brother Liaerto III** over who would lead the Tower. This is now the in-canon reason the Grand Sorcerer line runs **through Liaerto III → Sevtor and not through Kiear** — it closes the loophole left by the Vikitsv leadership ruling (§1.B), which previously just asserted the line skipped Kiear without explaining why.
 - **Rank/standing** → a noble house elevated through magical prestige and the Verna bloodline marrying in (Kiear), not through land or arms. Mid-tier, Traditionalist Party.
 - **Founder** → the founder-by-marriage is **Kiear**, who took the Leum name; the pre-existing Leum family (his mentees) is the older root.
 - **Founding / era** → the generation of Kiear & Liaerto III in the Tower lineage, a few generations before **Sevtor** (the last Grand Sorcerer, burned by Solis 7,217 BR). Exact year stays soft pending the still-open Verna / Magic-Tower dating.
 - **Wealth** → modest; standing rests on magical prestige and Tower ties rather than trade or land.
 - **Military** → minimal — a mage-prestige house, not a martial one (consistent with the Traditionalist bloc).
 - **Religion / crest** → **Iswan** (Vikitsv standard); **white rose** crest.

- **Members** → **Kiear** (married in, took the Leum name); **Isenaylini Leum/Asleleri**, who ties House Leum to the **Asleleri sisters** as their maternal line.
- **⚠ Source fix needed (not yet applied)**: flesh out the House Leum page with the above (rank, the Kiear-marries-in founding story, wealth/military, members) and **add Isenaylini Leum/Asleleri** to it; also add a cross-note on the Magic Tower / Vikitsv leadership passage that Kiear's exit from the Tower line = his marriage into House Leum. Live canon pages untouched per standing policy.

J. House Arvento — Patton's oldest ally; neutral (*FULL*)

Founding — **✓** "Founded 8,746 BR ... Lenkitta Arvento," "second-oldest noble house ... just thirteen years after House Patton" (Patton founded 8,759; 8,759 – 8,746 = 13 ✓). Matches Historical Figures ("founded House Arvento for Lenkitta Arvento in 8,746 BR") and House Patton's account of the founding-era friendship with Lenkitta Arvento.

Council of the Forsaken — **DEFINES a prior term** — **✓** the underground justice org of the three neutral houses **Arvento + Aedria + Caraen**, founded 8,051 BR, crown-approved (also named on the House Vika and House Caraen pages). The previously-undefined "Council of the Forsaken" is now defined.

Taguar Murders — **partly defines a §2 term** — Arvento's poison "Kan" was made "to execute the men responsible for the **Taguar Murders** in Northern Aicruae" (~8,094 BR). Still no standalone entry, but the term is now anchored.

"The Lost One" Saint — **✓** **RESOLVED** — Galamma (3rd) (*was ✗ Conflict (internal)*) — the motto prose says it honors "**Saint Galamma, the Third Saint, called 'The Lost One'**" (HF: Galamma #3, 15,870–15,852 BR, died at 18 — ✓ "executed at eighteen"), but Arvento's own Cross-References and Keywords name "**Saint Karniode** ... The Lost One" (HF: Karniode #9). Galamma vs Karniode.

- **✓ RESOLVED (confirmed by Azora)**: "The Lost One" is **Saint Galamma, the Third Saint** (15,870–15,852 BR, executed at eighteen). Two independent anchors agree — Arvento's motto prose *and* Historical Figures both name Galamma #3 with the matching "executed at eighteen" detail — so the lone "**Saint Karniode**" (**9th**) mention in Arvento's Cross-References/Keywords is the slip. **⚠ Source fix needed (not yet applied)**: on the House Arvento page,

change the Cross-References/Keywords entry from "Saint Karniode ... The Lost One" → "Saint Galamma ... The Lost One" so the keyword index matches the motto prose. Live canon pages untouched per standing policy.

Who destroyed House Baliva? —  **RESOLVED** — joint kill (*was*  *Conflict (cross-house)*) — Arvento: Tilan Arvento "destroyed the last members of House Baliva" in the **War of World's End (8,201–8,152 BR)**. House Vika claims the credit itself — nickname "**The Champions of Afera (Led the coalition that destroyed House Baliva)**." Two houses each claim to have destroyed House Baliva.

-  **RESOLVED (confirmed by Azora)**: Both houses are right — it was a **joint kill**. **House Vika led the coalition** that broke House Baliva (its "Champions of Afera" boast stands), while **Tilan Arvento dealt the final blow**, destroying the last surviving members (Arvento's "destroyed the last members" stands). The feud was fundamentally **Arvento's**, fought out across the War of World's End (8,201–8,152 BR) and capped at the **Battle of Afera (8,151 BR)**. Neither claim needs deleting — both are literally true once you read Vika as the coalition leader and Arvento as the one who finished the survivors.  **Source fix needed (not yet applied)**: add a one-line cross-reference on both the House Arvento and House Vika pages clarifying the shared credit (Vika led the coalition; Tilan Arvento struck the final blow on the last members), so neither page reads as the sole destroyer. Live canon pages untouched per standing policy.

Corroborations —  Casmin Arvento fought beside **Dexona Vika** at Bloody Winter (8,259 BR) — matches House Vika & House Caraen; Barqeten faith shared with Houses Leva, Aedria, Yurea.

Gaps —  Quick-Facts "Colors: TBD" (given as Green/Gold later in the body); narrative role [TBD].

K. House Caraen — capital defenders; loyal to the crown (*FULL*)

Founding —  "Founded 8,643 BR ... Milane Caraen ... granted nobility at 19 by King Haliour Layern Patton II" (Milane b. 8,662 → 8,643 ✓). Matches House Patton ("King Haliour II ... granted Milane Caraen his noble title, founding House Caraen").

Basania Caraen ↔ Hailea Kulio — strong cross-house match —  Caraen: "Basania Caraen (7,996 BR – 7,967 BR) ... fell in love with Hailea Kulio (six years her senior) ... bullying ... Takerei ... the first of Hailea's followers to commit

suicide." House Kulio independently says the same. Both die 7,967 BR; Hailea (b. 8,002) is exactly 6 years older than Basania (b. 7,996). Fully consistent.

Oahiat Caraen & Dexona Vika —  both died at the Battle of GreyNest in 8,248 BR (Caraen "Treaty of Oahiat (8,248 BR)"; Vika "Dexona ... died at 38 at the Battle of GreyNest"). Asjart Caraen (knight of Prince Teravian)  vs House Patton's Teravian.

Military size —  **RESOLVED** — 100,000 (3rd strongest) (*was*  *Conflict (cross-house)*) — Caraen: "Over **100,000** men (3rd strongest military in Aicruae, after House Vika and House Patton)." House Mena: "5,000 soldiers on stand-by (**on par with House Caraen**)" — implying Caraen ~5,000. 100,000 vs ~5,000.

-  **RESOLVED (confirmed by Azora)**: House Caraen's military is **over 100,000 men**, and it stays the **3rd strongest in Aicruae** (after Houses Vika and Patton) — fitting for the capital's defenders. The **House Mena** line is the error: its "5,000 soldiers on stand-by (**on par with House Caraen**)" wrongly equates Mena's tiny standby force with Caraen's full strength. A 5,000-man house cannot be "on par" with the realm's 3rd-largest army.  **Source fix needed (not yet applied)**: on the House Mena page, drop or rewrite the "on par with House Caraen" clause — e.g. keep Mena's own "5,000 soldiers on stand-by" but remove the false comparison to Caraen (Mena is a small house, not Caraen's military equal). Caraen's 100,000 / 3rd-strongest figures stay as-is. Live canon pages untouched per standing policy.

Maikor "of Pireaynea" —  **RESOLVED** — Maikor of Aseraga (*was*  *Conflict (chronology)*) — the Treaty of Oahiat (8,248 BR) and Battle of GreyNest involve "**Maikor of Pireaynea**," but Pireaynea was not founded until **7,200 BR** (LOCATIONS) — over 1,000 years later.

-  **RESOLVED (confirmed by Azora)**: Relabel, don't redate. The **8,248 BR date holds** (anchored by the GreyNest deaths of Oahiat Caraen + Dexona Vika). Since "Pireaynea" didn't exist yet, **Maikor is from one of the Four Territories that Deasn later unified into Pireaynea (7,400 BR)** — Aseraga, Baeistic, Urdeio, or Feacener, all of which already existed by the ~9,300s BR. Azora's pick: **Maikor of Aseraga** — now **map-confirmed**: the *Civil War Period* world map places **Aseraga in Pireaynea's southwest**, the proto-Pireaynean territory nearest the Aicruae/Haleker frontier (the Demon's Pit), exactly where the **Battle of GreyNest** and the **Treaty of Oahiat** (named for the Haleker border

town of Oahiat) played out. So Aseraga is both a heartland-tier territory name *and* the geographically closest fit — not a soft guess. ⚠️ **Source fix needed (not yet applied):** on the House Caraen page, change "Maikor of Pireaynea" → "Maikor of Aseraga" (one of the pre-unification Four Territories, in what is now Pireaynea's southwest). Live canon pages untouched per standing policy.

Religion — Rillic (matches Houses Vika and Mena) — reinforces the Batch-1 "Vika: Rillic vs Leneyez" conflict.

L. House Liazen — central to the royal line, yet a stub (*FULL*)

Gap — 🕒 Major — the entire page is "[TBD]" except a motto ("Auster Estu Locqur – Glory to thee for the honor of my kin"). Striking, because House Liazen supplies several pivotal Patton-line figures documented elsewhere — **Queen Isalian Liazen**, **Queen Mari Liazen**, **Count Jinegi Liazen**, and **Lady Agari Liazen** — none of whom appear on their own house page. All Liazen facts currently live only on House Patton / Historical Figures.

-  **RESOLVED — Liazen backbone & religion locked (confirmed by Azora):**
Not a true canon gap — a *documentation* gap. Canon already establishes the house in full across Historical Figures, KEY WORDS AND TERMS, House Patton, House Mena, and House Aedria; the dossier just hasn't been written.
Canonical arc: Liazen were the **sovereign rulers of the realm of Liazen** (Queens, not originally an Aicruae house). On **Queen Tavessa Liazen's death (8,680 BR — see date ruling below)** her son **Jinegi** (age 42) inherited; he was **later titled "Count"** after negotiating with **King Ilaem Nefest Patton I**, marking Liazen's demotion from sovereign Queens to a Count under Aicruae. Lacking full internal support, Jinegi's line lost the territorial dispute that **killed him and Lady Naern Mena in 8,660 BR** — the absorption event (the stray "8,662 BR" is the same outlier already flagged for correction in §2.A). Liazen peaks dynastically through **Queen Isalian Liazen (8,670–8,590 BR)** — 4th Official Queen of Aicruae, "Mother Superior," wife of King Haliour Layern Patton II — and goes **extinct in the main line at her death (8,590 BR)**. Other documented Liazen: **Queen Mari Liazen** (wife of King Viake Recreasion Patton), **Lady Agari Liazen** (~3 yrs, 8,663–8,660 BR), and **Cairyia Liazen** (married Kaernio Aedria, founder of House Aedria 8,516 BR; carries the family's Vikitsv blood).

- **Religion — Rillic (devout):** House Liazen were **strong believers in Rillic** — a *different* faith from House Patton's **Leneyez** — and that religious gulf was **one of the major reasons for the initial pushback against Queen Isalian's marriage** into the Patton royal line. Updates the locked faith map: **Rillic = Vika, Caraen, Mena, Liazen.**
- **Queen Tavessa Liazen's death year = 8,680 BR (not 8,685):** KEY WORDS gives her lifespan as "8,755–8,685 BR" but also says a Liazen ruler "Died in 8,680 BR, leaving his son Jinegi (age 42) to inherit." Jinegi's locked birth year is **8,722 BR**, so age 42 lands on **8,680 BR** exactly — corroborating 8,680 as the inheritance/death year; the "8,685" is the typo. **Corrected: Tavessa Liazen 8,755–8,680 BR (died at 75).**
-  **Source fixes needed (not yet applied):** (1) **Fill the House Liazen dossier** from the consolidated facts above (currently only the motto exists). (2) On **KEY WORDS AND TERMS**, correct Tavessa Liazen's lifespan end "**8,685 BR**" → "**8,680 BR.**" Live canon pages untouched per standing policy.

M. House Mena — Northern Aicruae; "The Mena Beasts" (*FULL*)

Patton-line dates — triple-confirmed —  "Lady Naern Mena (8,716 BR – 8,660 BR)," "Lady Vaseiula Mena (8,716 BR – 8,692 BR)," "Duke Nayiler Mena (8,747 BR – 8,679 BR)," and "Queen Yaseira Neacei Patton (7,340 BR – 7,268 BR) ... only Darien survived" all match House Patton exactly. Naern's death in **8,660 BR** is now corroborated by Patton + Mena + the HF tree — strengthening the conflict with the HF Isalian-bio's "8,662 BR."

Zacareneal Paneta —  **RESOLVED** — Najil is right; died at 26 (*was*  *Conflict*) — House Mena: "Zacareneal Paneta (8,707 BR – 8,705 BR) ... was the father of Asa Najil/Asa Panetta, the founder of House Najil." But both House Mena and House Patton date him "8,707 BR – 8,705 BR" and call him an infant who "died ... at age 2." Someone who died at age 2 cannot father the founder of House Najil. (Verify against House Najil.)

-  **RESOLVED (confirmed by Azora): House Najil is right** — Zacareneal Paneta lived to **age 26** and fathered **Asa Najil (née Paneta, b. 8,742 BR)**, founder of House Najil. The "infant who died at age 2 (8,707 BR – 8,705 BR)" dates on **House Patton + House Mena** are the **error** (a duplicated/garbled stub, likely conflated with a different infant Paneta). Corrected dates, anchored

on Asa's firm 8,742 BR birth + Najil's "died at 26": **Zacareneal Paneta ≈ 8,768 BR – 8,742 BR** — he fathered Asa near the end of his life and died around her birth, which fits her inheriting half the Paneta fortune as his bastard daughter.

⚠ **Source fix needed (not yet applied):** on the House Patton **and** House Mena pages, change Zacareneal's "8,707 BR – 8,705 BR / died at age 2" → "≈8,768 BR – 8,742 BR / died at age 26" (matching House Najil). Exact birth year can flex ±a few years; the death-at-26 and the 8,742 BR Asa anchor are the fixed points. Live canon pages untouched per standing policy.

House Mena's eradicator — ✅ **RESOLVED** — Merigen Bleelack; 'Morgant' is an error (*was* ❌ *Conflict (internal)*) — "Status By Era" and "Why They Matter" say House Mena was wiped out by **Merigen Bleelack** in Crandona's Era; "Role in Narrative" says they were "killed by **Morgant** for failing to swear loyalty." Merigen Bleelack vs Morgant — same person (alias) or an error?

- ✅ **RESOLVED (confirmed by Azora):** House Mena was eradicated by **Merigen Bleelack** — a real, locked canon figure (she descends from the lone Magic-Tower survivor Mekean Orana and is the major post-Sevtor power of Crandona's Era). The lone "**Morgant**" in Mena's "Role in Narrative" is the **error** — a stray name with no other canon footprint, not an alias. The two majority slots ("Status By Era" + "Why They Matter") both name Merigen, and she fits the era; "Morgant" loses 2-to-1 and has no independent existence. ⚠ **Source fix needed (not yet applied):** on the House Mena page, change "killed by **Morgant** for failing to swear loyalty" → "killed by **Merigen Bleelack** for failing to swear loyalty" (matching the page's own other two references). Live canon pages untouched per standing policy.

War of Fera — new event — Fransei Mena (8,669–8,655, hanged at 14) by **Hilatoma Dajanyi**; tension with House Dajanyi persists. Cross-check pending House Dajanyi.

Cidet works — ✅ Mena built the "Room of Glory" and "Hero's Hall" in the Cidet — matches the Cidet's "Room of Glory ... Hero's Hall" (Religion, §1.G).

N. Cross-house pass (Batch 2)

- **Negiet** resolved to **Vikitsv** (House Leum) — closes Locations Open-Question 13.

- **Council of the Forsaken** defined (Arvento/Aedria/Caraen) — closes a Batch-1 undefined term.
- **House Caraen's military** (100,000) vs **House Mena's** "on par with House Caraen" (5,000) — unresolved size conflict.
- **House Baliva's destroyers** — claimed by both House Arvento (War of World's End) and House Vika (Champions of Afera).
- **Zacareneal Paneta** can't be both a 2-year-old who died (Patton + Mena dates) and the father of House Najil's founder (Mena).
- **Rillic houses** (Vika, Caraen, Mena) vs House Kulio's claim that Vika follows Leneyez — the Batch-1 religion conflict stands.

O. House Vemer — Southern Aicruae; the "snake house" (*FULL*)

Founding —  "Founded 8,265 BR ... Ualvo Vemer I," posthumous nobility after the **Battle of Little Hill (8,264 BR)**.

Battle of Little Hill —  **RESOLVED** — both, as allies (*was ? cross-house overlap*) — Vemer claims Ualvo I "won the Battle of Little Hill and died for it" (nickname "The Victors of Little Hill"); but House Vika calls Dexona Vika "The Champion of Little Hill." Two houses claim the same battle's hero.

-  **RESOLVED (confirmed by Azora): No conflict — both stand.** Vemer and Vika fought Little Hill (8,264 BR) as **allies**, and the two honorifics describe different roles in the same victory: **Ualvo Vemer I** was the **commander who won the battle and fell there** ("The Victors of Little Hill" — a victory + a death, earning his house posthumous nobility), while **Dexona Vika** was the **individual battlefield champion** ("The Champion of Little Hill"). The timeline corroborates the pairing: Dexona survives Little Hill (8,264 BR) and dies 16 years later at the **Battle of GreyNest (8,248 BR)** — already confirmed in §3.K — so she can't have died at Little Hill, which fits the "champion who lived" reading against Ualvo's "victor who died."  **Source fix needed (not yet applied):** none strictly required, but add a one-line cross-reference on the House Vemer and House Vika pages noting they were allies at Little Hill (Ualvo I = victorious commander, fell there; Dexona = battlefield champion, survived to GreyNest) so the shared honorifics don't read as a contradiction. Live canon pages untouched per standing policy.

Code of Rose —  Hasken Vemer's forced marriage to **Aintana Vika** ("three sons") matches House Vika exactly.

Fasi Vemer + Jando Kulio —  strong match — Vemer: "Fasi Vemer (7,652 BR - 7,595 BR) ... Married Jando Kulio ... found stabbed to death outside a brothel. Two roses ... stuffed into his eyes." House Kulio says the same (Jando 7,649–7,621, roses in eyes). Consistent.

UIB —  RESOLVED — renamed (see §3.S) — Vemer + House Yurea are "the two noble houses with disclosed ties to the **UIB (Underground Illegal Business)**," centered in Basar Tari. (*Now: their disclosed ties are to The Free Company — the network the public fears as The Great Beast / The Maw; "UIB" retired.*)

Gaps —  Quick-Facts "Colors: TBD"; book appearances/key members [TBD].

P. House Aedria — beloved "IT family"; neutral (*FULL*)

Founding —  "Founded 8,516 BR ... Kaernio Aedria" married **Cairyia Liazen** (b. 8,533, age 17 = 8,516 ✓; died at 27 in 8,506 ✓).

Council of the Forsaken & Arvento marriages —  founding member with Arvento + Caraen; "Rorca Arvento married Bariaro Aedria" and "Laitha Arvento I married Jeart Aedria" match House Arvento exactly.

Najil marriage —  "Lady Erhen Aedria married Matasen Najil ... nine children, including Basiol Najil" — matches House Najil (Matasen 8,534–8,465; Basiol 8,498–8,439).

Rare House Liazen lore — adds detail the Liazen stub lacks: Cairyia was "exiled at 17 ... began manifesting magic ... proof of the family's **Vikistv blood heritage**," and "Queen Isilian Liazen ... introduced the concept of perfume to Aicruae" (inspiring TAKC).

Spelling —  RESOLVED — Isalian (*was*  *conflict*) — "**Isilian** Liazen" (Aedria) vs "**Isalian** Liazen" (House Patton / Historical Figures / House Mena).

-  **RESOLVED (confirmed by Azora)**: Canonical spelling is **Isalian Liazen** — it holds three authoritative slots (House Patton, Historical Figures, House Mena) against Aedria's lone "**Isilian**" (in its perfume/TAKC lore).  **Source fix needed (not yet applied)**: on the House Aedria page, change "Isilian Liazen" → "Isalian Liazen." Live canon pages untouched per standing policy.

Kalip Plague date —  **RESOLVED** — recurring; both true (*was  Conflict (cross-house)*) — Aedria dates the Kalip Plague to the close of the War of World's End (~8,160s BR); House Kulio has Hailea Kulio die saving "victims of the Kalip plague" in 7,967 BR — ~190 years apart.

-  **RESOLVED (confirmed by Azora): No conflict — the Kalip Plague is recurring.** It struck (at least) twice: a first outbreak at the **close of the War of World's End (~8,160s BR)**, recorded by House Aedria, and a later **resurgence ~7,967 BR**, during which **Hailea Kulio** died tending its victims (House Kulio). Both dates are correct and describe separate waves ~190 years apart — wholly plausible for an epidemic disease that lingers and re-emerges across generations. The WWE-end anchor (8,201–8,152 BR) and Hailea's 7,967 BR death both stay put.  **Source fix needed (not yet applied):** light touch — on the House Aedria and House Kulio pages, frame the Kalip Plague as a **recurring** disease with named outbreaks (~8,160s BR and ~7,967 BR) rather than a single event, so the two dates read as different waves instead of a contradiction. Live canon pages untouched per standing policy.

Q. House Yurea — merchants & kingmakers; Common People Faction (*FULL*)

Founding —  "Founded 8,209 BR ... Millaursa Yurea"; shares Basar Tari with House Vemer; disclosed UIB ties.

Jaifey Yurea & Tixsei —  "Jaifey Yurea ... General of the Second Army ... from ... the Gherci branch of Yurea"; daughter **Tixsei becomes queen after Esterica's death** — matches Historical Figures ("Tixsei Yurea ... daughter of Jaifey Yurea") and House Patton. Jaifey co-architect of the Maeret Orana torture (matches House Orana).

Spellings —  **RESOLVED** — Harnua & Yurea (*was  conflict*) — "**Haruna**" here for the poisoner-Saint (vs "**Harnua**" on Kulio/HF); and "**Jaifey Yurea**" here vs "**Jaifey Yuera**" (House Orana).

-  **RESOLVED (confirmed by Azora):** (1) The poisoner-Saint is **Harnua** — matches House Kulio + Historical Figures and locks to the already-settled **Saint Harnua = Harnua Kulio** (§2.C); House Yurea's "**Haruna**" is the typo. (2) The figure is **Jaifey Yurea**, spelled with the house's own name; House Orana's "**Jaifey Yuera**" is the typo.  **Source fix needed (not yet applied):** on the

House Yurea page, change "Haruna" → "Harnua"; on the House Orana page, change "Jaifey Yuera" → "Jaifey Yurea." Live canon pages untouched per standing policy.

Faction —  Common People Faction with Houses Leva & Dajanyi — matches House Patton's stated rivals.

Defines terms — God's Trial, the Aursa Bill, Baseik Fever (the poison/disease that killed Variae Yurea).

R. House Najil — knight house; eradicated (*FULL*) — confirms the Zacareneal conflict

Founding — "Founded 8,704 BR ... Asa Najil (née Paneta), bastard daughter of Zacareneal Paneta."

Zacareneal Paneta —  RESOLVED — Najil's account stands (*was*  *Conflict, three-way*) — Najil: Zacareneal "died at age **26** ... left half the Paneta fortune to" Asa (b. **8,742 BR**), who founded House Najil. But House Patton AND House Mena both date Zacareneal "**8,707 BR – 8,705 BR**" and call him an infant who "died ... at age 2." The three pages are mutually impossible — Asa (b. 8,742) would predate her own father's stated birth (8,707) by 35 years.

-  **RESOLVED (confirmed by Azora):** Najil's account is canonical (full ruling logged at §3.M) — Zacareneal died at **26** and fathered Asa (b. 8,742 BR); corrected to **≈8,768 BR – 8,742 BR**. The Patton + Mena "infant, died at 2 (8,707–8,705 BR)" dates are the error to fix on both those pages.

Queen Cecea Sanitte —  "Queen Cecea Sanitte Patton (8,618 BR – 8,545 BR) ... from House Najil ... married King Sayero Walica Patton ... mother of Prince Benjamin ... and Princess Toavaliae" — matches House Patton exactly.

Dela Najil ↔ Princess Toavaliae —  Toavaliae "forced to marry her brother, King Benjamin Lawrence Patton I" — matches House Patton.

Eradication — Najil "conspired with the twins," was eradicated and banished by Solis after the war (new; consistent with the civil-war pattern).

S. House Dajanyi — ex-pirates turned heroes; Common People Faction (*FULL*)

Founding —  "Founded 8,804 BR ... Xahaner Dajanyi (originally created by Rigu Dajanyi)"; ex-pirates from Coelum, migrated to Aicruae ~8,978 BR.

Hilatoma Dajanyi & the War of Fera —  "Hilatoma Dajanyi ... Aicruae's Great Hero ... prevented ... Aicruae and Coelum from falling to House Mena ... executed ... Fransei Mena" — matches House Mena (Fransei hanged at 14 by Hilatoma); both pages note the lasting Mena–Dajanyi tension.

UIB —  **RESOLVED** — retired & renamed (*was*  *Conflict (term)*) — Dajanyi expands UIB as "**Underground Information Brokers**," but House Vemer and House Yurea expand it as "**Underground Illegal Business**."

-  **RESOLVED (confirmed by Azora): "UIB" is retired entirely** — both expansions ("Underground Illegal Business" and "Underground Information Brokers") were too on-the-nose; no in-world criminal network would label itself that plainly. Replaced with a **three-layer naming** (now with an added origin backstory):
 - **Origin — the two old expansions are sequential stage-names (confirmed by Azora):** the network was *founded* as the **Underground Information Brokers** (an intel-trafficking operation), then later rebranded internally as the **Underground Illegal Business** as it expanded into open crime. So both on-the-nose expansions are **historically real, in order** (Information Brokers → Illegal Business) — which is exactly why different houses remember it by different names (Dajanyi recalls the older info-broker era; Vemer/Yurea the later illegal-business era). The org then outgrew both labels and is today known by the three names below. This deepens the lore *beneath* the locked ruling without disturbing it; "UIB" stays retired as a current-day term.
 - **The Great Beast** — the feared, folkloric name the commonfolk use: a many-limbed monster that feeds on the kingdom, spoken of in the dark.
 - **The Maw** — the grim colloquial ("it all goes down the Maw"); the network's hungry public face, centered in Basar Tari.
 - **The Free Company** — what the controllers call it *among themselves*: a clean, marketable, faintly prestigious front name that sounds like a chartered trading house, with "free trade" quietly covering the smuggling.

Deniable in polite company — very House Yurea (merchants & kingmakers).

⚠ **Source fix needed (not yet applied):** purge "UIB / Underground Illegal Business / Underground Information Brokers" from the House Vemer, House Yurea, and House Dajanyi pages and replace with the new names — public/feared references → **The Great Beast** or **The Maw**; insider/controller references → **The Free Company**. Live canon pages untouched per standing policy.

Coyre's marriage absent — 🟤 Duke **Shaniser Dajanyi** (who married Princess Coyre and fathered Emperor Elleinaj, per House Patton / HF) appears **nowhere** on the Dajanyi page.

Corroborations — ✅ the goddess **Nimlye** (matches House Arvento's "Nimlye, Goddess of Secrets and Fate"); **Saintess Nairan (~10,012–9,983 BR)** matches HF's Saint Nairan (#8). Note: Dajanyi follows the **Order of the Pure Ones** — the same faith massacred at the Massacre of Light. Internal nuance: spirit animal "dolphin" vs a sea-serpent crest (the page acknowledges this).

T. House Leva — the only matriarchal house; Common People Faction (*FULL*)

Founding — ✅ "Founded 8,902 BR ... Brimena Leva"; seat **Jasereiey** (matches LOCATIONS' "Jasereiey ... seat of House Leva"); the "Divine Matriarch" (women rule) makes it the only matriarchal house.

Salt-trade alliance with House Vika — ✅ stated on both pages.

Barqeten + Dajanyi marriages — ✅ Barqeten faith (matches House Arvento's list of Barqeten houses); "five of Oera Leva's eighteen daughters married into House Dajanyi" (one-sided — not on the Dajanyi page).

Naval power — 50+ ships, "twice the fleet of House Dajanyi"; reputation "the king's thieves."

Gaps — 🟤 Colors [TBD]; key industries, succession dates, narrative role [TBD].

U. Cross-house pass (Batch 3)

- **Zacareneal Paneta** — now a confirmed **three-way** conflict (Patton + Mena: died at 2 / Najil: died at 26 and fathered House Najil's founder).

- **"UIB"** —  RESOLVED — retired & renamed (see §3.S): public **The Great Beast / The Maw**, insider **The Free Company** (*was: two expansions — "Underground Illegal Business" (Vemer, Yurea) vs "Underground Information Brokers" (Dajanyi)*).
- **Kalip Plague** dated ~190 years apart (Aedria ~8,160s BR vs Kulio 7,967 BR).
- **Faction map confirmed:** Common People = Leva / Dajanyi / Yurea (exactly House Patton's stated rivals); the neutral Council of the Forsaken = Arvento / Aedria / Caraen.
- **Cross-confirmed marriages/events:** Code of Rose, Jando Kulio's murder, Matasen–Erhen (Najil–Aedria), Queen Cecea (Najil → Patton), Hilatoma's execution of Fransei (Dajanyi–Mena), the Arvento–Aedria marriages, and the Vika–Leva salt trade all align across both houses involved.
- **Spelling watch grows:** "Harnua/Haruna," "Isalian/Isilian Liazen," "Jaifey Yurea/Yuera."

V. House Catern — Gherci; guardian of Aryanara & Vekta (*FULL — partial stub*)

Guardianship —  Archduke rank + guardianship of the twin territories **Aryanara & Vekta** matches Religion ("House Catern's Sacred Role," Archduke), LOCATIONS ("Protected by House Catern"), and Historical Figures. Spelled "Vekta" (the consistent spelling).

New — faction "**The Believers**"; stands against the "**Brotherhood of Westwinds**" (a competing belief system, otherwise undefined — pending Religion). Spirit animal: elephant.

Gap —  founder, founding date, seat, notable members, and even its religion are [TBD].

W. House Baliva — destroyed; total stub (*FULL — blank*)

Gap —  the entire page is [TBD]. This matters because House Baliva is referenced heavily elsewhere — "completely destroyed" in the **War of World's End** and the late queen's house in the **Daneya incident** (both House Arvento), and the house House Vika claims to have destroyed ("Champions of Afera"). None of

that appears on Baliva's own page, so the "who destroyed House Baliva" conflict cannot be settled from its own canon.

X. House Toallu — Equateiy; First Movement Party (*FULL — stub*)

Defines a faction — the "**First Movement Party**" (Equateiy; prioritizes military & law enforcement): House Toallu with Houses Rendenten, Dasbe, Ashonve, Veir, Schmidtavaca, Maro, and Reidskelisia.

Gap (one-sided) — 🕒 House Yurea says Variae Yurea "fled to Equateiy and lived with House Toallu ... fell in love with **Rlyana Toallu**" (→ Pyhia). The Toallu page names neither Rlyana, Variae, nor Pyhia; everything else is [TBD].

-  **RESOLVED (confirmed by Azora) — documentation gap, not a contradiction.** House Yurea's account is **canon**: Variae Yurea fled to Equateiy, lived with House Toallu, fell in love with **Rlyana Toallu**, and their union produced **Pyhia**. House Toallu's own page is a near-total stub that states *nothing* on the matter — so there is nothing to contradict; the cross-reference simply flows one direction (Yurea → Toallu). Same shape as the Esterica-on-House-Kulio and Saint-Harnua gaps: the storyline lives on the page that bothered to write it, and the other side is just unwritten. ⚠️ **Source fix needed (not yet applied):** give House Toallu its side of the story — add **Rlyana Toallu** as a named member, record **Variae Yurea's** flight to Equateiy and stay with the house, and note their child **Pyhia** — mirroring what House Yurea already documents.

Y-AA. Houses Navefa, Miaran, Iriandet — Vikitsv; Traditionalist Party (*FULL — stubs*)

Faction consistency —  all three confirm the **Traditionalist Party** bloc (with House Leum and House Anasetanya); every page's faction-ally list agrees. All three worship **Iswan** and respect **Nellebrie** — matching the Vikitsv religion (Leum, Orana).

"For Ulian" — House Iriandet's motto venerates **Ulian**, the figure named in the disputed LOCATIONS Magic-Tower lineage ("Ulian and his sons Kiear and Liaerto III") — relevant to Locations Open-Question 5 (Ulian vs the Verna/Sevtor line).

Gaps — 🕒 founder, founding date, members, dates [TBD] on each.

BB. Cross-house pass (Batch 4)

- **Faction map expands beyond Aicruae** — these stubs fill the "[TBD] political factions" gap flagged for the non-Aicruae nations in §1: **Vikitsv** = Traditionalist Party (Leum, Navefa, Miaran, Iriandet, Anasetanya, under House Orana's magocracy); **Equateiy** = First Movement Party (Toallu + 7 others); **Gherci** has "The Believers" (Catern).
- **Heavily-referenced but blank** — House Baliva is a total stub, and House Toallu omits the Rlyana/Variae/Pyhia storyline that House Yurea builds on it. Cross-house facts here flow one way only.

CC. House Anasetanya — Vikitsv; Traditionalist Party (*FULL — stub*)

Faction —  completes the **Traditionalist Party** bloc (Leum, Navefa, Miaran, Iriandet, Anasetanya); worships Iswan, respects Nellebrie.  everything else (founder, founding, members, dates) [TBD].

DD. Houses Veir, Rendenten, Dasbe — Equateiy; First Movement Party (*FULL — stubs*)

Faction —  all three confirm the **First Movement Party** (with Toallu, Ashonve, Schmidtavaca, Maro, Reidskelisia).

New (Equateiy structure) — House Veir is "one of **two ducal houses in Equateiy alongside House Kivier**" — adds to LOCATIONS' "oligarchy ruled by House Kivier." Rendenten and Dasbe are Knight-rank houses.

Gaps —  founders, founding dates, members, religion [TBD] on all three.

EE. Houses Kifan & Jivaya — Coelum; Moon & Sea Factions (*FULL — stubs*)

Dajanyi corroboration —  Kifan: "Ailimara Kifan married Rigu Dajanyi"; Jivaya: "Sorara Jivaya('s) family did not approve" the match with Rigu — both match House Dajanyi's founder backstory exactly.

New (Coelum structure) — Coelum has three belief-factions: **Moon Faction** (Kifan, "Lords of the Moon"), **Sea Faction** (Jivaya, "Lords of the Sea"), and **Land**

Faction (House Ochanan) — fitting the "mostly atheistic" Coelum of LOCATIONS (secular philosophical factions rather than gods).

Gaps — 🕒 founders, seats, dates, full member lists [TBD].

FF. Cross-house pass (Batch 5)

- **Faction map now spans all six nations:** Aicruae (Divine / Common People / Neutral), Vikitsv (Traditionalist Party, under House Orana), Equateiy (First Movement Party; the two ducal houses are Kivier + Veir), Coelum (Moon / Sea / Land factions), and Gherci ("The Believers" + the Mava/Teire theocracy). This fills the "[TBD] political factions" gap flagged for every non-Aicruae nation in §1.
- **No new conflicts this pass** — the Kifan/Jivaya pages only corroborate House Dajanyi's Coelum origin.

GG. Aicruae minor houses — bare stubs (*FULL — skeletal*)

Eleven Aicruae houses are bare skeletons (only faction + kingdom listed): **Divine Faction** — Tikan, Anaio pana, Hert, Kauliv, Amecken, Miada, Yainaro; **Common People Faction** — Cowsrer, Gaset, Kilina; **no faction listed** — Brumik. 🕒 everything else [TBD]; nothing to cross-check.

HH. Gherci houses — Dai, Malrancis, Iarnailo, Pontia (*FULL — stubs with Crandona lore*)

New (Gherci party system) — reveals Gherci's factions: **The Populists** (Dai, Malrancis), **The Reformers** (Iarnailo), **The Royalists** (Pontia), alongside **The Believers** (Catern).

Crandona's-era rebellion — first appearance of this era (Book 3, *A Princess in Love*): **Danik Malrancis** ("Father of the Forest," raised by wolves, b. 66 BR) and **Amuseri Pontia** (b. 19 BR) both joined **Crandona's campaign to reclaim the throne**; Danik was killed by **Avromvog Stanyad**. ✅ House Malrancis and House Pontia agree on the Caprlolan-forest group (Ala, Hicksora, Amuseri, Eveli, Thoati).

Gaps — 🕒 founders, founding dates, members otherwise [TBD] on all four.

II. House Yailk — Vikitsv; Nationalist Party (*FULL — stub with one key member*)

New (Vikitsv's second party) — the Nationalist Party (Orana, Renililas, Qari, Yailk), distinct from the Traditionalist Party. Notably, House **Orana** (the ruling magocracy) sits in the Nationalist Party.

Natav Yailk — corroborates the fall of Vikitsv —  Grand-Sorcerer-to-be after Sevtor, engaged to **Enyokia Asleleri**, secretly betrayed Vikitsv to Solis (~7,214 BR), and was executed ("burned by fire") alongside City Lord **Ceval Asleleri** anyway — matching LOCATIONS (Ceval governs Torad; Solis conquers ~7,214 BR) and Historical Figures (Enyokia, the Asleleri sisters). Worships Iswan.

JJ. Cross-house pass (Batch 6)

- **Faction systems fully mapped now:** Vikitsv has **two** parties — Traditionalist (Leum/Navefa/Miaran/Iriandet/Anasetanya) and Nationalist (Orana/Renililas/Qari/Yailk); Gherci has **four** — Believers / Populists / Reformers / Royalists.
- **Crandon's Era surfaces** for the first time via Houses Malrancis & Pontia (Caprlolan-forest rebels who join Crandon), introducing Danik Malrancis, Amuseri Pontia, and Avromvog Stanyad — to cross-check against the *A Princess in Love* book page.
- **Natav Yailk's betrayal** adds an internal-treason layer to the ~7,214 BR fall of Vikitsv, consistent with the Asleleri storyline. No new conflicts this pass.

KK. Final Equateiy houses — Imbrer, Ganane, Balewer, Uaver, Vesmen, Adiye, Ashonve, Maro, Schmidtavaca, Reidskelisia (**FULL — mostly stubs**)

New (Equateiy has TWO parties) — corrects the earlier "Equateiy = First Movement Party" shorthand. There is a **First Movement Party** (military/law-enforcement: Rendenten, Dasbe, Toallu, Veir, Schmidtavaca, Ashonve, Maro, Reidskelisia) **and** a **Second Movement Party** (pro-wealth/economic growth: Kivier, Imbrer, Ganane, Balewer, Uaver, Vesmen, Adiye).  Note **House Kivier sits in the Second Movement Party**, not the First.

Crandon's-era forest arc — strong four-house cross-confirmation —  the five women Danik Malrancis raised in the Caprlolan forest now have surnames spread across pages: **Ala Reidskelisia** (House Reidskelisia — a pirate captain's daughter who kills **Avromvog Stanyad** with arrows, avenging Danik, and becomes

a couple with Hicksora), **Hicksora Connorrita**, **Amuseri Pontia** (House Pontia), **Eveli Cathon** (loved by **Wioli Schmidtavaca**, who dies under 40+ arrows trying to recover her body while fighting Merigen), and Thoati (surname still unknown). Houses Malrancis, Pontia, Reidskelisia, and Schmidtavaca all corroborate this arc (Book 3, *A Princess in Love*).

Gaps —  the six Second-Movement houses (Imbrer, Ganane, Balewer, Uaver, Vesmen, Adiye) plus Ashonve & Maro are faction/motto/crest only; founders, dates, members [TBD].

LL. Final stubs — Renalagardo (Gherci), Renililas & Qari (Vikitsv), Ochanan (Coelum), Tazem (Pireaynea) (*FULL — stubs*)

- **Renalagardo** — Gherci, **The Believers** (with Catern); devoted to **Vapaz** as "the one true god."
- **Renililas & Qari** — Vikitsv **Nationalist Party**, completing that bloc (Orana, Yailk, Renililas, Qari); Iswan worship.
- **Ochanan** — Coelum **Land Faction**;  matches the Kifan & Jivaya cross-refs, so the Moon/Sea/Land trio is now confirmed from all three sides.
- **Tazem** — the **only noble house in Pireaynea**, faction "Unsorted"; its motto and lone-house status fit LOCATIONS' lawless "Demon's Pit" framing of Pireaynea.

MM. "Noble Houses across the Eras" — master roster (pre-Conquest) (*FULL for this page*)

This index lists every house by nation + faction for the pre-Conquest era. It mostly agrees with the individual pages and lets every faction be reconciled, but adds some labels and one spelling issue:

- **Confirms the full faction map:** Aicruae = Divine / Neutral / Common People; Gherci = Royalists / Populists / Reformers / Believers; Vikitsv = Nationalist / Traditionalist; Equateiy = First Movement / Second Movement; Coelum = Land / Moon / Sea; Pireaynea = Unsorted (Tazem only).
- **New labels not stated on the houses' own pages:** House **Mava** = "The Royalists" (its own page named no Gherci party); House **Najil** = **Divine Faction** and House **Mena** = **Neutral Faction** (neither stated a faction); House

Liazen = "Rulers of Liazen — later, Divine Faction"; House **Brumik** = **Common People** (its own page left faction blank).

- **✗ Spelling** — the section heads "Noble House of **Vikistv**" (the variant spelling again).
- **⚠ Three era-roster subpages discovered** as children of this index: houses **after Solis's Conquest, before/during/after Crandona's era, and during Minara's Era** — none yet read (flagged pending; they likely track faction/status changes across eras and may surface new conflicts).

NN. Category 3 coverage note (Batch 7 wrap)

- **All 61 individual house pages are now read in FULL.** (The hub's "62 subpages" counted the "across the Eras" index as a house; there are 61 houses + that index. The roster independently lists exactly 61, confirming the count.)
- **Equateiy correction:** the nation has two parties (First + Second Movement); earlier batches that called it simply "First Movement Party" were incomplete.
- **Most cross-validated Crandona storyline:** the Caprlolan-forest rebels (Malrancis + Pontia + Reidskelisia + Schmidtavaca all agree).
- **Still pending under Noble Houses:** the 3 "across the Eras" era subpages, the separate **Noble House Crests** canon page, and the **WWG** → **NOBLE HOUSES** branch.

OO. "Noble Houses across the Eras" — the 3 era-roster subpages (FULL)

These index subpages list **net-new** houses introduced per era (a callout on each says earlier houses persist unless explicitly eradicated):

- **Solis's Era (7,217–7,163 BR) — 18 new houses:** Sevoktian, Hinkina, Connorrita, Peregrinai, Uetain, Qaoshery, Liqa, Faserat, Zemeralda, Delmaris, Garrivon, Sahndikar, Sarmenta, Demai, Chairameron, Oberdessa, Benen, Boletrin. **✓** era window matches Solis (d.7,163 BR). **✓ House Connorrita** here aligns with Crandona-era **Hicksora Connorrita** (house exists from Solis's era; member active later).

- **Crandona's Era (~1 BR–50 AR) — 21 new houses:** Tushol, Dulpy, Artian, Embrila, Weirran, Goag, Prairn, Xurena, Clyah, Elarin, Hestai, Taten, Bahsi, Xivara, Itaeri, Bicharaka, Wistara, Zorana, Walent, Zaimet, Natin. ★ **Resolves a standing question:** this page explicitly names **Merigen Bleelack** as "the traitor" whose rebellion defines the era — corroborating House Schmidtavaca (Wioli dies "fighting Merigen") and giving Merigen a full name + era placement. New timeline anchors: **Goteivati III's reign** and "the dark ages."
- **Minara's Era (~2,632 AR) — 15 new houses:** Lora fonmenti, Amarivelle, Jaceri, Ganeia, Paleirne, Treqe, Wabel, Cerashem, Kilensek, Suheramje, Feins, Bexeli, Craqueden, Warop, Remexa.
- 🕒 All three are **name-only stub lists** — no per-house facts, founders, or dates.

PP. Noble House Crests gallery (*FULL*)

- A visual crest gallery with cards for houses from **every era** (pre-Conquest 61 + all three era rosters), ~114 cards plus one blank "New house" template card.
- ✗ **Spelling conflict:** the crest card reads "**House Chairamero**", but the Solis-era roster and the WWG index both spell it "**House Chairameron**" (the crest drops the final "n"). ✓ **RESOLVED — "Chairameron" is canonical; the Crests gallery card is the typo (confirmed by Azora).** Source fix needed: on the Noble House Crests gallery, change "House Chairamero" → "House Chairameron."
- ✓ Otherwise the gallery's house names line up with the rosters; it's a good completeness check that every named house has a crest.

QQ. WWG → NOBLE HOUSES dossier hub (*index FULL; dossiers pending*)

- This is a **second, far more detailed noble-house hub**, separate from the CANON "Noble Houses" hub. It is an A–Z index of **~114 house dossiers**, each templated with Quick Facts, Active Years, Status by Era, Heraldry, Power & Influence, Alliances & Rivalries, History, Key Events, Notable Members, Cross-References, and Keywords.

- It is a **superset**: it lists all 61 pre-Conquest houses **plus** the Solis / Crandona / Minara-era additions.
- **✗ Missing house: House Benen** appears on the Solis-era roster and in the Crests gallery but is **absent from this WWG index** (no dossier). Flag as gap/inconsistency.
- **✗ Spelling conflict**: the Minara roster says "**House Kilensek**"; the WWG index and the Crests gallery both say "**House Kilemsek**" (n vs m). **✓**
RESOLVED — "Kilensek" is canonical; the WWG index and Crests gallery are the typos (confirmed by Azora). Source fix needed: change "Kilemsek" → "Kilensek" in the WWG index and on the Noble House Crests gallery card.
- **⚠ Scope**: these ~114 dossiers are full structured pages and likely hold the richest per-house detail — and the highest chance of new facts or conflicts vs the terse CANON pages. They are **not yet read** (scope decision pending; see Open Questions).

RR. WWG dossiers — verified EMPTY scaffold (15 of 114 opened in FULL; rest inferred empty — PARTIAL)

- **Opened in full**: all 9 A-section dossiers (Aedria, Adiye, Amarivelle, Amecken, Anaiopana, Anasetanya, Arvento, Artian, Ashonve) **plus** the 6 most prominent canon houses (Patton, Vika, Caraen, Kulio, Dajanyi, Malrancis), spanning four different sub-hub groups.
- **! Every single one is an identical blank template** — the same skeleton (Media & Aesthetics, Quick Facts, by-era tables for Seat / Status / Power / Military / Lands / Alliances / Rivalries / Marriages / Reputation, History, Notable Members, Cross-References, Keywords) with **zero filled fields**. Only the page title differs.
- **★ New era framework (✓ consistent, more granular than the CANON timeline)**: each dossier embeds a 15-era reference scale with a calendar reset at 0 AR — Warriors' Age (8,900–7,945 BR), Classical Kingdoms (7,945–7,400), Pre-Unification (7,400–7,250), Civil War (7,250–7,217), Great Conquest (7,217–7,163), Empire founded 7,163 BR, Early Empire, Golden Millennia, Late Golden, Dark Ages (0–50 AR), Restoration, Long Stability, Blood Trials, Age of Reforms, Post-Reform, Late Modern (–2,632 AR). The BR boundaries match the timeline

spine from the CANON pages; the named eras and the AR-side scale are new but non-contradictory.

- **Conclusion:** the WWG dossier hub is an **unfilled scaffold** — a complete per-house dossier *system* with no canon content yet entered. It contributes **no facts to cross-check**. The remaining ~99 dossiers were not opened individually; on a 15-page sample across four groups they are virtually certain to be blank too. Branch coverage marked **PARTIAL** (15/114 verified blank).
-

CATEGORY 4 — RELIGION

Sources audited (FULL): Religion (main), Religion #2 (container) + its subpages "The Gods" and "The Saints."

Pantheon & Divine Family Tree — Consistent (minor spelling conflicts)

- **Old Gods (Four Brothers, born of the Great Song/Noirta):** Mikani (War & Order), Poaranji (Strength & Sailors), Renedin (Dreams & the Eternal Plane), Haxenylian (Protection & Wisdom); plus minor old god **Loart** (Wealth), who defected.
- **Family tree** (identical on the main page and "The Gods" subpage):
 - Haxenylian + mortal Lady Gaialana → twins **Vapaz** (Sky) and **Zopha** (Sea)
 - Vapaz + **Nimlye** (Queen) → **Razar** (Sun)
 - Vapaz + Iswan → **Allan** (Nature), Razar's half-sister
 - Iswan + **Finore** (Forge) → **Sielaph** (Lightning)
 - Zopha + Loart (widowed) → **Paxtino** and **Ekhasostio**, born of her tears (no father)
 - Razar + **Paha** (Horses) → **Nellebrie** (Disasters), the only 3rd-generation god
- **12 New Gods** (Circle of Eternal Light pantheon): Nellebrie, Razar, Allan, Finore, Paha, Sielaph, Nimlye, Zopha, Iswan, Vapaz, Paxtino, Ekhasostio — both sources agree on count and roster.

-  **Spelling conflicts (same entities):** Mikani vs **Mikiani** ("The Gods"); Nimlye vs **Nimyle** ("The Gods"); Ekhasostio vs **Ekhaostio** (main page uses both, e.g. "The Myth of Ekhaostio and Paxtino").
-  **RESOLVED — canonical spellings are Mikani, Nimlye, and Ekhasostio; the variants are slips (confirmed by Azora):** **Mikani** (god of war & order) and **Nimlye** are the already-locked canonical spellings used everywhere except their lone variants on the *The Gods* page ("Mikiani," "Nimyle"). For the third, **Ekhasostio** (with the middle s) wins on usage — it appears on the **Religion** page, the **The Gods** page, and the CANON AUDIT Tracking Doc; **"Ekhaostio"** (no middle s) shows up only on the *Theory of Origin* class page ("The Myth of Ekhaostio and Paxtino"). **Source fixes needed:** on **The Gods** page, change "Mikiani" → "Mikani" and "Nimyle" → "Nimlye"; on the **Theory of Origin** class page, change "Ekhaostio" → "Ekhasostio" so the myth name matches the Religion and The Gods pages.
-  Most New-God profiles on the main page are **empty template scaffolds** (Razar, Vapaz, Zopha, Allan, Paha, Nimlye, Nellebrie, Sielaph, Finore, Iswan, the Twin Gods) — large Origin / Personality / Worship / Powers / Current-Status-by-Era / Role-in-Narrative sections left blank.

War of the Gods — **Consistent;** **on dating**

- War of Gods I: triggered by Vapaz and Zopha's forbidden birth; Renedin murdered Gaialana; Haxenylian and Loart died securing victory; Vapaz became the first King of the Gods. Both sources agree.
- Roles: Vapaz outlasted Mikani; Zopha drowned Poaranji in grief; Iswan betrayed Renedin → Nimlye built the **Garden of Unspoken Names**; Finore forged the chain that briefly bound Renedin.
- **War of Gods II** (main page only, ~7,200 BR): Vapaz killed the daughter of **Soli** (the merged twin-god in mortal form) and mortal **Apharia** for their forbidden union — central to *Crown of Glory*.
-  **RESOLVED — War of Gods I is dated ~30,000 BR; the Brotherhood's "~6,000 years" line is the slip (confirmed by Azora):** The ~30,000 BR date is canon — stated outright on both the **TIMELINE** ("WAR OF THE GODS I (~30,000 BR)") and **House Kulio** ("During the War of Gods I (~30,000 BR)") —

and corroborated twice over: (1) the **Fall of the Lesser Gods** (the war's aftermath, when Vapaz judged the lesser gods) is dated **~28,490 BR** in KEY WORDS, sitting right after a ~30,000 BR war; and (2) the saints were "created after the War of Gods I," and the first saint **Aliirusk lived 18,765–18,740 BR**, comfortably after. The lone outlier is the **Brotherhood of Westwinds** line (founded 9,360 BR, "roughly six thousand years after the defeat of the gods of old"), whose math lands the defeat at **~15,360 BR** — 13,000+ years off the Fall and impossibly *after* the first saint already existed.  **Source fix needed (not yet applied):** on the **Religion page**, correct the Brotherhood of Westwinds' "roughly six thousand years after the defeat of the gods of old" — either reword the interval (to ~20,000 years, so it points back to the ~30,000 BR war / ~28,490 BR Fall) or reframe "the defeat of the gods of old" as a *different, later* divine event; it must not imply a ~15,360 BR war. Live canon pages untouched per standing policy.

Divine Laws — Consistent

- First Divine Law (Vapaz): forbids mortal–immortal unions producing children → origin of the Saint system. Second Divine Law: any god who disobeys Vapaz dies as a mortal would. Both sources agree.
-  The main page's "The Lie That Saved the World" reframes the First Law as **Iswan's** proposal (Saints as her secret plan to eventually replace the gods); flagged as an in-world secret, not a true contradiction.

The Thirteen Saints — mostly ; several

Cross-referenced the main page's "Thirteen Saints" against the "The Saints" subpage (which documents only 1–12).

-  Consistent on both: Aliirusk (1, 18,765–18,740, Finore), Bura (2, 17,600–17,540, Vapaz), Galamma (3, 15,870–15,852, Sielaph), Eren (5, 12,467–12,441, Nimlye), Argellon (6, 11,002–10,952, Paha), Siriande (7, 10,567–10,533, Zopha), Nairan (8, 10,012–9,983, Allan), Karniode (9, 9,365–9,351, Zopha), Duri (11, 8,747–8,670, Allan), Reron (12, 7,450–7,402, Vapaz).
-  **RESOLVED — Dorthargel died young, at 23 (confirmed by Azora):** Saint Dorthargel (the **4th Saint**, blessed by Nellebrie) died at **23**, not 32. The "**The**

Saints" subpage The Saints is right on both counts: it states "23 years old" outright, *and* it cross-confirms the number — Saint **Eren** (the 5th, immediately after Dorthargel) "died when he was 26, just **three years older than the saint before him**" ($26 - 3 = 23$). The lone outlier is the **main Religion page** Religion, which lists "aged 32" backed by dates **13,052–13,020 BR** (a 32-yr span) — those dates drifted to match the wrong age. Azora's ruling (canon owner): keep 23 and pull the dates back to a 23-year life. **Soft target:** anchor on the **death year 13,020 BR** (load-bearing for the saint death-order / month-creation sequence) and move birth to **≈13,043 BR**, giving a 23-year span; exact birth year can flex ±a couple years.  **Source fix needed (not yet applied):** on the **main Religion page**, change Dorthargel's "aged 32" → "aged 23" and his dates "13,052–13,020 BR" → "≈13,043–13,020 BR" (23-yr span, death year unchanged). The "The Saints" subpage needs **no** change — its "23" and the Eren "three years older" line are both correct. Live canon pages untouched per standing policy.

-  **RESOLVED — Saint Malign's ordinal (#69, confirmed by Azora): Malign is the Tenth Saint.** Four anchors agree — the main Religion page ("Tenth Saint"), the MONTHS table (Malign's month Baer = the 10th month, months created in saint-death order), the death-date sequence (Karniode d. 9,351 BR = 9th → Malign d. 9,305 BR = 10th, so Malign dies after the 9th Saint), and even *The Saints* subpage's own header (10th). The lone outlier is the **body** of *The Saints* subpage, which slips to "the ninth saint." (Dates 9,323–9,305 BR, blessed by Finore — consistent either way.)
 -  **Source fix needed (not yet applied):** in *The Saints* subpage body, change "the ninth saint" → "the tenth saint" so it matches its own header and the main Religion page.
-  **13th saint missing from the subpage:** Harnua Kulio is fully documented on the main page; the subpage stops at Reron (#12).
 -  **RESOLVED (confirmed by Azora) — documentation gap, not a contradiction.** Harnua Kulio is canonically the **Thirteenth and final Saint** on every other anchor (the main Religion page, the MONTHS table, the *Agarisono* 13th-month origin, and her own profile), so the subpage's omission is pure incompleteness. **Ruling:** add Harnua as the **#13** entry to *The Saints* subpage.  **Source fix needed (not yet applied):** on *The*

Saints subpage, append **Harnua Kulio** as the Thirteenth Saint — "The Infamous Thirteenth Saint" / "The Great Tragedy," 7,251 BR – burned 7,214 BR, anointed by **Nellebrie**; her death created the 13th month **Agarisono** and raised the second moon. (Live page untouched per standing policy; logged here only.)

-  "Four saints buried in the Kingdom of the Gods": Aliirusk, Galamma, Karniode, Duri — both agree.
-  **Esterica Kulio**: Harnua is "first daughter of Count Kulio," and **Esterica Kulio** drank the Ilkai poison meant for Solis — yet Esterica is also called **Empress** (Solis's wife). Is she a Kulio by birth who became Empress, or is "Esterica Kulio" an error?
 -  **RESOLVED (confirmed by Azora): Not an error — both are true.** Esterica is a **Kulio by birth** who became **Empress by marriage**. She is a daughter of **Count Kulio** (by his *fourth* wife), which makes her the **half-sister of Saint Harnua** (Count Kulio's daughter by his *first* wife) and a sibling of **Mihel Kulio**. She married **Emperor Solis** and became his **first Empress** — both House Kulio and House Patton state "Esterica Kulio becomes Solis's first empress." She died in **7,214 BR** drinking the **Ilkai**-poisoned cup Harnua had prepared for Solis — so Harnua's poison killed her own half-sister. **Lock**: "Esterica Kulio" = Kulio by birth, Patton/Empress by marriage; half-sister to Harnua (different mothers, same father). No source change needed — "Kulio" and "Empress" are both correct.

The Three Religions & Noirta — with spelling conflicts

- **Brotherhood of Westwinds**: founded 9,360 BR by Oleahak the Unseen; worships the Old Gods; text **Tome of Renedin**; ~5% of the world; extremist/male-centric. Disputed origin (Oleahak's fever-dream prophecy possibly stolen from his wife **Tiaeraer**).
- **Circle of Eternal Light**: founded **14,271 BR** by twin sisters **Aryanara and Vekta**; state faith of Aicruae (also Gherci, Pireaynea, Coelum); text **Zyrazithia**; triangular **Pekna** temples; 3 sub-religions; old + new worshipped equally.
 -  Founder spelling: **Veketa** (intro) vs **Vekta** (later sections).

-  **RESOLVED (confirmed by Azora):** Lock **Vekta** (no extra "e").
 "Vekta" is the canon spelling everywhere — House Catern (guardians of "Aryanara & Vekta"), KEY WORDS ("twin sisters Vekta and Aryanara"), Historical Figures ("Vekta was one of the twin prophets"), the Religion page's *own body* ("Aryanara and Vekta: The Twin Prophets"), QUOTE BANK, Magic System, the TIMELINE, and the Civil War map ("Vekta's territory"). **Veketa** appears only once — the Religion page's opening founder line — so it is the lone slip.  **Source fix needed (not yet applied):** on the Religion page, change the intro "Veketa" → "Vekta" so it matches the rest of that page and all other canon.
-  Sub-religion spelling: **Rillic** (intro list) vs **Rilic** (sub-religion section). (Leneyez, Barqeten consistent.)
-  **RESOLVED — "Rillic" (double L) is canon; the lone "Rilic" is the slip (confirmed by Azora):** Every house page that names this faith uses the double-L **Rillic** — House Mena ("Religion: Rillic"), House Vika, House Caraen, and House Liazen all agree, and it matches the locked religion map (Rillic = Vika, Caraen, Mena, Liazen). The single-L **"Rilic"** appears only once, in the Religion page's sub-religion section. **Source fix needed:** on the Religion page, change the lone "Rilic" in the sub-religion section to "Rillic" so it matches the intro list and every house page.
- **Order of the Pure Ones:** founded ~8,600 BR by **Naya of Enaner**; venerates saints, rejects gods; the "Four Abstinences"; text **Book of Purity**; persecuted in the **Massacre of Light** (King Viake); House Dajanyi among the few still openly following.
- **Noirta / the Great Song:** uncreated first cause; the Four Brothers crystallized from it; mortal belief (~30,000 BR) enabled the New Gods. The **Pertari Stairs** (soul-corruption) predate the gods; Circle and Brotherhood interpret them oppositely.  internally coherent.
-  **Saint Duri vs Gherci founding date:** the Circle section says Aryanara/Vekta's lands were "incorporated into Gherci by Saint Duri in **8,763 BR**," but Duri's lifespan is **8,747–8,670 BR** — i.e. **16 years before she was born**. (Cross-refs the standing "Saint Duri founding date" flag.)

-  **RESOLVED (confirmed by Azora) — exact year pinned: 8,717 BR.** This sharpens the standing ~8,700 BR ruling into a hard year, and applies to every Gherci-founding instance, not just this Circle-section line. **Why 8,717 BR:** it sits inside Saint Duri's lifespan (8,747–8,670 BR), so she founds Gherci at **age 30** — mirroring the canon "founder at thirty" beat (King Haliour Patton founded Aicruae at age 30). Of the credible in-lifespan options it is the *earliest*, keeping Gherci as old as possible (only ~42 years younger than Aicruae's 8,759 BR founding) so the "ancient nation" framing is least disturbed; Gherci's deeper antiquity also rests on the **Circle of Eternal Light** heritage (14,271 BR) of Aryanara & Vekta's incorporated lands, not the political founding year. Duri stays founder; her 8,747–8,670 BR lifespan is unchanged — only the founding year moves.  **Source fixes needed (not yet applied):** change every **8,763 BR** (TIMELINE, the Six Kingdoms map, KEY WORDS, Historical Figures/Saint Duri, the **Religion** page including this Circle section, the Proposed-Build draft, and the LOCATIONS flag + Aryanara/Vekta territory entry) **and** every **8,663 BR** (LOCATIONS prose, House Mava) → **8,717 BR**; and fill the LOCATIONS structured "Founded: [Date TBD]" with **8,717 BR**.

Matsiali & Pataoiut — Consistent

- **Matsiali:** matriarchal/egalitarian framework of the Solisian Empire's golden age; abolished **36 AR** by **Goteivati Zivc Patton III ("the Damned")**; survives only as fragments by Minara's era (~2,632 AR).
- **Pataoiut:** Goteivati III's replacement (36 AR) — male supremacy, emperor-worship; partially reformed by **Emperor Astyan II (~1,852 AR)** but culturally persistent.  cross-refs Goteivati III (Historical Figures).

Divine Intervention in the Civil War & Solis's Legacy — ; corroborates Civil War dating

- **Razar:** patron of Solis; contract ~7,234 BR on the Mystic Isles (a strand of hair for war-tactics genius); blinded Dame Kisaleli at the **Fight of Titian (7,217 BR)**, "Civil War Year Five."

- ★ **Corroborates Civil War = 7,221–7,217 BR** (Year 5 = 7,217 ⇒ Year 1 = 7,221), **conflicting with the WWG dossier era-reference "Civil War Period 7,250–7,217 BR"** (see Section 3 / RR).
- **Nellebrie**: lent Harnua divine power + **Ilkai** (god-killing herb) in **7,214 BR**; intended for Solis, killed Esterica instead.
- **Solis**: attacked the **Cidet** in Civil War Year Three; persecuted magic users after Esterica's death; the Circle realigned with him post-victory.
- ? **Magic-user diaspora**: said to be unresolved "until... Emperor **Goteivati Zivc III**" (~36 AR) — a ~7,250-year gap from Solis's persecution (post-7,214 BR). Confirm the span, or whether a different Goteivati is meant.
 - ✓ **RESOLVED (confirmed by Azora) — it IS Emperor Goteivati Zivc III (~36 AR); the ~7,250-year span is intentional.** No different/earlier Goteivati is meant. The same emperor who ends the diaspora is the one who **formally reinstitutes magic in the empire** — corroborated by the Academy entry, which states that *before* Goteivati Zivc III's reign the Academy "was primarily just a school for adolescent nobility, **before magic was introduced formally into the empire.**" So magic stayed taboo/suppressed from Solis's post-7,214 BR persecution all the way until Goteivati III institutionalized it around 36 AR. The long span fits a setting that routinely spans tens of thousands of years (the Saints reach back to 18,765 BR), and the "Damned" framing tracks — Goteivati III didn't *rescue* the mages so much as harness magic into the imperial machine (alongside abolishing Matsiali and imposing Pataoiut in 36 AR). No source fix needed; the chronology is sound as written. (*Note: distinct from Goteivati Zivc I, whose "ten rules" appear in the Academy lore — different emperor, not to be cross-wired.*)

Reincarnation / *Crown of Glory* — ✓ internally; ? timing

- **Minara Gonja** = reincarnation of Soli and Apharia's daughter (killed by Vapaz in War of Gods II); raised by **Siadou Gonja** = reincarnation of **Enyokia** (Vandrea's sister).

- **Empress Macenja Lora fonmenti Patton** = vessel of **Vandrea** (identity theft via Renedin's shapeshifting; "lived continuously over 10,000 years").
- **Professor Leranoan Gevhilem** = Soli (the twin gods Paxtino/Ekhasostio in mortal form).
- ★ **Disambiguation (✓ explicit):** "Soli" is NOT Emperor **Solis** Elias Patton — the page deliberately flags the near-homonym.
- ? **"Over 10,000 years":** ~7,217 BR → ~2,632 AR is ~9,850 years, so "over 10,000" reads as loose/approximate. Confirm.
 - ✓ **RESOLVED — same thematic-rounding fix as §2.E; soften wording on Religion page (confirmed by Azora):** The Religion page's claim that Empress Macenja/Vandrea *"lived continuously over 10,000 years"* is a dramatic flourish, not a literal count — identical in character to the §2.E Historical Figures fix. The §2.E resolution carries over: **"over 10,000"** should be softened to **"nearly 10,000"** (or **"~9,850–9,900 years"**) on the Religion reincarnation section. The start point (~7,217 BR, end of the Civil War / approximate point when Vandrea took the Macenja identity) and end point (~2,632 AR, Crown of Glory setting) are not in conflict — the slight variation from the HF span (~9,888 years from ~7,236 BR birth) is rounding within the same ~9,850–9,900-year window. ⚠ **Source fix needed (not yet applied):** on the Religion page's Reincarnation / Crown of Glory section, change Empress Macenja's *"lived continuously over 10,000 years"* → **"nearly 10,000 years"** (or **"~9,850–9,900 years"**). Live canon pages untouched per standing policy.

Category 4 — Conflicts

1. ✓ **RESOLVED — Dorthargel's age: 23** (not 32). "The Saints" subpage + Eren's cross-confirmation ("three years older than the saint before him" — 26 – 3 = 23) both agree. Main Religion page's "aged 32" / dates 13,052–13,020 BR are the slip. ⚠ Source fix: Religion page → "aged 32" → "aged 23"; dates → "≈13,043–13,020 BR."
2. ✓ **RESOLVED — Malign's ordinal: Tenth Saint.** Main Religion page + MONTHS table (10th month) + death-date sequence (Karniode = 9th, Malign dies after) + Saints subpage header all say 10th. The lone outlier is the Saints

subpage body ("the ninth saint"). ⚠ Source fix: Saints subpage body → "ninth" → "tenth."

3. ☒ **RESOLVED — spellings: Mikani, Nimlye, Ekhasostio, Vekta, Rillic** are canonical. Variants (Mikiani, Nimyle, Ekhaostio, Veketa, Rilic) each appear in only 1–2 slots. ⚠ Source fixes: The Gods page → Mikiani → Mikani, Nimyle → Nimlye; Theory of Origin class page → Ekhaostio → Ekhasostio; Religion → Veketa → Vekta; Rilic → Rillic wherever it appears.
4. ☒ **RESOLVED — Duri's founding date: ~8,700 BR** (same as §1.B Gherci). Both 8,763 BR and 8,663 BR are errors; the founding moves inside her 8,747–8,670 BR lifespan. ⚠ Source fix: see §1.B for full list.
5. ☒ **RESOLVED — Civil War dating: both ranges correct at different scales.** Armed war = **7,221–7,217 BR** (locked). WWG dossier "7,250–7,217 BR" = era bracket opening at Solis's birth and spanning coup → exile → war. ⚠ Source note: distinguish armed war from era bracket wherever both appear.
6. ☒ **RESOLVED — War of Gods I: ~30,000 BR.** TIMELINE + House Kulio agree; Fall of Lesser Gods (~28,490 BR) and first saint (18,765 BR) both fit. Brotherhood's "~6,000 years before 9,360 BR" (~15,360 BR) is the error. ⚠ Source fix: Religion page → Brotherhood of Westwinds interval → reword from ~6,000 to ~20,000 years.

Category 4 — Open Questions

- Is Esterica a Kulio by birth and/or Solis's Empress?
- Is the magic-user diaspora's ~7,250-year span to Goteivati III intended, and is that the same Goteivati III who abolished Matsiali in 36 AR?
- Vandrea's "over 10,000 years" vs the ~9,850 computed. ☒ **RESOLVED** — same thematic-rounding fix as §2.E; soften to "nearly 10,000" on Religion page.
- Fixed in-world dates for War of Gods I and II.

Category 4 — Gaps / Stubs

- Most New-God profiles on the main page are empty template scaffolds.

- The "The Saints" subpage omits the 13th saint (Harnua); a blank "SAINT [NAME]" template also sits on the main page.
- Several saints lack burial/relic specifics.

Category 4 — Coverage

- **FULL:** Religion (main), Religion #2 container, "The Gods", "The Saints" — all read in full and cross-referenced. The two Religion trees are largely consistent; the subpages read as an older, shorter retelling (saints 1–12 only) of the main page's fuller canon.

CATEGORY 5 — KEY WORDS AND TERMS

Coverage: KEY WORDS AND TERMS (main) — FULL. Child subpage "Emperor Goteivati's Ten Rules" — FULL. This is a glossary page (~180 entries), so findings are grouped by type rather than by entity.

Conflicts

Liazen royal death dates vs the Territorial Dispute year — The page dates the Territorial Dispute to 8,662 BR, but lists Count Jinegi Liazen (8,722–8,660 BR) and Lady Naern Mena (8,716–8,660 BR) as each "Killed in the territorial dispute of 8,662 BR." Their stated death year (8,660 BR) falls two years after the dispute that supposedly killed them.

Lady Agari Liazen's age — Given as 8,663–8,660 BR, yet described as "only 3 years old during the territorial dispute" of 8,662 BR. Born in 8,663 BR she would have been ~1 in 8,662 BR; she only reaches age 3 at her death in 8,660 BR.

Contraceptives date vs the marriage timeline — CONTRACEPTIVES says King Hailour II created them in 8,660 BR "after his wife Queen Isalian said she only wanted two children" (3 years of research). But Isalian was born 8,670 BR, received the Crown of Roses at age 12 in 8,658 BR, and married Hailour II in 8,656 BR (Grand Wedding). In 8,660 BR she was ~10 and not yet married, so she could not have been his wife setting family limits. The 8,660 BR date contradicts the 8,656 BR marriage.

- **✓ RESOLVED — move the contraceptives to ~8,653 BR (after the 8,656 BR marriage); the 8,660 BR date is the slip; Isalian connection stays (confirmed by Azora):** Isalian's dates are locked (born 8,670 BR, married King Haliour II in 8,656 BR at 14), so the only fixable element is the contraceptives date. Re-anchored to the marriage: once wed, Queen Isalian says she wants only two children, King Haliour II spends ~3 years researching, and the contraceptives are completed **~8,653 BR**. The exact year can flex a couple years as long as it falls **after** the 8,656 BR marriage. The Isalian-inspired origin is preserved — only the impossible 8,660 BR date (when she was ~10 and unwed) changes. **⚠ Source fix needed (not yet applied):** on the CONTRACEPTIVES entry, change "created them in 8,660 BR" → "~8,653 BR" (≈3 years after the 8,656 BR marriage); also bring the entry's "Haliour II" into line with the locked **"Haliour"** spelling. Live canon pages untouched per standing policy.

Battle of Little Hill / Battle of Bears — does Yujari die or survive? — The page carries two near-duplicate entries. The first implies Yujari "was burned at the stake while pregnant" while Taverlo escaped; the second says "Yujari survived" the burning and adds that Hafen's half-brother Saut ordered it. The two versions disagree on whether Yujari lived and on who ordered her execution.

- **✓ RESOLVED — Yujari DIES: burned at the stake while pregnant; the "survived" version is the error (confirmed by Azora):** Of the two near-duplicate entries, the one where **Yujari is burned at the stake while pregnant** is canon — she does **not** survive. The "Yujari survived the execution / rallied peasants to kill Saut" version is the slip and should be removed. **Saut** (Hafen's half-brother) still orders the burning, and **Taverlo still escapes**; Yujari's death at the stake stands as the outcome. **⚠ Source fix needed (not yet applied):** on KEY WORDS, delete/replace the "Yujari survived" duplicate so only the death-at-the-stake account remains, and resolve the page's own "clarify Yujari/Taverlo" to-do as **Yujari dies (burned, pregnant); Taverlo escapes**. This also **overturns** the earlier Book/Timeline note below that leaned "Yujari survives" (corrected there). Live canon pages untouched per standing policy.

Saint Duri founds Gherci in 8,763 BR — before her own birth (corroborates a standing conflict) — WARRIORS' AGE lists "Gherci (8,763 BR) – Founded by Saint Duri," but Duri lived 8,747–8,670 BR (Religion). The founding predates her birth by 16 years.

Vikistv vs Vikitsv — Within this single page the kingdom is spelled "Vikistv" (Ethnic Groups) and "Vikitsv" (Kis, Mount Aicren, Magic Tower, and most other entries).

Hailour vs Haliour — WARRIORS' AGE writes "King Haliour Layern Patton I"; every other entry uses "Hailour."

Goteivati Zivc vs Zivic — The main page uses "Goteivati Zivc Patton III"; the Ten Rules subpage uses "Goteivati Zivic Patton III."

-  **RESOLVED — canonical spelling is "Zivc" (Goteivati Zivc Patton III); "Zivic" is the typo (confirmed by Azora):** The dominant form holds the reference spine — the **main page** and **KEY WORDS** both use "**Goteivati Zivc Patton III,**" and it is already the spelling baked into the locked magic-user-diaspora ruling (#80, "Goteivati Zivc III, ~36 AR"). The lone "**Zivic**" on the Ten Rules subpage is the variant. Same profile as the Vekta / Haliour / Vikitsv slips — the dominant form wins and the outlier gets a source fix.  **Source fix needed (not yet applied):** on the **Ten Rules** subpage, change "Goteivati Zivic Patton III" → "**Goteivati Zivc Patton III.**" (Distinct from **Goteivati Zivc I**, whose "ten rules" appear in the Academy lore — same "Zivc" spelling, different emperor.) Live canon pages untouched per standing policy.

Corroborations & Resolutions

Malign = Tenth Saint confirmed — The MONTHS table places Malign's month (Baer) as the 10th month, supporting the main Religion page's "Tenth Saint" over the "ninth saint" wording in The Saints subpage.

Civil War timeline now internally coherent (but still conflicts with WWG) — Festival of Mourning (Solis named heir ~4 months before the king's death in 7,241 BR) + Jonathan/Janrano Kiva's "~20 years of exile" → Solis returns ~7,221 BR → Civil War Years 2–5 = 7,220–7,217 BR. Internally consistent (Year 1 = 7,221 BR), yet still conflicts with the WWG era-reference's "Civil War Period 7,250–7,217 BR."

-  **RESOLVED — both ranges are correct at different scales; no redating (confirmed by Azora):** The WWG dossier's "**Civil War Period (7,250–7,217 BR)**" is an **era bracket**, not the war's combat duration. It opens at **7,250 BR — Solis's locked birth year** — and spans the entire contested-succession arc that defines his life: birth → the **7,241 BR coup** → his **~20-year Mystic Isles**

exile → his return ~7,221 BR → the armed war 7,221–7,217 BR. The **armed Aicruan Civil War event** remains 7,221–7,217 BR (locked, #78). A 4-year era would be absurdly short beside the framework's other centuries/millennia-long eras, so the era-bracket reading is decisive. ⚠ **Source note (clarification, not a redate):** wherever both appear, distinguish the "**Civil War era/period**" (7,250–7,217 BR) from the **armed Aicruan Civil War (7,221–7,217 BR)**; neither date changes. (Same item as the §3/RR era-scale cross-reference at the diaspora notes, line ~532.) Live canon pages untouched per standing policy.

Esterica Kulio identity resolved — THE GOLDEN KING dates Solis's marriage to Esterica Kulio to Civil War Year Two (7,220 BR), and ILKAI confirms "Empress Esterica" drank the poisoned cup. So Esterica is a Kulio by birth who became Empress by marrying Solis — resolving the open question raised in the Religion audit. It also means Harnua Kulio ("first daughter of Count Kulio") was attacking her own kinswoman's husband.

Minara's era ≈ 2,632 AR corroborated — PATAOIUT gives Astyan II's reforms as "~1,852 AR" and elsewhere says those reforms came "approximately 780 years before Minara's era" ($1,852 + 780 = 2,632$ AR).

Spelling majority confirmed — This page consistently uses Mikani, Nimlye, Vekta, and Ekhasostio, supporting these as canonical over The Gods subpage's variants (Mikiani, Nimyle, Veketa, Ekhaostio).

Reconstruction doctrine cross-checks — The Ten Rules subpage aligns cleanly with the glossary: Article II (abolition of the old faiths) and Article III (counting time anew) match the BR/AR definitions; Article IV & VI (return of women to the home) match Pataoiut; Article V matches "correction of the record"; Article VII (the gifted "known to the state and bound to its needs") matches the post-conquest registration/persecution of magic users (People of the Mountain).

? Open Questions

PEL's value is never stated — Every currency entry cross-references PEL (Equateiy), but there is no PEL entry. For MIUAE to be the "third most valued" at ~26 USD with KIS at ~30 USD, PEL must sit ~27–29 USD, but this is never confirmed.

Jonathan Kiva vs Janrano Kiva — Flagged on the page itself: which is canon, or is one the Ananara form and the other common-tongue?

-  **RESOLVED — cross-reference to §1.D (line 77):** Canonical spelling is **Janrano Kiva**; "Jonathan Kiva" is the variant to fix. Also reconciled with #108: "Janrano Kiva" is the Ananara (formal/imperial) form of the alias; "Jonathan Kiva" is the common-tongue rendering. Ananara wins as imperial standard. Source fix pending (LOCATIONS Founder field + KEY WORDS header). Live canon untouched.

War of Gods I dating sharpened — This page dates the Fall of the Lesser Gods (the aftermath of War of Gods I) to ~28,490 BR. That deepens the Religion-audit conflict: the Brotherhood of Westwinds is said to be founded "~6,000 years after the defeat of the gods of old" (→ ~15,360 BR), roughly 13,000 years off from a 28,490 BR fall.

Magic Tower lineage — PEOPLE OF THE MOUNTAIN says the Tower was built by "descendants of Verna," but THE MAGIC TOWER says it was "first under the control of ... Ulian and his sons." Is Ulian a descendant of Verna?

Haitak — Flagged on-page: Is it Vikistv-specific? Plant-based or alchemical? Side effects / stigma?

Gaps & Stubs

ETERNAL SIGNS is a stub — The "Thirteen Eternal Signs" are introduced but the list is blank (a stray "1" then empty dividers), even though signs "Baerin" and "Garisono" are named in passing.

NERAI has two unreconciled meanings — It is both "an elixir ingredient ... Queen Mihai is noted as drinking Nerai" (A Tale of a Thousand Songs) and "a toxic yellow plant" used to make the Joyless Death poison. Are these the same substance? (Flagged TBD on-page.)

-  **RESOLVED — same plant; medicinal at low doses, poison base at high/processed doses (confirmed by Azora):** Nerai is a single bitter yellow plant with dual properties — taken as a tonic in small doses (Queen Mihai's regular drink), lethal in concentrated or processed form as the base ingredient for the Joyless Death poison. The two Key Words entries describe the same substance from different angles. This also adds sinister

depth to Mihai's death: she may have been dosed with the very tonic she trusted. ⚠️ Source fix needed: consolidate the two duplicate NERAI entries on the Key Words page into one entry that captures both properties. Live canon untouched.

TREATY OF DEOUILU — Terms and consequences marked TBD on-page.

Undefined-but-referenced terms — Several recurring elements are referenced without their own entries: Solisian Academy, Council of Seven, False Star (the prophecy's other half), Wrath of Fire, the Dream Plane / Eternal Plane, the Mystic Isles, the holy texts (Tome of Renedin, Zyrazithia, Book of Purity), and magic types (Javehet, Kari, Arolim).

Suggested Terms to Add

Terms already present in the canon that currently lack a glossary entry — listed so they can be defined, not invented. Highest-value first.

Fill referenced-but-undefined gaps:

- **PEL** — Equateiy's currency; the only one of six currencies with no entry (and Equateiy is "the richest country in the world").
- **False Star** — the second figure in the central Academy prophecy ("When the Eclipsing Sun and the False Star meet, the old god shall shatter the world").
- **Council of Seven** — the body that issues the Special Division's orders.
- **Solisian Academy** — the central institution of Books 3–4 (Special Division, Theory of Origin course, Training Grounds).
- **Wrath of Fire** — the myth event behind The Land Without Sun.
- **The Reconstruction** — the era-defining event behind BR/AR and Goteivati's Ten Rules; currently only implied.

Worldbuilding terms that recur and deserve entries:

- **Mystic Isles** — the liminal region where the Gate / world doors spawn.
- **The Dream Plane** and **The Eternal Plane / Realm of the Gods** — the two non-mortal realms underpinning Valoka, Renedin, and reincarnation lore.

- **Javehet magic, Kari magic, Arolim magic** — magic classifications referenced for the Special Division and the Oath of Memiet (or cross-reference Magic System).
- **Tome of Renedin, Zyrzithia, Book of Purity** — the holy texts of the three faiths.
- **War of the Gods I** and **War of the Gods II** — at minimum cross-reference entries; both are referenced repeatedly.
- **The Divine Laws** (especially the First Divine Law) — referenced in The Great Temptress.
- **Orcus** and **Iris** — the usurper twins at the heart of the Civil War (cross-refs at least).
- **The Undesired** — the freed-slave underclass (currently buried inside the SLAVERY entry).
- **Room of Glory** and **Hero's Hall** — named Cidet sub-sites with no entries.

Structural Note

The page has many duplicate entries, several with drifting details: PATAOIUT (×3), MATSIALI (×2–3), WEEKDAYS (×2), WARRIORS' AGE (×2), RERN (×3), NERAI (×2), Battle of Little Hill / Bears (×2, conflicting), and PEKNA/PEKNAS plus multiple CODE OF ESA entries. Consolidating each into a single canonical entry would remove a recurring source of internal contradiction (e.g., the Little Hill "Yujari survives?" split).

Coverage Report — Category 5

KEY WORDS AND TERMS (main): FULL. "Emperor Goteivati's Ten Rules" subpage: FULL. All ~180 glossary entries reviewed; cross-referenced against Locations, Historical Figures, Noble Houses, and Religion.

CATEGORY 6 — IN STORY CHARACTERS

Coverage: IN STORY CHARACTERS (main) — FULL. No child subpages. ⚠ The page is almost entirely an unfilled template: of ~6 character slots, only three

(Minara Gonia, Vandrea, Renedin) contain any content, and that content sits only in the freeform NOTES field — every structured field (Full Name, dates, family, abilities, arc, quotes) is blank. The remaining slots are empty "MAIN CHARACTER NAME" scaffolds. One image is embedded at the end.

✓ Corroborations (the NOTES that exist all reconcile with prior pages)

Minara Gonia — "true princess, doesn't know it"; mother Empress Macenja " (actually Vandrea in disguise)"; ordered executed at birth "for being female"; rescued by the Empress's maid **Siadou Gonia**; raised as a peasant. Matches KEY WORDS' ECLIPSING SUN entry (Minara the hidden true-born firstborn; execution ordered by Macenja for being female) and Religion (Minara = reincarnation of Soli & Aphia's daughter; raised by Siadou Gonia). ★ Poignant cross-ref: Siadou, who saves the baby, is (per Religion) the reincarnation of **Enyokia** — Vandrea's own murdered sister.

Minara's reincarnation — "the reincarnation of Soli and Aphia's daughter (child Vapaz killed during War of Gods II)" matches Religion exactly. ✓

Vandrea — demon attacks to destabilize faith for Renedin's barrier plan; "after 10,000 years of hatred" wants the Pattons to suffer, not merely die; replaced the Empress via Renedin's shapeshifting. Matches Religion + Historical Figures (Vandrea → Empress Macenja, killed ≈ 2,652 AR). ✓

Renedin — "God of Dreams and Eternal Plane," written out of reality by the New Gods' barrier; wants to "become chaos itself, not rule it." Matches Religion (Old God of Dreams / Eternal Plane) and KEY WORDS (Garden of Unspoken Names). ✓

★ New Details & Threads

The real Macenja existed — Vandrea "killed the real **Macenja Lorafonmenti** before imperial marriage" and assumed her identity. So Empress Macenja was a genuine person of **House Lorafonmenti** (a Minara's-era house on the "across the Eras" roster) whom Vandrea murdered and impersonated — confirming "Macenja" is a stolen identity, not an alias Vandrea coined.

Minara's parentage (cross-ref) — With Macenja as her mother, KEY WORDS' ECLIPSING SUN names Minara "the actual firstborn of **Emperor Veo Olem Patton**." So Minara and the publicly-recognized heir **Crown Prince Elleraian Betenadia Patton** are both children of Veo Olem Patton and Empress Macenja.

Minara's magic = "Gnati division" (uncontrolled/raw) — a new magic-division term not defined elsewhere yet (pending Magic System).

? Open Questions

Atriki — kingdom or city? — Minara hides in "the **Kingdom** of Atriki, Eriata District, south of Elgan," but LOCATIONS lists **Atriki** as the **capital of Coelum**, not a kingdom. Is this a Minara's-era renaming (nations are renamed by her era) or an inconsistency? "Eriata District" and "Elgan" are otherwise undefined.

Solis's alias still unresolved — the "Jonathan Kiva / Janrano Kiva" question was deferred to this page, but there is **no Solis entry here at all**, so it remains open.

-  **RESOLVED** — cross-reference to §1.D (line 77): Canonical spelling is **Janrano Kiva**. Stale deferral — resolved in the LOCATIONS/Mystic Isles batch. Live canon untouched.

🕒 Gaps & Stubs

The page is ~90% empty — only Minara, Vandrea, and Renedin have any content, and only in NOTES; all structured fields are blank for every character.

Major protagonists are missing entirely — none of the Special Division team named in KEY WORDS (Nivaeran Veir, Dahnyliein Catern, Karniode Vesmen, Isaeri Ashonve, Elleraian Betenadia Patton, Vasert Prairn, Silaena Chairameron), nor Solis, Esterica, Harnua, Orcus, or Iris, has an entry — despite this being the dedicated character page.

Embedded image — one image sits at the end of the page; its contents cannot be verified as text.

Coverage Report — Category 6

IN STORY CHARACTERS: FULL (no subpages). The page is an unfilled template; the only canon content is the NOTES for Minara, Vandrea, and Renedin, all of

which are consistent with — and corroborate — Religion, Historical Figures, and Key Words. Nothing here contradicts prior pages; the dominant finding is the near-total absence of content.

CATEGORY 7 — TIMELINE

Coverage: TIMELINE (master) — FULL. No child subpages. The front half is detailed event entries; the back half is largely an unfilled scaffold (Book 1–4 timelines, Character Lifespans, Ruler Succession, Era Overview — all blank templates). The separate "TIMELINE — Proposed Build (Draft)" is a different CANON page and is still pending.

★ Major Resolutions & Corroborations

Civil War spine confirmed — the Quick-Reference table gives Solis born 7,250 BR, Civil War 7,221–7,217 BR, Esterica dies 7,214 BR, Solis dies 7,163 BR, Astyan II reforms ≈1,852 AR, Crown of Glory 2,632 AR, final battle ≈2,652 AR — all matching prior pages. (Still conflicts with the WWG dossier's "Civil War Period 7,250–7,217 BR.")

Who destroyed House Baliva — RESOLVED — the Battle of Afera (8,151 BR) ends the War of World's End with **House Vika leading the coalition** that destroys Baliva, capping a feud that was fundamentally **House Arvento's**. So both claims were partially right: Arvento's war, with **Tilan Arvento's final blow** on Baliva's last members and **House Vika leading the coalition** (final call confirmed by Azora — the killing blow is Arvento's, not Vika's). Full arc: Battle of Aishae (8,704 BR) → Dispute at Tericaer (8,226 BR) → War of World's End (8,201–8,152 BR) → Battle of Afera (8,151 BR).

Battle of Little Hill — Yujari's fate  **RESOLVED: she DIES (confirmed by Azora; this entry's earlier "survives" lean is SUPERSEDED)** — the detailed entry states "Yujari survived the execution" and rallied peasants to kill Saut (Hafen's half-brother, who ordered the burning), which previously leaned the KEY WORDS "does Yujari die or survive?" split toward survival.  **Overtured:** Azora's canon ruling is that **Yujari DIES** — burned at the stake while pregnant — so the "survived / killed Saut" detail is the **error**; Saut still orders the burning and Taverlo still escapes. See the KEY WORDS resolution for the full ruling and source fix.

Saint death dates match Historical Figures — Aliirusk 18,740, Galamma 15,852, Eren 12,441, Argellon 10,952, Siriande 10,533 (poisoned by son Ritav), Karniode 9,351, Malign 9,305, Duri 8,670, Reron 7,402. ★ Malign (9,305) falls *after* Karniode (9,351), reinforcing Malign = the **Tenth** Saint over the "ninth" wording.

Goteivati III & the calendar — born 0 AR to **Empress Crandona Sarleia Patton**; the calendar resets at his birth (BR/AR). *A Princess in Love* is set ≈ 0 AR: **Merigen Bleelack's coup against Emperor Hevet Xacrey Patton, Crandona reclaims the throne**, and Vandrea corrupts the world doors — tying together the Crandona's-era houses (the Caprlolan-forest rebels who joined Crandona's campaign).

Blood Trials (≈1,326–1,528 AR) — a 200-year persecution (children whose magic didn't match their parents deemed bastards; ≈400,000 women + 600,000 children killed), ended by **Great Mage Takar's** 1,528 AR proof that magical inheritance is only ≈40% correlated — matching House Dajanyi's "60/40 Agreement."

Crown of Glory beats all consistent — the prophecy ("When the Eclipsing Sun and the False Star meet, the old god shall shatter the world"), the Special Division roster, Professor Leranoan = Soli, the Valoka dream-demon, and the Macenja = Vandrea / Minara = true princess reveals all line up with IN STORY CHARACTERS, KEY WORDS, and Religion.

✗ Conflicts

Pireaynea's founding — TIMELINE dates it **7,400 BR** (no founder), but LOCATIONS says **7,200 BR, founded by Deasn of Gherci**. A 200-year gap.

Magic Tower leadership — now 2-vs-2 — the TIMELINE's opening entry reproduces the LOCATIONS "**Ulian and his sons Kiear and Liaerto III ... current Grand Sorcerer is the child of Kiear**" version verbatim. So that account now has two sources (Locations + Timeline) against the **Sevtor / Liaerto I** version (House Orana + Historical Figures). The conflict is deeper, not resolved.

"War of Fera" names two different wars — ✓ RESOLVED — two separate wars share the name; both are legitimate (*was* ✗ *Conflict*) — TIMELINE equates the War of Fera with the **War of World's End** (Arvento-Baliva, 8,201–8,152 BR). But House Mena & House Dajanyi use "War of Fera" for the **Dajanyi-Mena** war (Hilatoma Dajanyi executes Fransei Mena). Same name, two unrelated conflicts.

-  **RESOLVED** — two separate wars, same name, different eras; both legitimate (confirmed by Azora): "War of Fera" is a **shared name** applied to two distinct conflicts in different centuries — not a mislabeling error on either side. **(1) War of Fera I (~8,201–8,152 BR)** = the **War of World's End** era; TIMELINE's use of "War of Fera" for that conflict is intentional. **(2) War of Fera II (~8,655 BR)** = the **Dajanyi–Mena** conflict — Hilatoma Dajanyi executes Fransei Mena (age 14), preventing Aicruae and Coelum from falling to House Mena. Both the TIMELINE and the House pages are correct; the name recurs across eras the way real historical names do. **"Afera"** (the place — Battle of Afera, 8,151 BR; House Vika's "Champions of Afera" title) remains a separate, unrelated location.  **Source fix updated:** no label needs to be removed from the TIMELINE. Instead, wherever "War of Fera" appears, add a disambiguating note (e.g. "War of Fera (~8,201–8,152 BR)" vs "War of Fera (~8,655 BR)") so readers can tell the two apart. Live canon pages untouched per standing policy.

Kalip Plague timing — TIMELINE places it in the **8,160s BR** (during the War of World's End) and has **Hailea Kulio** treating its victims then — but House Kulio & House Caraen date Hailea's death to **7,967 BR**, ≈190 years later. She cannot be in both.

Maikor / Pireaynea anachronism reproduced —  **RESOLVED** — same fix as §3.K (*was anachronism*) — the Treaty of Oahiat (8,248 BR) is described as ending fighting "with Pireaynea," yet Pireaynea isn't founded until 7,400/7,200 BR — ≈850–1,050 years later. (Same anachronism flagged on House Caraen.)

-  **RESOLVED (confirmed by Azora):** Same relabel-don't-redat fix as the House Caraen Maikor item. The Treaty of Oahiat (8,248 BR) ended fighting with **Aseraga** (one of the Four Territories that Deasn later unified into Pireaynea in 7,400 BR), not "Pireaynea" as a nation.  **Source fix needed (not yet applied):** on the House Baliva page, change the Treaty of Oahiat's "with Pireaynea" → "with Aseraga" (or "the Four Territories"), matching the Maikor-of-Aseraga relabel. Live canon pages untouched per standing policy.

Infant Laws vs the Arvento Code (internal) —  **RESOLVED** — different documents; the citation is the error (*was*  *Conflict*) — the Infant Laws (dated **8,683 BR**) are said to "build on the momentum of the Arvento Code," but the

Arvento Code is dated **8,126 BR** — ≈557 years *later*. The dependency is chronologically impossible as dated.

-  **RESOLVED (confirmed by Azora):** The Infant Laws and the Arvento Code are **two separate, unrelated documents**. The citation linking them is the error — the Infant Laws (8,683 BR) do not and cannot build on the Arvento Code (8,126 BR). Both dates stand independently; only the cross-reference between them needs to be removed or corrected.  **Source fix needed (not yet applied):** on the TIMELINE entry for the Infant Laws (8,683 BR), remove or replace the phrase "build on the momentum of the Arvento Code" — the Infant Laws should reference an earlier or contemporary legal precedent, not the Arvento Code.

Solisian Academy location — the Crown of Glory entries place the Academy at "Tarmet" (Gherci's capital), but LOCATIONS puts it on **an island in the Fetora Sea, south of the Civer–Atriki border**.

-  **RESOLVED — LOCATIONS wins; the Academy is on its Fetora Sea island; "Tarmet" in Crown of Glory is travel context, not the Academy's address (confirmed by Azora):** The LOCATIONS entry gives a precise, dedicated geographic placement — **an island in the Fetora Sea, directly south of the Civer–Atriki border** — which reads as the authoritative anchor. The Crown of Glory's association with **Tarmet** (Gherci's capital) most likely reflects **travel staging**: characters journey through or depart from Tarmet (the nearest major mainland hub) on their way to the island campus. So the two sources describe different legs of the same journey, not two different locations. **Lock: Solisian Academy = Fetora Sea island, south of the Civer–Atriki border.**  **Source note (not yet applied):** wherever Crown of Glory prose implies the Academy *is* in Tarmet rather than reachable *via* Tarmet, add a clarifying line. Live canon pages untouched per standing policy.

Renedin = Soli's "true father" — the Final Battle entry has Renedin reveal "he is Soli's true father," but Religion states the twin gods (Soli = Paxtino/Ekhasostio) were "born of Zopha's tears" with **no father**. Likely an intended twist, but it currently contradicts the pantheon's stated origin.

-  **RESOLVED — intentional three-layer reveal; no contradiction (cross-references locked Inferred Canon Fixes ruling):** (1) **Public myth** = born of Zopha's tears, no father. (2) **Assumed father** = Loart (Zopha's dead love, the

believed father). (3) **Hidden truth** = Renedin is the secret true father. All three layers are intentional — the apparent contradiction is the story's deepest reveal. Loart has been dropped per the lock. ⚠ Source note: state the three-layer structure explicitly on the relevant pages so it reads as a structured reveal. Live canon untouched.

Gherci 8,763 BR camp reinforced — TIMELINE uses 8,763 BR everywhere (Warriors' Age, Founding Dates, Saint table), siding with the Locations-flag + Historical Figures camp against the 8,663 BR (Locations-prose + Mava) camp. Still impossible against Duri's birth (8,747 BR per Religion/HF), which the timeline omits.

★ New Anchors & Details

Coelum founded 8,494 BR — a new founding date (LOCATIONS gave none).

House Hige founded 7,489 BR by Mokar Hige — timed around the Siege of Highwater (7,463 BR).

War of Gods I ≈ 30,000 BR (with the Sun-Forged created ≈30,000+ BR) — a third dating. It roughly agrees with KEY WORDS' Fall of the Lesser Gods (≈28,490 BR), leaving the Brotherhood's "≈6,000 years after the gods of old" (≈15,360 BR) as the clear outlier.

New figures — Emperor **Hevet Xacrey Patton** (deposed by Merigen Bleelack's coup), Empress **Crandona Sarleia Patton** (Goteivati III's mother; reclaimed the throne), **Sir Tonhe** (Elleraian's biological father, "a distant descendant of **Snieoa Patton**") — which confirms **Crown Prince Elleraian is Vandrea-as-Macenza's son by another man**, i.e. Minara's *maternal* half-brother. Also **Great Mage Takar** (ended the Blood Trials).

New events — Battle of Aishae (8,704 BR), Battle of Summers (≈8,250 BR) & Battle of Rivers Point (8,248 BR, establishing the Patton–Vika alliance), Dispute at Tericaer (8,226 BR), Battle of Bears (8,262 BR), and the Blood Trials.

New era labels (in the blank Era Overview table): Era of the First Song, Golden Millennia, Illusory Peace.

? Open Questions

Book 1 (A Tale of a Thousand Songs) span — the summary dates it "≈7,250 BR," but the detailed Book 1 timeline maps the Civil War years (7,221–7,217 BR). Is Book 1 Solis's whole life, or just the war?

-  **RESOLVED — Book 1 covers Solis's whole life; no contradiction (confirmed by Azora):** The summary's "≈7,250 BR" is the book's **opening anchor** — Solis's locked birth year, establishing when the story begins. The detailed chapter timeline then maps the **Civil War years (7,221–7,217 BR)** as the story's climactic stretch. They are sequential, not conflicting: Book 1 opens at Solis's birth (≈7,250 BR) and runs through the Civil War's end (7,217 BR) — a ∴33-year arc from birth to conquest. **No source fix needed** — both descriptions are correct at different levels of granularity (era-opening anchor vs. chapter-level event map). Live canon pages untouched per standing policy.

Massacre of Light queen — the page's own to-do says "fix the queen name"; the entry names "Queen Mari Patton" (compare the "Queen Mari Liazen" referenced elsewhere).

-  **RESOLVED — both names are correct; Liazen = birth house, Patton = married/royal name (confirmed by Azora):** The same pattern as Esterica Kulio → Empress Esterica (born Kulio, married into Patton). **Mari Liazen** is her birth house; **Queen Mari Patton** is her official royal title after marrying King Viake (a Patton). The "fix the queen name" to-do means: **standardize to Queen Mari Patton** in official/royal contexts; use "Mari Liazen" only when specifically noting her birth-house origin. Neither name is an error.  **Source note (not yet applied):** ensure the Massacre of Light entry and any adjacent prose use "**Queen Mari Patton**" as the default form. Live canon pages untouched per standing policy.

Minara-era nation name — TIMELINE & IN STORY CHARACTERS both say "Kingdom of Atriki," but LOCATIONS says Coelum was "renamed Hikai in the new order." Is the Minara-era nation Atriki or Hikai?

-  **RESOLVED — chain holds: Coelum (Solis's era) → Hikai (Crandon's era) → Kingdom of Atriki (Minara's era); confirmed by Azora.** Both names are correct at different points in the succession. LOCATIONS' "renamed Hikai in the new order" describes the Reconstruction-era renaming under Goteivati (Crandon's son); by Minara's era (~2,632 AR), the nation has evolved further into the **Kingdom of Atriki** — the name used in TIMELINE and IN STORY

CHARACTERS. The IN STORY CHARACTERS note that Minara hides in "the Kingdom of Atriki, Eriata District, south of Elgan" is therefore correct as a Minara's-era reference. **No source fix needed** — the three-step chain (Coelum → Hikai → Atriki) is intentional. (*The sub-questions of "Eriata District" and "Elgan" remain undefined stubs, not conflicts.*)

Gaps & Stubs

The back half is an empty scaffold — Book 1–4 timelines (Years Three & Four of the Civil War blank; Books 2–4 are just "(same format)"), Character Lifespans (mostly placeholders), Ruler Succession (blank), the Era Overview table (all start/end dates blank), Notes & Continuity Flags (blank), and a trailing empty event template.

Author's own continuity to-dos remain inline — e.g. "fix the queen name," "clarify Yujari/Taverlo," "expand existing nation founding entry," "CHECK: may already exist in your Timeline."

Pervasive per-event [TBD]s — commanders, casualty numbers, book/chapter, and POV fields are blank across most event entries.

Coverage Report — Category 7

TIMELINE: FULL (no subpages). Cross-referenced against Locations, Historical Figures, Noble Houses, Religion, Key Words, and In Story Characters. The detailed event entries are largely consistent and resolve several standing conflicts; the new conflicts above are mostly cross-page date clashes plus two internal ordering problems. "TIMELINE — Proposed Build (Draft)" remains a separate pending page.

CATEGORY 8 — MAGIC SYSTEM

Source: Magic System — single page, no subpages. Read **FULL**.

This is the system bible (origin, Blood Trials, three stages, ten divisions, demons). Most of it is internally consistent and corroborates the houses/timeline/characters work. The notable issues are a population-math contradiction, a Verna dating problem, the Magic Tower lineage (now 3-vs-2), and two competing demon sub-class schemes on the same page.

✓ Corroborations / Resolutions

- **Blood Trials dates line up.** Magic System: Takar's discovery "in 1528 AR," trials "went on for over two hundred years." Timeline: Blood Trials 1,326–1,528 AR (202 years). Consistent.
- **Takar's 40% ↔ Dajanyi "60/40 Agreement."** "the likelihood of a child inheriting a parent's magical level is only around 40%" matches the Dajanyi house figure.
- **Esterica's death (7,214 BR) via Ilkai.** Harnua Kulio's deal with Nellebrie (7,214 BR); Esterica drank the poisoned cup meant for Solis. Matches Timeline and Historical Figures.
- **Valea attack (7,217 BR, 15,000 dead) in Civil War Year Five.** Fits the Civil War span 7,221–7,217 BR.
- **House Orana's fall corroborated.** Solis used Liacaion plus the fire-weakness discovery to burn House Orana; sole survivor Mekean fled to Equateiy, line leads to Merigen Bleelack. Matches the Orana/Bleelack thread from Noble Houses and Historical Figures.
- **Crown of Glory roster matches In Story Characters.** Minara = Gnati (Code Bura, Leader); the former team's K1/K2 (Kari) died and member A (Arolim) was the crippled Frontline Manager — matches the "Special Division formed after K1/K2 deaths plus A crippled" beat.
- **Vandrea's world-door corruption.** Demon reconstitution accelerated "since Vandrea's corruption of an unstable world door during A Princess in Love" — matches Timeline's "Vandrea corrupts world doors" at about 0 AR.
- **"Goteivati Zivc III"** spelled **Zivc** here — supports the main Key Words spelling over the "Zivic" subpage variant.

✗ Conflicts

1. How much of the population has magic? (internal, same page)

- Three Stages of Magic: magic users are "80% of the entire population, roughly 344 million people."

- Paosu (Non-Magical) division: "Magic has roughly a 40% inheritance chance, meaning the majority of the population — including many nobles — are non-magical," and "The 60% non-inheritance rate means most people are Paosu, making this the silent majority of the Empire."
- These can't both be true (80% magical vs. majority non-magical). Looks like a conflation of two different 40% stats — Takar's "40% chance to inherit a parent's level" vs. a "40% chance to have magic at all."
 -  **RESOLVED — the majority are Paosu (non-magical); "80% of the entire population" is the error (confirmed by Azora):** The **344 million** magic-user count and the **40%-inherit / 60%-Paosu** framing both stand; the **"80%"** label is the slip. The math is decisive: if 344M were 80%, the total population would be only ~430M, but the nation figures already exceed that — Gherci 389M + Aicruae ~157M + Equateiy 97M + Pireaynea 67M = **~710M** before Coelum and Vikitsv. Against a realistic **~800M+** total, 344M magic users is **~40%**, not 80% — exactly matching the Paosu division's "40% inheritance chance" and "60% non-inheritance → most people are Paosu, the silent majority of the Empire." So magic is a large minority, not a supermajority.  **Source fix needed (not yet applied):** on the **Magic System** page (Three Stages of Magic), change "magic users are 80% of the entire population, roughly 344 million people" → "**~40%** of the population, roughly 344 million people" (or drop the percentage and keep the 344M count), so it agrees with the Paosu 40%/60% split. Live canon pages untouched per standing policy.

2. When did Verna live? (internal, same page)

- "Vikistv (the nation Verna founded in 7,945 BR)."
- But: "The only Javehet-ranked magic user to ever exist was Verna himself, who existed more than twenty thousand years ago" (repeated in the Utayer notes).
- 7,945 BR is roughly 8,000 years before the Reset, not 20,000-plus. Either Verna didn't personally found Vikistv in 7,945 BR, or the "twenty thousand years" figure is off.
 -  **RESOLVED — Verna founded Vikitsv in 7,945 BR; "more than twenty thousand years ago" is hyperbole/error (confirmed by Azora):** The **7,945**

BR date is canon — corroborated by the houses/timeline work (Vikitsv's founding) and, decisively, by the locked **Magic Tower lineage**: Verna → Liaerto I → Ulian → (Kiear & Liaerto III) → **Sevtor**, who is burned by Solis in **7,217 BR**. That's ~5 generations; from 7,945 BR it's a long-lived but workable ~145 yrs/generation, whereas a 20,000 BR Verna forces an impossible ~2,600 yrs/generation. A ~20,000 BR Verna would also predate the first Saint (Aliirusk, 18,765 BR) and the Circle of Eternal Light (14,271 BR) — untenable for a man whose great-great-grandson dies in 7,217 BR. The "more than twenty thousand years ago" line is in-world hyperbole for "unimaginably long ago," not a literal date.  **Source fix needed (not yet applied)**: on the **Magic System** page, soften the Utayer/Javehet "more than twenty thousand years ago" to match the 7,945 BR founding (e.g. "millennia ago" / "nearly eight thousand years before the Reset"). Live canon pages untouched per standing policy.

3. The Magic Tower lineage — now 3-vs-2.

- Magic System (this page): "Sevtor was the head of the Magic Tower... a direct descendant of Verna's eldest son, Liaerto I — making House Orana the most powerful pure-blood magic line." Agrees with Historical Figures and House Orana.
- Locations and Timeline: the Tower line runs Ulian to Liaerto III, with the current Grand Sorcerer being a child of Kiear.
- So three sources (Magic System, HF, Orana) now back the **Liaerto I / Sevtor / Orana** version against two (Locations, Timeline).
 -  **RESOLVED — false conflict; both descriptions name the same person under the locked lineage (confirmed by Azora)**: The locked chain is **Verna → Liaerto I → Ulian → (Kiear & Liaerto III) → Sevtor**. Under this chain, Sevtor is simultaneously (a) a direct descendant of Verna's eldest son Liaerto I — as Magic System / HF / House Orana state — and (b) a child of Kiear — as Locations / Timeline state. Both are true and non-contradictory; the sources are simply emphasizing different focal points of the same lineage. Live canon untouched; no source fix needed.

4. Demon sub-classes: two schemes on one page.

- First pass lists **5 sub-classes** — Attackers (Namilrane), **Spirit Demons (Valoka)**, Warriors (Lim plus Akotia Jerctika plus Zelian), Messengers (Vorel, Jali), Healers (Alem, Plova).
- Second pass ("Demon Classification System") states "These nine types fall into **six sub-classes**" — Attackers (Namilrane **plus Valoka**), **Field Demons (Akotia Jerctika)**, **Ground Shifters (Zelian)**, Warriors (Lim only), Messengers, Healers.
- Conflicts: sub-class count (5 vs 6), and Valoka's class (**Spirit Demons** vs **Attackers**); Akotia Jerctika and Zelian get regrouped between the two passes.
 -  **RESOLVED — 6 sub-classes; second pass ("Demon Classification System") is fully authoritative (confirmed by Azora):** Canon schema = **6 sub-classes**: Attackers (Namilrane + Valoka), Field Demons (Akotia Jerctika), Ground Shifters (Zelian), Warriors (Lim only), Messengers (Vorel, Jali), Healers (Alem, Plova). Valoka = Attackers (not Spirit Demons). The first pass's "Spirit Demons" label and 5-sub-class count are the slips.  Source fix needed: update the Magic System page's first-pass demon section to replace "Spirit Demons (Valoka)" with Attackers and remove the 5-sub-class framing. Live canon untouched.
 -  **RESOLVED — the 6-class "Demon Classification System" is canon; the 5-class first pass is the earlier draft (confirmed by Azora):** The nine demon types fall into **six sub-classes** — **Attackers** (Namilrane + Valoka), **Field Demons** (Akotia Jerctika), **Ground Shifters** (Zelian), **Warriors** (Lim only), **Messengers** (Vorel, Jali), and **Healers** (Alem, Plova). It wins on three grounds: it's the explicitly-titled, formal taxonomy ("Demon Classification System"), it gives a definite count, and it's more granular — breaking the first pass's catch-all "Warriors" bucket into Warriors / Field Demons / Ground Shifters. The 5-class first pass (which lumped Akotia Jerctika + Zelian under Warriors and gave Valoka their own "Spirit Demons" class) is the superseded draft. **Valoka's class = Attackers** (per the canonical 6-class system); their distinctive **spirit/dream-demon** nature (Renedin's creations) survives as flavor/descriptor, not as a separate sub-class.  **Source fix needed (not yet applied):** on the **Magic System** page, remove or down-rank the 5-sub-class first pass so only the 6-class "Demon Classification System" stands (or mark the first pass as superseded);

ensure Valoka is filed under Attackers wherever the sub-classes are listed.
Live canon pages untouched per standing policy.

? Open Questions (several author-flagged on the page)

- **Utayer vs Daseri/Haliver.** Utayer is called "Earth Magic" yet described as "elemental manipulation of fire, water, earth, and air," while Daseri (Fire) and Haliver (Water) are separate divisions. The page itself asks whether Daseri/Haliver are sub-branches of Utayer or truly distinct.
 -  **RESOLVED — Utayer is Earth specifically; Daseri and Haliver are distinct sibling divisions (confirmed by Azora): Utayer = Earth Magic**, full stop. Daseri (**Fire**) and Haliver (**Water**) are **truly distinct, parallel elemental divisions**, NOT sub-branches of Utayer. The "elemental manipulation of fire, water, earth, and air" phrasing is the slip — it describes the broad **elemental family** that these divisions collectively belong to, not Utayer's own scope. This yields a clean classical-elements split (Earth = Utayer, Fire = Daseri, Water = Haliver, with Wind/air as its own division) instead of one bloated umbrella that swallows two already-named divisions.  **Source fix needed (not yet applied):** on the **Magic System** page, narrow Utayer's description to **earth/terrain manipulation** only, and reword the "fire, water, earth, and air" line so it reads as the elemental family (Utayer / Daseri / Haliver / the wind division) rather than Utayer's personal range; keep Daseri and Haliver as standalone divisions. *(Leaves the separate Kari = "Wind" question open as its own item.)* Live canon pages untouched per standing policy.
- **Kari = "Wind Magic"?** The label says Wind, but the mechanics are enhancement/body magic. Page flags: literal or figurative?
 -  **RESOLVED — Kari is literal Wind Magic: real external air/wind manipulation; the body-enhancement effects are a secondary application (confirmed by Azora): "Wind Magic" is literal** — Kari is genuine control of **air/wind**. The enhancement/body effects (speed, agility, reflexes, lightness) are a **downstream application** of that air control — a Kari mage moving wind around and against their own body — not the core of the division. So Kari sits cleanly as the **Wind/Air** member of the

elemental set alongside Utayer (Earth), Daseri (Fire), and Haliver (Water), completing the classical quartet referenced in #88. ⚠️ **Source fix needed (not yet applied):** on the **Magic System** page, lead Kari's description with **external air/wind manipulation** as the primary power, and reframe the speed/agility/body-enhancement mechanics as a **secondary application** of that wind control (rather than the definition of the division). Live canon pages untouched per standing policy.

- **Arolim = "Holy/Healing" or "creation and alchemy"?** Page flags that the healing label may mask the feared creation/transmutation aspect.
 - **✅ RESOLVED — these are two distinct things mislabeled together; split them into separate strands (confirmed by Azora):** "Arolim" has been conflating **two genuinely different disciplines**: (1) a **Holy / Healing** strand — restorative, sanctified, body-mending magic with a benign public reputation; and (2) a separate **Creation / Alchemy (transmutation)** strand — the feared power to make, unmake, and transmute matter (the Iswan-aligned, god-like aspect people are right to dread). They are **not** one division wearing two masks; they're distinct strands that got filed under a single name. Treat **Holy/Healing** and **Creation/Alchemy** as separate magic strands going forward, even if historically grouped. ⚠️ **Source fix needed (not yet applied):** on the **Magic System** page, split the Arolim entry into its two strands — a Holy/Healing division and a distinct Creation/Alchemy (transmutation) division — with their own mechanics, reputations, and (where relevant) governing/legal status; cross-reference Iswan under the creation/alchemy strand. Live canon pages untouched per standing policy.
- **Fire weakness vs Daseri casters.** If fire is lethal to all of Verna's bloodline, how do Daseri (fire) mages operate safely? Not addressed.
 - **✅ RESOLVED — Daseri earn fire-resistance through training; the discipline itself heat-hardens its casters (confirmed by Azora):** The bloodline's innate fire/sun vulnerability (the locked Verna–Iswan bargain weakness) still applies to everyone by default — but **training the Daseri discipline confers a measure of fire immunity**. As a Daseri mage develops, they progressively **heat-harden** against flame, building the partial fire-resistance that lets them wield their own element safely. So fire-casters aren't an exception to the bargain at birth; they **overcome** the

weakness through Daseri mastery (an earned, discipline-specific resistance), which is also why fire magic is hard/rare — an untrained or half-trained caster still burns like any of Verna's bloodline. This keeps the locked fire-weakness intact (it remains the default for the bloodline, including non-Daseri) while explaining how Daseri operate. ⚠️ **Source fix needed (not yet applied):** on the **Magic System** page, add a line to the Daseri division noting that its training grants **progressive heat-hardening / partial fire-immunity** to the caster (the means by which Daseri overcome the bloodline's fire weakness), and clarify that this resistance is **earned and Daseri-specific**, not shared by the rest of Verna's bloodline. Live canon pages untouched per standing policy.

- **Rusti tier vs Gnati rarity.** The Rusti stage says its users "usually fall within the Gnati and Minarei divisions," but Gnati is elsewhere called "extremely rare" — worth a sanity check.
 -  **RESOLVED — no real contradiction; Rusti is a rare elite stage and its tiny cohort correlates with the rare-but-potent Gnati (confirmed by Azora):** Both statements stand. **Gnati** = the **mixed Mountain-plus-Sky heritage**, the most potent bloodline (both original magical peoples combined) — which is exactly *why* they're extremely rare in the general population. **Rusti** is itself a **rare, elite power stage**, so its small membership naturally skews toward those rare-but-powerful Gnati (plus Minarei). The word "**usually**" is **relative to the tiny Rusti cohort, not the population at large** — a rare top tier being over-represented by a rare, exceptionally strong bloodline is consistent, not conflicting. So "Gnati usually appear at the Rusti stage" and "Gnati are extremely rare overall" are both true at once. ⚠️ **Source fix needed (not yet applied):** on the **Magic System** page, add a clarifying half-line that "**usually fall within the Gnati and Minarei divisions**" **describes the composition of the (rare) Rusti cohort, not overall frequency** — Gnati remain extremely rare in the wider population even though they cluster at the Rusti tier. Live canon pages untouched per standing policy.

Gaps / Stubs

- **Nearly every division dossier is a skeleton.** Across all ten divisions, the fields HOW IT WORKS (Mechanism/Requirements/Casting/Manifestation), Age of Manifestation, % of Users, Legal Status, Governing Bodies, Restrictions, Combinations/Conflicts/Nullification, Key Scenes, and "Rules to Remember" are blank.
- **Two empty trailing templates** — a blank [MAGIC DIVISION NAME] template and a blank [CREATURE NAME] bestiary template.
- **Haliver** has no named user ("No named Crown of Glory characters... as Haliver users"); **Faku** has only Silaena.
- Demon entries lack threat ratings, habitats, and kill methods beyond brief notes.

★ New Entities & Lore (first appearances / expansions)

- **Oath of Memiet** — a god who fails to grant a soul-bonded follower's wish "shall cease to exist" (why Iswan couldn't refuse Verna). Strong Key Words candidate.
- **Verna's family structure** — 27 sons married to 15 sisters seeded all magic; founded Vikistv 7,945 BR.
- **People of the Mountain / People of the Sky** — the two original magical peoples, now nearly bred out except a few families (Professors Siroa and Lyanami Taten). Gnati = mixed Mountain-plus-Sky heritage.
- **The Pertari Stairs** — not a place but a condition for corrupted souls; predates the gods (before Mikani crystallized from Noirta, before Haxenylian).
- **Four Paths to Corruption** — Wrath Unchecked, the Ilkai Herb, Javehet-level magical debt, and "Souls That Refuse the Song."
- **Vekta and Aryanara** — scholars of the rebirth cycle who first documented Ilkai. (Note "Vekta" spelling — vs the standing Veketa/Vekta variant.)
- **Razar** — the god shielding Solis; Nellebrie's power was needed to bypass that shield.

- **Gifted Objects** — magic "batteries" co-developed by House Arvento and Vikistv mages.
- **Maeret Orana** — Sevtor's third son, experimented on to find the fire weakness.

Notable Cross-References

- **Special Division code names are saint names.** Code names Aliirusk, Galamma, Argellon, Malign, Reron, Nairan, Bura, and Dorthargel map onto the saints listed in Historical Figures/Religion. Notably the Daseri user is "Karniode Vesmen" (code Nairan) while "Karniode" is also a canon saint — confirm the reuse is intentional homage, not a duplicate.
 -  **RESOLVED — intentional homage; devotional naming tradition; no conflict (confirmed by Azora):** The agent **Karniode Vesmen** is a person named after Saint Karniode (#9, d. 9,351 BR, blessed by Zopha) — not a duplicate of the saint. Naming children after revered saints is a natural devotional tradition in this world (the code-name system itself being built entirely from saint names underscores how deeply saint-veneration runs). The two-layer coincidence (given name = Saint Karniode; code name = Saint Nairan) is intentional characterization, not an error. No source fix needed. Live canon untouched.
- **Liacaion** (gasoline equivalent) and **Sun-Forged** both appear here and in Key Words — consistent usage.
- **Cold / Mount Aicren** ties together Vikistv, the magic-user fire weakness, and where Ilkai grows (Nellebrie plus Iswan overlap).

CATEGORY 9 — LANGUAGE

Source: Language — single short page, no subpages. Read **FULL**.

A brief page mapping languages to nations. Mostly self-contained; the main value for the audit is a new spelling conflict and a clean cross-check of the empire's six nations.

✓ Corroborations

- **Pocorki = Pireaynea's language**, "crude and rude" — matches the Pocorki reference noted in Key Words.
- **Six nations accounted for**. The page assigns languages to **Aicruae, Gherci, Coleum, Pireaynea, Vikistv, Equateiy** — the same six countries referenced elsewhere ("across all six countries," Magic System). Worth a final cross-check against Locations, but the set lines up.
- **Vikistv** spelled with the **-stv** ending here (consistent with one side of the standing Vikistv/Vikitsv split).

✗ Conflicts

1. Coleum vs Coelum (spelling).

- **✓ RESOLVED — canonical spelling is Coelum; Language page's "Coleum" is a typo (confirmed by Azora)**. Every other source — LOCATIONS, TIMELINE, both maps, the Name Evolution Across Eras chain (Coelum → Hikai → Kingdom of Atriki), era rosters, Religion, KEY WORDS — consistently uses **"Coelum."** The Language page's "Coleum" (missing the inner 'e') is a lone transposed-vowel slip. ⚠ Source fix: on the Language page, change **"Coleum"** → **"Coelum"** in the Speail-language entry.

? Open Questions

- **Is "Asata" a language?** Earlier notes referenced an Ananara/Asata/Pocorki grouping, but this page lists no language called **Asata** (it has Ananara, Kurti, Speail, Pocorki, Traer, Jal'vae, Dorrena, Audru, Lato). Confirm whether Asata exists elsewhere (Name Evolution? Key Words?) or was a stray.
 - **✓ RESOLVED — Asata exists; it is the sacred divine language, not a mortal tongue (cross-references locked ruling from #84)**: Asata is the **language of the gods** — used in prayer, divine communication, and sacred ritual; known to the Kulio family through their divine connections. It is not listed on the Language page because that page catalogs **mortal spoken languages**; Asata sits in a separate divine register. No conflict — its absence from the Language roster is correct. Live canon untouched.

-  **RESOLVED — Asata is real: a sacred/divine "language of the gods," not a mortal national tongue (confirmed by Azora):** Asata exists, but it's a *different kind* of language — the divine/liturgical "language of the gods" named by **House Kulio** — which is exactly why the **Language** page omits it. That page maps the six nations' **mortal** tongues (Ananara, Kurti, Speail, Pocorki, Traer, Jal'vae, Dorrena, Audru, Lato); a sacred tongue of the gods wouldn't appear on a national-language map. House Kulio is a fitting keeper — a Leneyez house with strong divine/saintly ties (it produced the 13th Saint, Harnua). So Asata is **not** a stray and **not** one of the nine national languages; it's a separate, sacred register reserved for the gods/divine matters.  **Source fix needed (not yet applied):** give Asata a home entry — add it to the **Language** page (and/or **KEY WORDS**) as the sacred "language of the gods" (distinct from the nine national tongues), cross-referenced to House Kulio. Live canon pages untouched per standing policy. *(Also clears the matching "Asata" entry in the GAPS / STUB ENTITIES list.)*
- **Is there a common/imperial tongue?** The page never states which language serves as the empire-wide lingua franca after Solis's conquest — given Ananara/Kurti is the most fleshed-out (26-letter alphabet), is it the default? Not stated.
 -  **RESOLVED — Ananara is the imperial standard; Kurti is its spoken vernacular form (confirmed by Azora):** Ananara serves as the Solisian Empire's formal and official tongue — used for official documents, imperial correspondence, and formal naming (Solis's personal note to Harnua is "written in Ananara"; "Janrano Kiva" is described as the Ananara form of the alias). **Kurti** is the spoken vernacular of Aicruae — the everyday common form of the same linguistic root, the 26-letter alphabet belonging to this register. Together they form a diglossia: Ananara = formal/written imperial standard; Kurti = spoken/common tongue of the dominant nation.  **Source note (not yet applied):** annotate the Language page's Ananara and Kurti entries to reflect this formal/vernacular relationship and note Ananara's status as the empire's official tongue. Live canon untouched.
- **Coleum as its own nation vs. paired with Gherci.** They share Speail; confirm Coleum is a distinct country and not a region of Gherci.

-  **RESOLVED — Coelum is one of the six distinct sovereign nations (cross-references locked canon):** Sharing the Speail language with Gherci does not make Coelum a Gherci region — multiple peoples can share a language. Coelum is independently attested as one of the six kingdoms across every source (LOCATIONS, the Civil War map, the era-chain, the era rosters, the six-nation faction map). It has its own capital (Atriki), its own founder (Yuavekio), its own currency (Opeali), its own noble houses (Kifan, Jivaya, Ochanan), and its own distinct atheistic character. Live canon untouched.

Gaps / Stubs

- **No grammar, phonology, or sample vocabulary** for any language beyond a one-line flavor description each.
- **The Kurti alphabet exists only as an embedded image** — no transcribed letter list, so the "26 letters" can't be verified in text. (Numbers are described as "plug-on" combinations of digit symbols.)
- Speail flavor line has a typo — "language of the wales" (whales).

New / Confirmed Lore

- **Language-to-nation map:**
 - Aicruae — **Ananara** (spoken), **Kurti** (written, 26 letters)
 - Gherci and Coleum — **Speail** ("language of the whales," deep/bellowing)
 - Pireaynea — **Pocorki** (crude, country flair)
 - Vikistv — three blends: **Traer** (Speail+Pocorki), **Jal'vae** (Speail+Ananara), **Dorrena** (Kurti+Audru)
 - Equateiy — **Audru** (rural, aggressive) and **Lato** (romantic, fancy)
- **Audru** is shared (Equateiy + Vikistv's Dorrena blend), implying cultural overlap between those nations.

CATEGORY 10 — QUOTE BANK

Source: QUOTE BANK — single page, no subpages. Read **FULL**.

Primarily a curated quote collection organized by book and character. For audit purposes it does two things: it **corroborates** a lot of established relationships/events, and Renedin's climactic monologue is the **single most lore-dense passage in the canon** — it confirms (and complicates) the Soli parentage thread.

Corroborations

- **Iris dies at Rewqo.** Mihel's counsel to Solis is tagged "Ch. 53-54 (after Iris dies at Rewqo)" — matches the Battle of Rewqo (7,218 BR) from Locations.
- **Esterica vs Harnua, Chapter 27 tea party.** Both women's entries place their first open clash at the Ch. 27 tea party, with Harnua's "Your horse will get tired soon" foreshadowing Esterica's poisoning — consistent with the Ilkai/Esterica death thread.
- **Esterica references "the previous queen"** she refuses to share a fate with, and the "Bregaria necklace... from Isalian's collection" — ties to Queen Isalian/Isilian Liazen's documented perfume/jewelry legacy.
- **Minara and Elleraian are siblings.** Minara begs Leranoan/Soli to save Elleraian — "he's my little brother... the only family I have" — matching In Story Characters (Elleraian = her maternal half-brother).
- **Leranoan = Soli, the renounced god.** His quotes confirm he "existed alone for thousands of years" and renounced godhood after Apharia's death — matches Locations (Café Iri), Religion, and Historical Figures.
- **The Crown of Glory prophecy** is quoted verbatim as on the Timeline: "When the Eclipsing Sun and the False Star meet, the old god shall shatter the world" (Academy archives, Ch. 27); "Eclipsing Sun" = Minara, the Emperor's hidden firstborn.
- **Vekta's quote** (spelled **Vekta**, about 14,300-14,200 BR) is about "souls who deliberately seek corruption to escape Noirta's cycle" — corroborates the Magic System "Souls That Refuse the Song" corruption path.
- **Orcus's "There are no gods, only men"** ties his arc to the series title and contrasts with Solis pledging to Razar — consistent with his established

atheism/grievance.

★ Renedin's monologue — major lore (Book 4)

This single speech "rewrites the entire cosmology":

- **Renedin is Soli's true father.** "You really think that fool Loart is your father?... it was I who fathered you." Renedin says he lingered in Zopha's grief after **Loart's** death and manipulated her into creating Soli.
- **Soli = Paxtino specifically**, "the great almighty god of rebirth, the physical manifestation of Noirta," creator of the world portals — while **Ekhasostio** is called Soli's "other half" who "proved to be a disappointment."
- **Renedin orchestrated Apharia's and the child's deaths** by whispering to **Vapaz** and leading him to them; he has controlled Soli through that grief for millennia; and **he corrupted Vandrea's soul**.
- **Gods die permanently** — "once we die, we vanish... slower and more painful than a corrupted mortal soul"; no reincarnation for gods. (Corroborates the Magic System / Noirta cosmology where only humans cycle.) Renedin watched "my brothers die that way."

✗ Conflicts / ? Open Questions

1. Is Soli both twins, or only Paxtino?

- Renedin (here): Soli **is Paxtino**; **Ekhasostio** is a separate "other half" and "a disappointment."
- Locations + Historical Figures: "Soli (**Paxtino/Ekhasostio** in mortal form)" — treats Soli as *both* twins.
- Needs clarification: are Paxtino and Ekhasostio two distinct gods (one of whom is Soli), or two halves of one being? The phrase "two twin gods with one soul" muddies it further.
- ☒ **RESOLVED** — **Soli = both Paxtino AND Ekhasostio, two souls in one mortal body (confirmed by Azora; cross-references the locked ruling):** LOCATIONS/HF "Soli = Paxtino/Ekhasostio in mortal form" is the correct canonical framing. Renedin calling Ekhasostio "a disappointment / the other

half" is **character bias** — as their secret father, Renedin favors Paxtino and resents the unwanted second soul that came along, but both souls share the body that becomes Soli. The "two twin gods with **one** soul" phrasing elsewhere is the locked error (it is **two** souls, one body). No names or dates change. ⚠️ **Source fix needed (not yet applied):** change "two twin gods with one soul" → "two souls" wherever it appears. Live canon pages untouched per standing policy.

2. Soli's parentage — now a three-layer reveal (largely resolves the Timeline conflict).

- Religion: the twins were "born of Zopha's tears, no father" (the public myth).
- Quote Bank: **Loart** was the *assumed* father; **Renedin** is the *secret true* father.
- Read together this looks intentional — "no father" is the in-world legend, Loart the believed father, Renedin the hidden truth. Worth stating that layering explicitly in canon so it doesn't read as a contradiction. **New name: Loart** (Zopha's dead love / Soli's presumed father).

3. Who is "Lady Gaialana"?

- The editorial note says Renedin "murdered **Lady Gaialana**," but the monologue itself names only **Apharia** (Soli's mortal love) and "that wife and child of yours" killed by Vapaz. Is Gaialana an alternate name for Apharia, the name of the child, or a separate victim? Unresolved naming.

4. Spelling. The Book-1 advisor is "Jaifey **Yuera**" here — the same Yurea/Yuera split already on the watch list.

Gaps / Stubs

- **Book 2 (A Tale of Three Sisters)** — Enyokia, Vandrea, and Apharia Asleleri entries are empty ("Continue format").
- **Book 3 (A Princess in Love)** — entirely empty ("Same format").
- **All six Thematic-Quote sections** (Revenge, Family & Betrayal, Power & Corruption, Faith & Doubt, Love & Sacrifice, Cycles) are empty templates; so are Promotional Picks, Series Tagline Candidates, Prose Moments, and "Quotes to Write."

- **Pervasive [TBD] chapter/placement fields** throughout Book 1 and Book 4. Several Orcus/Iris lines are sourced to an external "Zyrathi quotes doc" that "needs chapter placement."

★ New Entities & Lore (first appearances here)

- **Kyatane Arvento** — author of the in-world treatise "**The Rise and Fall of a King**" (the source of Aicruae's kingship philosophy; Solis quotes and resents her line about the tides). Referred to as "she."
- **Queen Mihai Julie Patton** — a House Vika queen married to **King Benjamin Lawrence Patton II**; her grief over "the affair" and Solis being favored implies she is the **mother of Orcus and Iris** (their maternal Vika link). Confirm against House Vika / Patton.
- **Orcus Emere Patton** and **Iris Aleka Patton** — full middle names recorded here.
- **Orcus's loyalists: Dame Kisaleli** (dies at the **Fight of Titian**, Ch. 62), **Ser Taryria** (Ch. 63), **Dame Exara** (Ch. 63) — plus the late-war battle/chapter spine (Ch. 62-64, Orcus's fall at Ch. 64).
- **The Nightmare Realm Trial** (Crown of Glory) — where **Elleraian** falls into a coma; **Dahnyliein Catern** pledges "I'll wait for you," establishing a **Dahnyliein/Elleraian** romance.
- **False Star** — still undefined here (only "Eclipsing Sun" is glossed), confirming the standing Key Words gap.

CATEGORY 11 — BOOK INFO PAGES (THE FOUR TALES)

Sources: A TALE OF A THOUSAND SONGS BOOK INFO (*PARTIAL — roster, lead profiles, and full chapter appendices read; middle profile blocks truncated*); A TALE OF THREE SISTERS (*FULL*); A PRINCESS IN LOVE BOOK INFO (*FULL*); A CROWN OF GLORY BOOK INFO (*PARTIAL — lead profiles + full plot outline/clarifications read; some mid profiles truncated*).

These are the richest primary sources in the canon and they **settle a large number of standing conflicts**. Each also has author-flagged "CONFIRM" notes (useful —

the author already knows about several issues).

Book 1 — A Tale of a Thousand Songs (*PARTIAL*)

✓ Resolves / corroborates

- **The ~20-year coup-to-war gap is CONFIRMED and intentional.** Appendix A spells it out: coup Ch. 4 = 7,241 BR (Solis age 9) → ~20-year exile (Razar pledge, mercenary army) → war begins Ch. 9 = 7,221 BR (Solis 29, twins turn 35). This fully resolves the standing "erupted immediately" wording problem from House Patton — the book's own timeline has the exile.
- **Date spine all locks:** Solis 7,250-7,163 BR (87, 53-yr reign); twins born 7,256 BR; Iris d. 7,218 (Rewqo, Ch. 53); Orcus d. 7,217 (suicide, Ch. 64); Esterica 7,248-7,214; Maen b. 7,217, d. 7,140; Sevtor/Valea/15,000; Maeret experiments; Mekean → Merigen Bleelack. All consistent.
- **The twins' mother is confirmed: Queen Mihai Julie Patton** (of House Vika, daughter of **Duke Rarielo Vika**), d. ~7,243 BR — confirming my Quote-Bank inference. Both twins inherited her brown hair (vs Solis's blonde).
- **Mihel lost the eye AND leg in Year Two** (Appendix A, matching LOCATIONS' Bareta placement) — weakens House Kulio's "Year One" eye claim.
- **"Agarisono" (the 13th month) is now defined:** created by Harnua's death as the 13th Saint (40 days); she also raised a second moon for Orcus. Closes a standing undefined-term gap.

✗ Conflicts

- **Coyre's birth year:** Solis's profile says **7,214 BR**, Coyre's own profile says **7,215 BR** ("two years into Solis's rule"). Internal.
 - **✓ RESOLVED — 7,214 BR is canon; Coyre's-profile "7,215 BR" is the slip (confirmed by Azora):** The 7,214 date is hard-anchored from two independent directions: **Esterica Kulio died in 7,214 BR, "six months after giving birth to Coyre,"** and **House Patton's Coyre entry says she was "born ~6 months before her mother's death."** Since Coyre must be born *before* Esterica's locked **7,214 BR** death, a 7,215 birth is chronologically impossible. The "two years into Solis's rule" aside is a loose/miscounted

phrase. **Lock:** Coyre b. ~**7,214 BR** (~6 months before Esterica's death); sibling of Maen (b. 7,217 BR). **⚠ Source fix needed (not yet applied):** change Coyre's own profile "7,215 BR" / "two years into Solis's rule" → "7,214 BR" (~6 months before her mother Esterica's death). Live canon pages untouched per standing policy.

- **Length of the twins' reign:** Iris/Orcus profiles say they "co-ruled for approximately **7 years**" before Solis returns, but the timeline (coup 7,241 → war 7,221) requires ~**20 years**. Internal contradiction.
 - **✅ RESOLVED — the twins co-ruled ~20 years (≈7,241–7,221 BR); "approximately 7 years" is the error (confirmed by Azora):** Iris and Orcus seized power in the **7,241 BR coup** and co-ruled until Solis's return and the **Civil War in 7,221 BR** — a span of roughly **20 years**, exactly matching Solis's locked **~20-year Mystic Isles exile**. Both fixed points (the 7,241 BR coup and the locked 7,221 BR war/Civil-War start) force a ~20-year co-rule, and the twins die right at the end (**Iris 7,218 BR, Orcus 7,217 BR**). The "co-ruled for approximately 7 years" on the Iris/Orcus profiles is the lone slip — keeping it would require moving the locked coup or war date and break confirmed canon. **⚠ Source fix needed (not yet applied):** on the **Iris** and **Orcus** profiles, change "co-ruled for approximately 7 years" → "approximately **20 years**" (~7,241–7,221 BR). Live canon pages untouched per standing policy.
- **"Haruna" vs "Harnua" and "Jaifey Yuera" vs "Yurea"** both appear on this page — same standing spelling splits.
- **Author-flagged (Appendix C):** Jonathan Kiva vs Janrano Kiva (Ch. 5 vs 6 — "common-tongue vs Ananara?"); **Fazen vs Ilkai** (Ch. 67 Harnua seeks the fast poison "Fazen," Ch. 68 she uses Ilkai — confirm switch vs error); plus Queen Mihai's exact death date and several repeated chapter titles.
 - **✅ RESOLVED — intentional poison switch, not an error; Fazen and Ilkai are both real and distinct (confirmed by Azora):** **Fazen** is Harnua's *first* plan (Ch. 67) — a mundane **fast-acting, traceless poison** (the New-lore entry already lists it as "distinct from Ilkai"). But a mortal poison can't kill **Solis, who is god-blooded**, so she escalates (Ch. 68) to **Ilkai** — the **god-killing herb** of Mount Aicren she obtains through her **divine pact with Nellebrie** in 7,214 BR. The Ch. 67 → 68 change is the deliberate beat where

her plot turns from ordinary assassination into *deicide* (which is why it needs a god's gift); Esterica then drinks the Ilkai cup meant for Solis. Both names stand — neither is a typo. **No source fix needed** — optionally add a one-line note in the Ch. 67–68 book material that Harnua abandons Fazen for Ilkai precisely because Solis's divine nature defeats a mortal poison.

★ New lore / entities

- **Fazen** (fast-acting traceless poison, distinct from Ilkai); **Treaty of Deouilu** (broken Year Three); the **second moon**; **Agarisono**.
- New named cast: **Yera Haswengea** (Iris's enslaved "wife"), **Count Eserindeo Kulio** (the Kulio siblings' father), **Vinala Hinkina**, **Dame Kisaleli Jaeren** + her trainer **Ser Wanez**, **Ser Taryria der Vermer**, **Dame Exara Aedria** & daughter **Lady Olia Aedria**. Many minor names map onto Solis-era houses (Hinkina, Faserat, Uetain, Liqa, Demai, Amecken) — consistent.
- **Snieoa & Bier Patton** (Solis's children by Tixsei) — important: **Sir Tonhe** (Elleraian's father in Book 4) is a "distant descendant of Snieoa Patton," so this line carries forward.

Book 2 — A Tale of Three Sisters (*FULL*)

✓ Resolves / corroborates

- The three sisters, Ceval's execution, Natav Yailk's betrayal, Heian Orana, the Renedin deal (~7,100 BR), Apharia killed by Vapaz with her daughter (→ reincarnated as Minara), Zopha as Soli's mother — all consistent with In Story Characters, Historical Figures, and House Yailk.
- **"Tenami" = Isenaylini confirmed as a naming problem by the page itself.** It explicitly asks whether the sisters' mother "Tenami" is a nickname/old name for Isenaylini — matching the HF flag. (And Negiet's nation is acknowledged as the Equateiy-vs-Vikitsv question we resolved toward Vikitsv.)
- **Haitak** (Vandrea's anger drug) is confirmed as needing a Key Words entry — matches the standing gap.

✗ Conflicts

- **The stepmother has two names on one page:** Apharia's profile calls Ceval's third wife **Madame Saiye**; the backstory timeline calls her **Madame Aimyeida**. (Saiye also collides with Emperor Maen's wife Saiye — already flagged.)
 -  **RESOLVED — the stepmother's canon name is Madame Aimyeida; "Madame Saiye" is the slip (confirmed by Azora):** Ceval Asleleri's third wife (the Asleleri sisters' stepmother) is **Madame Aimyeida**. Choosing Aimyeida fixes two things at once: it settles the same-page two-names contradiction, and it removes the needless collision with **Empress Saiye**, one of Emperor Maen's three wives a generation earlier (already logged as a real name in §2.D). "Aimyeida" gives the stepmother a clean, unique name and keeps Empress Saiye unambiguous, so the "Madame Saiye" in Apharia's profile is the error.  **Source fix needed (not yet applied):** in *A Tale of Three Sisters*, change "Madame Saiye" → "Madame Aimyeida" in Apharia's profile so it matches the backstory timeline. Live canon pages untouched per standing policy.
- **Soli: one soul or two?** Book 2 says Paxtino and Ekhasostio are "two gods with **different souls** sharing one body"; the Quote Bank monologue says "two twin gods with **one soul**." Direct contradiction on the core nature of Soli.
- **Ceval's death method:** beheaded (canon prose) vs "burned by fire" (Equateiy townsman) — author-flagged, and matches House Yailk's "burned" version.
 -  **RESOLVED — both accounts are true: Ceval was beheaded, then his head was thrown into fire (confirmed by Azora):** The narrative prose is literally correct — City Lord Ceval Asleleri was **beheaded** — and the "burned by fire" reports (the Equateiy townsman and House Yailk's account alongside Natav Yailk) are also true: after the beheading, his **head was cast into the fire**. So it's one execution remembered from two angles, not a contradiction. The detail lands thematically too — Ceval is a **Vikitsv sky-person** (fire is lethal to his people; he lights the red torch as the "fire can kill us" danger signal), so burning the severed head is Solis driving the point home with their race's own secret weakness.  **Source fix needed (not yet applied):** add a half-line to the *A Tale of Three Sisters* execution beat making the sequence explicit — beheaded, then the head burned — so the prose and the townsman/House Yailk "burned" accounts read as

one event rather than rival versions. Live canon pages untouched per standing policy.

- **Book timeline range** is author-flagged (~7,214-7,208 BR vs ~7,200-7,100 BR).
 -  **RESOLVED — the book's timeline is ~7,214-7,208 BR; the ~7,200-7,100 reading is the same drift already corrected (confirmed by Azora):** *A Tale of Three Sisters* spans the tight window from the **fall of Vikitsv (~7,214 BR)** through the sisters' flight (~7,213-7,211 BR) to **~7,208 BR**, matching the *Crown of Glory* book info. The competing ~7,200-7,100 BR range is the **same ~100-year drift** we already corrected when fixing Vandrea & Apharia's impossible ~130-year "mortal" lifespans (the ~7,100 BR endpoints were pulled back into the ~7,200s). The only legitimately-later thread is **Soli's own ~7,200-7,100 BR mortal span**, which can run a bit past the sisters' core arc — but the *book's* timeline is the tight ~7,214-7,208 BR window.  **Source fix needed (not yet applied):** wherever the book is dated ~7,200-7,100 BR, normalize to **~7,214-7,208 BR** (keeping Soli's separate mortal-span dates intact); this pairs with the already-flagged Historical Figures lifespan fixes (Apharia ~7,233 – ~7,200 BR; Vandrea's immortality ~7,200 BR). Live canon pages untouched per standing policy.

Book 3 — A Princess in Love (*FULL*)

Resolves / corroborates (this is the Crandona-era keystone)

- **Merigen Bleelack fully fleshed out** as the Verna-descended traitor (the Mekean/Orana line from Book 1): seduces Crandona, coups and kills **Emperor Hevet Xacrey Patton**, rules 6 years with Sueli, killed by Crandona — his residual magic lets Vandrea corrupt the world doors. Ties Book 1 → Book 3 cleanly.
- **Crandona Sarleia Patton** (b. 25 BR, the 94th princess, parents Emperor **Hevet Xacrey** + Empress **Niara Werez Patton**) gives birth to **Goteivati Zivc III "The Damned"** at **0 AR** — the calendar reset / "Reconstruction." Matches the Timeline.
- **How Goteivati becomes the tyrant is resolved:** the dark-magic child **Reio** (Merigen + Sueli, via Vandrea/"the Wise Woman") dies and his corrupted soul

is merged into Goteivati — which later drives him to destroy the **Matsiali** culture and usher the **Dark Ages** (ties to the Key Words Matsiali → Pataoiut thread).

- **Goteivati's dual heritage:** sky-people blood via **Esterica Kulio's line** (through Crandona) + mountain-people blood via Merigen/Verna — elegantly links the Patton succession back to Book 1.
- **Caprlolan-forest rebels fully confirmed**, matching the Noble Houses Crandona findings: Danik Malrancis (b. 66 BR, killed by Avromvog), Hicksora Connorrita, Ala Reidskelisia (kills Avromvog), Amuseri Pontia, **Thoati Gribela** (★ surname RESOLVED — was "unknown"), Eveli Cathon, Wioli Schmidtavaca (40+ arrows, folk song), Avromvog Stanyad.
- ★ **House Benen is canon (RESOLVED):** Hicksora's murdered forced husband is **Marquess Benen** — so the house missing from the WWG index is real (Solis-era roster + here).

✗ Conflicts / questions

- **Merigen's reign length vs the rebellion clock:** he "rules for six years," yet the rebellion runs "~1-14 AR" and **six-year-old Reio** dies at the climactic ~14 AR siege — the 6-year reign, the 14 AR siege, and Reio's age can't all be right.

✓ **RESOLVED (confirmed by Azora — adopt the ~15-year reign):**

- **Ruling: the reign/rebellion clock is ~15 years (rebellion ~1 BR–14 AR), NOT six. The "six years" phrasing is the error and is to be rewritten everywhere it appears.** The ~14 AR siege and Reio's age (6) are kept; the short reign is discarded.
- **Anchor set:** coup (Merigen kills Emperor Hevet Xacrey Patton) ~1 BR → Merigen's reign ~1 BR–14 AR → siege / Crandona reclaims throne ~14 AR. **Reio born ~8 AR, dies age 6 at the ~14 AR siege** ✓ (he lives only the *final* ~6 years of the reign, not the whole thing).
- ⚠ **Source fixes needed (not yet applied) — "six years" → "~15 years":**
 1. *A Princess in Love* book info: "ruled for six years with Sueli" **and** "Reio lives for the six years of Merigen's reign" → reign ~15 years; Reio born

~8 AR and lives only his final ~6 years (he no longer spans the entire reign).

2. House Mena: "killed ... during his **six-year** [reign]" → "~15-year."

3. House Patton: "ruled for **six years** with Sueli" → "~15 years."

-  **RESOLVED — Goteivati's 0 AR birth vs. Reio's soul-merge (#68, confirmed by Azora):** No conflict with the ~15-year clock — Goteivati is born **before** the siege; the soul-merge happens **after**. Canon owner's ruling: **Merigen & Crandona marry 2 BR → Crandona conceives late 1 BR → Goteivati III born 0 AR** (calendar reset = his birth, preserved). The ~14 AR siege and the #67 ~15-year reign stand unchanged. Because Goteivati (~14 at the siege) is already alive when **Reio** (age 6, b. ~8 AR) dies at the ~14 AR siege, Crandona's death-magic merges Reio's corrupted soul into her **living** son — not an unborn baby. Goteivati is born an ordinary Patton child of Merigen + Crandona and becomes "The Damned" only when he receives Reio's soul ~14 years later.
-  **Mechanism (locked):** Goteivati & Reio are half-brothers — both Merigen's sons (Reio by the maid Sueli; Goteivati by Crandona) — so the dead half-brother's soul is merged into the living one at the siege. Goteivati's dual heritage (sky-people via Esterica Kulio/Crandona + mountain-people via Merigen/Verna) is unaffected.
-  **Source fix needed (not yet applied):** On **A PRINCESS IN LOVE BOOK INFO** and **Inferred Canon Fixes**, reword "born ... already carrying Reio's soul" / "bears Goteivati at 0 AR — already carrying Reio's soul" → Goteivati is **born 0 AR a normal child**; Reio's soul is merged into him at the **~14 AR siege** upon Reio's death. Optionally add the marriage/conception anchors to the **TIMELINE** (Merigen × Crandona 2 BR; conception late 1 BR; birth 0 AR).
- **Avromvog Stanyd vs Stanyad** (character list vs profile) — minor spelling.
- **Theolisseia** (Merigen's birthplace) is a new location with no **LOCATIONS** entry. **Caprlolan** appears as both a "Kingdom" and a "forest."

Book 4 — A Crown of Glory (*PARTIAL*)

✓ Resolves / corroborates

- **Minara, Elleraian, Vandrea, the whole Special Division** match In Story Characters + Magic System exactly — including the full roster and the former team (A / K1 / K2). **Code names = saint names** is confirmed across the board.
- **Siadou Gonja = reincarnation of Enyokia** (Minara was raised by her aunt's soul); **Minara = reincarnation of Soli + Apharia's daughter** — both confirmed.
- ★ **"Lady Gaialana" RESOLVED:** she is the figure **Renedin murdered to provoke War of Gods I** (which killed his brothers) — a *different* event from Apharia's death (War of Gods II, ~7,100 BR). The Quote-Bank annotation had conflated them; they're distinct.
- ★ **The four Old Gods named:** Renedin's brothers are **Haxenylian** (Protection/Wisdom), **Mikani** (War/Order), and **Poaranji** (Strength/Sailors) — all dead. This matches the Magic System cosmology ("before Mikani crystallized from Noirta, before Haxenylian").
- ★ **Brotherhood of Westwinds RESOLVED:** it is a **Renedin-worshipping cult** (the "Tome of Renedin"), which is exactly House Catern's "religious opposition" flagged back in Noble Houses.
- **Sir Tonhe** (Elleraian's biological father) = distant descendant of **Snieoa Patton**, so Minara and Elleraian are half-siblings (shared mother Vandrea) AND distant cousins (fathers' Patton lines). New: **Cevio** (Vandrea's dead first son, father **Sir Joro Noaner**).
- **Renedin's obsession = Iswan** (who "betrayed" him) — links the dream-god to the alchemy-goddess of the magic system. Renedin created the **Valoka** demons (matches Magic System).
- **Council of Seven** confirmed as the Special Division's command (matches the Key Words suggested term).

✗ Conflicts / questions

- ✗ **Minara's-era nation names diverge from LOCATIONS.** Crown of Glory names the kingdoms after their **capitals** — Kingdom of **Vellin** (formerly Aicruae, cap. Lajazer), Kingdom of **Civer** (Pireaynea), Kingdom of **Ociyaran** (Equateiy, with a new capital **Zada**), Kingdom of **Atriki** (Coelum), plus Tarmet

and Berlailia. But LOCATIONS' era-rename scheme said Pireaynea → **Lingia** and Coelum → **Hikai**. The two rename systems don't match — needs reconciliation (also feeds the standing "Kingdom of Atriki vs Hikai" question).

-  **RESOLVED — different eras, not different versions of the same era (cross-references locked three-era chain):** Crown of Glory (Minara's era) names kingdoms after their capitals (Civer, Atriki, Vellin, etc.) — matching the locked chain: Pireaynea → Lingia → **Kingdom of Civer**; Coelum → Hikai → **Kingdom of Atriki**. LOCATIONS' 'renamed Lingia/Hikai in the new order' describes the **Crandona-era** intermediate names. Line 926 of this audit states it directly: 'Lingia and Hikai are CRANDONA-era names, not Minara-era.' No source fix needed. Live canon pages untouched per standing policy.
- **One soul vs two souls** for Soli/Paxtino/Ekhasostio remains unsettled here too (profiles list "twin gods").
- **"False Star" still undefined** — though Elleraian is "First Eclipsing Sun (publicly recognized... though Minara is the actual firstborn)," so the false counterpart may be intended as Elleraian; not stated. Confirms the Key Words gap.
- Minor: **Minara and Isaeri share the exact birthday** (Dar 27th, 2632 AR); **Karniode "Vesme" vs "Vesmen"**; Renedin also spelled "Rendin."
 -  **RESOLVED (batch lock cross-references):** (1) **One soul vs two souls** — resolved by #106: two souls one body; 'one soul' is the locked error. (2) **False Star** — locked: = Vandrea/Empress Macenja. (3) **Karniode 'Vesme'** — locked: **Vesmen** is canonical; 'Vesme' is the typo. (4) **'Rendin'** — **Renedin** is canonical; 'Rendin' is a slip. (5) **Minara & Isaeri birthday** — resolved by #94: intentional cosmic fate-bond. ⚠ Source fixes: 'Vesme' → 'Vesmen'; 'Rendin' → 'Renedin.' Live canon untouched.
 -  **RESOLVED — the shared birthday is an intentional cosmic parallel, not an error (confirmed by Azora):** Minara (the Patton firstborn / true "Eclipsing Sun," reincarnation of Apharia) and **Isaeri Ashonve** (her Special Division teammate on the Council of Seven) genuinely share the **same birthdate — Dar 27th, 2632 AR** — by design. In a narrative this steeped in prophecy, reincarnation, and omen, the matching birth-day is a deliberate **fate-bond** marking the two as destined allies/foils, not a coincidence or

copy-paste slip. **Both dates stay as Dar 27th, 2632 AR.** They are **not** secret twins/siblings — the bond is cosmic/thematic, not biological. ⚠️
Source note (optional, not a fix): no date change needed; if anything, the parallel could be *leaned into* on the Crown of Glory / character pages (e.g., a line acknowledging the shared birthday as an omen of their linked fates). Live canon pages untouched per standing policy. (*The two spelling items on this line — Karniode "Vesmen" and "Renedin" — remain governed by the locked canonical spellings; tracked separately.*)

★ New lore

- **In-world calendar/zodiac:** months Dar, Ni, Baer, Lac, Fasteri Adei; zodiac signs Darzi, Inari, Baerin, Adeta, etc.
- **Massacre at Aresada** (Minara's village), the **Nightmare Realm Trial** (each member's deepest fear; Elleraian's coma), the **Haunted Lake / Valoka** incident, the **bread scene, kingdom hierarchy + population breakdown** for the empire.

● Gaps (all four)

- Most secondary/tertiary character profiles are heavy with blank fields (Greatest Fear, Birth dates, Magical affinity, etc.). Books 1 and 4 each have many "[TBD]" placeholders; Book 3's profile fields are largely empty below the prose summaries; Book 2's parent/minor profiles (Royin, Resaipa, Isenaylini) are near-empty.
- Multiple author "CONFIRM" notes are embedded throughout (esp. Book 1 Appendix C and Book 2) — these are known open items, not new discoveries.

CATEGORY 12 — ERA REFERENCE & CULTURE PAGES

Sources (all read FULL except where noted): ERA'S REFERENCE; Name Evolution Across Eras; Aicruae Funeral Traditions; Material culture of a pre-kingdom/ warrior age era across six cultural zones; Fashion Collections (*hub only — 8 subpages not yet opened*).

The two reference pages are high-value: between them they **resolve most of the era-rename and timeline-band conflicts** raised earlier. The three culture pages are lower-density (one is a real-world-analog research doc, one is a draft full of author TBDs, one is an unread gallery hub).

★ ERA'S REFERENCE — the master timeline band (no internal conflicts)

A clean single-page era spine: Warriors' Age (8,900-7,945 BR), Classical Kingdoms (7,945-7,400), Pre-Unification (7,400-7,250), **Civil War Period (7,250-7,217)**, Great Conquest (7,217-7,163), **Empire founded 7,163 BR**, Early Empire (~4,000 BR), Golden Millennia (~4,000-~500 BR), Late Golden (~500 BR-0 AR), **calendar resets at 0 AR**, Dark Ages (0-~50 AR), Restoration (~50-400 AR), Long Stability (400-1,326 AR), Blood Trials (1,326-1,528 AR), Age of Reforms (1,528-1,852 AR), Post-Reform (1,852-2,400 AR), Late Modern (2,400-2,632 AR).

-  Matches the WWG-dossier 15-era framework and every CANON date anchor (Blood Trials 1,326-1,528; Dark Ages from 0 AR; Late Modern ending 2,632 AR = Minara's era).
- ★ **Helps resolve the "Civil War 7,250 vs 7,221" standing conflict:** this page labels the whole **7,250-7,217 BR** span the "Civil War Period" (birth of Solis through the conquest), while the *active battles* are 7,221-7,217 BR. So the WWG "7,250 Civil War" figure is a **period label**, not a battle date — not a true contradiction.

★ Name Evolution Across Eras — RESOLVES the era-rename cluster

This page lays out all three eras' names side by side and **dissolves the Category-11 "nation names diverge" conflict**, which was an era mix-up:

Six Kingdoms (~8,900-7,163 BR)	Crandon's Era (~1-50 AR)	Minara's Era (~2,632 AR)
Aicruae	Tanan Grand Duchy (cap. Tericaer)	Kingdom of Lajazer (cap. Vellin)

Six Kingdoms (~8,900-7,163 BR)	Crandona's Era (~1-50 AR)	Minara's Era (~2,632 AR)
Gherci	Caporiolan Kingdom (cap. Baviet)	Kingdom of Tarmet (cap. Bela) — empire capital
Pireaynea	Lingia (cap. Haleret)	Kingdom of Civer (cap. Lorne)
Coelum	Hikai (cap. Osenki)	Kingdom of Atriki (cap. Elgan)
Equateiy	Uxridian Grand Duchy (cap. Rewalen)	Kingdom of Ociyaran (cap. Zada)
Vikitsv	Theolisseia (cap. Hadirel)	Kingdom of Berlailia (cap. Zemela)
Mystic Isles	Thult	Thult (no boundary; now barren)

- ★ **Lingia and Hikai are CRANDONA-era names**, not Minara-era — so LOCATIONS ("renamed Lingia / Hikai in the new order") and Crown of Glory ("Kingdom of Civer / Atriki") were describing **different eras**, not contradicting each other. The Cat-11 conflict is largely resolved.
- ★ **"Theolisseia" RESOLVED**: Merigen Bleelack's birthplace (Book 3) = the **Crandona-era name for Vikitsv** — not an unplaced new location.
- ★ **"Caprlolan Kingdom" RESOLVED**: where Crandona hid (Book 3) = **Caporiolan Kingdom = Crandona-era Gherci** (minor spelling: Caprlolan vs Caporiolan).
- ★ **Sea renames RESOLVED**: Oberyā → Orburydon → Oberyā (reverts); Fetora → Thult Southern Waters → Fetora (reverts); Quather unchanged — matches the LOCATIONS sea-rename notes.
- ✅ **Tarmet (cap. Bela) = the imperial capital in Minara's era** — matches Minara/Elleraian both being born in **Bela, the Imperial Palace**.

✗ New conflict surfaced

- **Aicruae's Minara-era name is internally swapped between pages**. Name Evolution (and Crown of Glory's own Kingdom Hierarchy) say **Kingdom of Lajazer, capital Vellin**; but Crown of Glory's Dahnyliein profile says **"Lajazer, capital of the Kingdom of Vellin."** The kingdom name and capital are reversed — is it Kingdom of Lajazer (cap. Vellin) or Kingdom of Vellin (cap. Lajazer)?

- **✓ RESOLVED — Kingdom of Lajazer (capital Vellin); Dahnyliein's profile is the slip.** The Name Evolution table and Crown of Glory's Kingdom Hierarchy both say "Kingdom of Lajazer, capital Vellin" — and the locked naming pattern confirms it: every Minara-era kingdom is named after the Solis-era *capital* of its predecessor (Pireaynea's capital Civer → Kingdom of Civer; Coelum's capital Atriki → Kingdom of Atriki; etc.), so Aicruae's capital **Lajazer** → **Kingdom of Lajazer**, with its Minara-era capital renamed **Vellin**. Dahnyliein's profile simply inverted the two. ⚠ Source fix needed: in the Crown of Glory Dahnyliein profile, change "Lajazer, capital of the Kingdom of Vellin" → "Vellin, capital of the Kingdom of Lajazer."
- New capital names introduced here (Tericaer, Baviat, Haleret, Osenki, Rewalen, Hadirel for the Crandona era; Vellin, Bela, Lorne, Elgan, Zada, Zemela for Minara's) are mostly first appearances — worth adding to a master place list.

Aicruae Funeral Traditions (*FULL — but a heavily flagged draft*)

- **✓ Corroborates** the Razar (soul's ascent) + Nellebrie ("disaster of loss") pairing and the entombment of **Iris and Orcus beneath a temple of Nellebrie at Rewqo** (matches LOCATIONS + Book 1). Class-coded disposition (nobles entombed, commoners cremated) is consistent.
- **★ New divine-domain detail: Paha** (Goddess of Horses, stated to be **Nellebrie's mother**) and **Zopha** named here as a **Sea Goddess** invoked in Northern Aicruae. **?** Reconcile against Religion's divine family tree — Zopha is elsewhere "mother of the twin gods / Vapaz's sister"; confirm the Sea-Goddess Zopha is the same deity (likely yes), and slot Paha/Nellebrie into the pantheon.
 - **✓ RESOLVED — same deity; the sea is a true part of Zopha's domain (confirmed by Azora):** The "Sea Goddess Zopha" invoked in Northern Aicruae funerals is the **same Zopha** — mother of the twin gods (Paxtino & Ekhasostio), Vapaz's sister. The sea is a **genuine part of her domain**, not a coincidence or a separate figure: her core mythology is water and grief — the **twins were born from her tears** (no father), and she **drowned Poaranji** in her grief during War of Gods I. A goddess whose tears birth gods and

whose sorrow drowns a god is naturally a **Sea Goddess**, so the Northern-Aicruae invocation fits her perfectly. **Paha** (Goddess of Horses) = **Nellebrie's mother** is accepted and slots into the divine family tree (Nellebrie remains the lone 3rd-generation god: Razar + Paha → Nellebrie). ⚠ **Source fix needed (not yet applied)**: on the **Religion** divine family tree / pantheon, add "**Sea**" (alongside her grief/tears/drowning associations) to **Zopha's** domains, and record **Paha** → **Nellebrie** maternity; optionally note the Northern-Aicruae sea-invocation as a regional cult of Zopha. Live canon pages untouched per standing policy.

- ★ **New ritual vocabulary** (good Key Words candidates): **Iksyre** (mourning headdress), **Broep** (chain veil), the **Eye Bind** (male mourners only), the **Geina** ("item treasured," burned with a strand of the dead's hair), red body paint, dyed red hands/feet, barefoot processions.
- 🕒 **Draft status**: the page is saturated with author "[INFERRED]" and "[TBD]" tags (female-mourner equivalent, marking patterns, ash disposition, mourning duration, etc.) and a footer noting it is "awaiting clarification" and not yet integrated into the Aicruae page. Treat as work-in-progress, not settled canon.

Material culture (pre-kingdom / warrior age) (*FULL*)

- This is a **real-world-analog worldbuilding reference**, not in-world canon narrative. It maps each nation to historical Earth cultures for "texture": **Equateiy** → **Italic/Etruscan**, **Gherci** → **Anatolian + Ethiopian highland**, **Aicruae** → **Celtic Gaul**, **Coelum** → **Atlantic Scotland + Norse Iceland**, **Vikistv** → **Korean + Tibetan highland**, **Pireaynea** → **tribal southern Italy + Sicily**.
- It contains **no canon characters, houses, or events** to cross-check, so it cannot conflict with the narrative canon — but the analog map is internally consistent with the language flavors (e.g., Equateiy's "Lato" romance-tongue fits the Italic/Latin analog; Aicruae's Celtic analog fits its Druid/warrior framing).
- 🕒 **Note**: it uses real-world BCE/CE dates and place names throughout — a reference register, not the in-world BR/AR timeline. Worth a one-line disclaimer in canon so it isn't mistaken for in-world history.

Fashion Collections (*hub only — subpages pending*)

- The hub page is essentially empty; it holds **8 subpages**: Saints' Cidet Attire, plus per-nation fashion (Coleum, Equatiety, Vikistv, Pireayana, Gherci, Aicruae) and a **Liazen Jewelry Collection**.
-  **The subpage titles themselves carry the spelling variants: "Coleum"** (vs Coelum), "**Equatiety**" (vs Equateiy), "**Pireayana**" (vs Pireaynea/Pireayena) — reinforcing the standing nation-spelling normalization list.
-  The 8 collection subpages are not yet opened (likely image-led with little cross-checkable text); flagged as low-priority pending. The **Liazen Jewelry Collection** may be worth a look given House Liazen's perfume/jewelry legacy (Queen Isalian) and Esterica's "Bregaria necklace from Isalian's collection" (Quote Bank).

CATEGORY 13 — META / AUDIT & FIX DOCUMENTS

Sources: MAPS/LOCATIONS (container);  CANON AUDIT — Tracking Doc (FULL); Refrence doc to help with world building.pull from some of these and tie them into the world (FULL);  Inferred Canon Fixes (PARTIAL — long; §1-10);  Inferred Canon Fixes — Part 2 (PARTIAL — §11-17);  TIMELINE — Proposed Build (Draft) (PARTIAL).

Important framing: four of these are **author-side working documents, not story canon** — and together they are a *parallel audit + resolution system* that overlaps heavily with this page. You (and a prior assistant) have already catalogued most of the same conflicts AND **locked rulings** on many of them. Critically, Inferred Canon Fixes §17 states the standing policy: **"every error and flag stays documented here... the live hub pages... are left untouched. Nothing is propagated out into live canon."** So the live-page contradictions catalogued throughout this audit are **known and deliberately un-propagated**, not overlooked. They will keep appearing on the story pages until you choose to write the fixes in.

MAPS/LOCATIONS — container only

- The page itself holds just one child, THE SIX KINGDOMS 8,900BR - 7,163 BR MAP. The rich "master map" content described in the Tracking Doc lives on that map subpage (image-led; not independently opened here). Per the Tracking Doc, that page **self-corrects** two standing conflicts: **Pireaynea founded 7,400 BR** (flags LOCATIONS' "7,200" as the error) and **Gherci 8,763 BR** (flags "8,663" as a 100-yr typo); it also answers "which currencies outrank Miuae?" — **Pel (Equateiy) and Kis (Vikitsv)** — and identifies the **root cause of the Lajazer/Vellin tangle** (Minara-era kingdom names were dropped into the *capital* field of the Six Kingdoms map).

CANON AUDIT — Tracking Doc: a parallel audit that independently corroborates this one

- A page-by-page audit (all 21 pages checked off) using the same kind of flag taxonomy (● Conflict / ● Error / ● Not-thought-out / ? Question). It **independently surfaced almost every major conflict in this audit** — Saint Duri's impossible founding date, Vikitsv/Vikistv, the Sevtor/Liaerto lineage split, Zacareneal Paneta, the UIB expansion, Soli one-soul-vs-two, Madame Saiye/Aimyeida, Coyre 7,214-vs-7,215, the False Star, the two Religion hubs, Karniode-vs-Galamma "Lost One," and more. Strong mutual validation.
- It also caught **finer genealogy errors** worth importing here: **Teravian** "died at 79" but 8,646 → 8,577 = 69 (and "described as a child"); **Queen Cawiloan** (b. 8,730) bearing children at ≈56-58; **King Ilaem Nefest I** dated 8,734 BR though his parents marry 8,732 BR (born before the wedding). These sharpen the "House Patton genealogy" gap.
 -  **RESOLVED — minimal digit-fixes; the structural anchor wins in each case (confirmed by Azora):** These are simple arithmetic/date slips *within* a single life or generation, not the cross-dynasty impossibilities the locked throne-name device already dissolves. (1) **Teravian** — keep the dates **8,646–8,577 BR** (a **69-year** life); "died at 79" is the digit slip (7 → 6), and the "described as a child" phrasing refers to his role/status at some event, not his lifespan. (2) **Queen Cawiloan** — her **b. 8,730 BR is the slip** (a transposed/too-early digit); move her birth *later* so she bears her children

at a plausible age (the children's dates are the anchor). (3) **King Ilaem Nefest I** — his parents' **8,732 BR marriage is the anchor**; move his birth to *after* it (the "8,734 BR" born-before-wedding date is the slip). ⚠️ **Source fixes needed (not yet applied)**: Teravian "died at 79" → "69"; nudge Queen Cawiloan's birth year later than 8,730 BR; move King Ilaem Nefest I's birth to after the 8,732 BR marriage. Live canon pages untouched per standing policy.

Reference doc — inspirations only

- A list of historical court dramas (*Magnificent Century*, *Nirvana in Fire*, *The Tudors*, *Empresses in the Palace*, etc.) plus a worldbuilding-trope checklist (succession tension, marriage-as-weapon, court factions, prophecy/omens). **No in-world canon entities** — nothing to cross-check, cannot conflict. A mood/reference board.

Inferred Canon Fixes (Parts 1 & 2) — the resolution layer (many rulings LOCKED)

A 17-section pass pairing each conflict with a proposed fix; a large number are **user-LOCKED (dated 9 Jun)**. The most important cross-walk — **standing OPEN QUESTIONS from earlier categories that are now answered by a locked ruling**:

- **Patton genealogy impossibilities + the ~1,000-yr gap + the ~11,400-yr "unbroken" dynasty** → **Patton is a throne-name carried across numbered dynasties** with usurpations, interregna, and restorations (LOCKED). Dissolves the impossible parent/child dates and the millennium-long hole.
- **Massacre of Light "fix the queen name"** → a **joint atrocity: King Viake orders it, Queen Mari is the true zealot** (LOCKED).
- **Solis's legitimacy** → he is a **trueborn Patton** (the king's son by the newly-recognized concubine Emillea); the conflict is *legitimacy/favor*, not lineage (LOCKED). Recasts "bastard."
- **12 vs 13 saints** → **twelve honored saints (Reron last) + Harnua as the disgraced, un-canonized thirteenth** (LOCKED). The Timeline/secondary-hub "Reron 12th & final" is the line to amend, not Harnua to erase.
- **Twin gods' father (three versions)** → **layer them**: public myth = fatherless (Zopha's tears); hidden truth = Renedin; Loart dropped (LOCKED).
- **Soli: one soul or two?** → **two souls in one body** (Paxtino + Ekhasostio); the Quote Bank "one soul" line is the error (LOCKED). Resolves the Cat-10/Cat-11 flag.
- **Lajazer vs Vellin** → **Lajazer = kingdom, Vellin = capital**; the *Crown of Glory* line is the swapped error (LOCKED). Directly resolves the Cat-11 conflict.
- **Coelum north vs south** → **northern "Forsaken Land," capital Atriki** (Lake Trang/Henem Bay) (LOCKED); "Coelys" map label is a typo.
- **The "False Star" (open across all four books)** → **= Vandrea / Empress Macenja** (LOCKED). The Eclipsing Sun = the Patton heir (Minara); Renedin breeds the False Star into the dynasty.
- **Battle of Relirian** → **one battle** (Reron's last stand *is* the catastrophe that left Gherci ~78% female) (LOCKED).

- **Spellings** → locked canonical forms **Vikitsv, Mikani, Nimlye, Vesmen, Chairameron** (Vesmen, not Vesme).
- **War of Gods II** → confirmed canonical; the Timeline omission is the fix (add it at ~7,200-7,100 BR).
- **Magic "introduced" under Goteivati III** → reword to **integrated via intermarriage**, not invented.
- **Saint Duri's founding date** → the **founding year is the error** (move into her 8,747-8,670 BR lifetime), not her birth.
- **Pireaynea founding** → **7,400 BR** (Maps), not 7,200.
- **Epoch name** → **"Reconstruction"** = Goteivati's regime's own term; **"Restoration"** = historians' name for the recovery — both kept, naming different things.

★ New canon that exists ONLY in the fix docs (not yet on any story page)

- **House Bahsi rises to imperial dynasty:** Goteivati "the Damned" is **overthrown**, and his bastard son **Hefu Bahsi** is crowned **Emperor Hefu Patton** — the actual **Sun King** — installed by his mother **Lady Reyqe Bahsi** (LOCKED). Entirely new.
- **A 16-era canonical spine** (Era of the First Song → Late Modern), with a per-era real-world anchor map (Celtic Gaul → Byzantium → Tudor → Louis XIV → Song China → witch-trials → Enlightenment → late-Victorian).
- **Early Empire matrilineal pass** (Maen dies childless → Coyre's son **Elleinaj I**), and a proposed **reign-by-reign "lost Patton dynasties"** skeleton (four claimant lines + two interregna) to fill the ~1,060-yr gap.
- **Blood Trials mechanics:** the **"B.W." (Blood Whore) brand** on noble mothers, **~400,000 women + 600,000 children** killed, ended by **Takar** (recast as a *commoner outsider*) proving the 40% inheritance rate.
- **Goteivati era detail:** the Pataoiut institutionalized decree → law → "common sense" over ~1,800 yrs; the Circle rebuilt as a crown-controlled state church;

the Solisian Academy **transformed (not founded)** from a noble school into the magic registry's institution.

✗ Conflicts that survive even in the fix/build docs

- **Magic Tower lineage still split:** the Proposed Build's 7,749 BR entry still credits **Ulían** → **Kiear & Liaerto III**, while the locked direction favors the **Sevtor / Verna's-eldest-son Liaerto I** version (Magic System). The mechanical reconciliation isn't done.
- **Civil War start year unsettled: 7,222 BR** (Era spine/Maps, proposed) vs **7,221 BR** (Historical Figures/Book 1). End (7,217 BR) is stable.
 - **✓ RESOLVED (confirmed by Azora) — Year One = 7,221 BR.** The year-count is rigid and forces it: **Year Five = 7,217 BR** (Valea attack), Year Four = 7,218 (Battle of Rewqo, Iris dies), Year One = 7,221 (Battle of Jasereiey) — counting One → Five inclusively gives 7,221 / 7,220 / 7,219 / 7,218 / 7,217. **7,221 BR** is also the multi-anchored value (Historical Figures, House Patton "7,221–7,217 BR," House Kulio "Year One... 7,221 BR... lost an eye," *A Tale of a Thousand Songs* Book Info "Arc III: Year One of the War | 7,221 BR," and House Vika's Beazen d. 7,223 "two years before the civil war" → 7,221). **7,222 BR** survives only on the Six Kingdoms map and the **TIMELINE — Proposed Build (Draft)** — the lone off-by-one outliers. (Separately, the 7,250–7,217 BR "Civil War Period" remains the **era label** — Solis's birth → conquest — not the active war; that split was already settled.) **⚠ Source fixes needed (not yet applied):** change "7,222 BR" → "7,221 BR" for the Aicruan Civil War's start on the **Six Kingdoms map** and the **TIMELINE — Proposed Build (Draft)**.
- **Queen Mihai's death date drifts:** Proposed Build lifespan table gives **7,282–7,247 BR** (d. 7,247); Book 1 implied **~7,243 BR**.
 - **✓ RESOLVED — 7,247 BR is canon; ~7,243 BR was an approximation (confirmed by live source check):** Both **House Patton** and **House Vika** independently give her full span as **7,282–7,247 BR** (died at 35). Marriage timeline corroborates: she married Prince Benjamin **~7,262 BR** (age ~20; her brother Lemalen died one month before the wedding); the twins Iris and Orcus were born **7,256 BR** (6 years later **✓**); she died **7,247 BR**, six years before her husband King Benjamin II (d. 7,241 BR). The "**~7,243 BR**"

figure was a loose Book 1 inference, not an explicit date. **Canon: Queen Mihai Julie Patton, 7,282–7,247 BR, married ~7,262 BR.** No source fix needed — both primary pages already agree. Live canon untouched.

- **Apharia's ~133-year mortal lifespan** (~7,233 → ~7,100 BR) is still self-flagged unresolved in the build doc.
- **"Civil War Period" (era) vs "Aicruan Civil War" (event):** the docs propose splitting the 7,250–7,217 era label from the ~5-year 7,222–7,217 war, but that split isn't yet applied to the live pages.

TIMELINE — Proposed Build (Draft)

- A fully-populated *proposed* replacement for the live Timeline: the 16-era ERA OVERVIEW, per-era dated event lists, and extensive **character-lifespan tables** (House Patton first & second lines, the 13 saints with backfilled birth years, the three sisters, civil-war principals). Explicitly **a draft, not live canon**.
- Corroborates the core date spine (Solis 7,250–7,163; twins b. 7,256; Esterica 7,248–7,214; Iris d. 7,218; Orcus d. 7,217; Maen 7,217–7,140) and adds proposed anchors (e.g., **Coelum founded 8,494 BR** by Yuavekio; Queen Mihai 7,282–7,247 BR; saint birth years).
- Its own **?** flags echo this audit's open items (Age-of-Saints span; civil-war start year; War-of-World's-End length; Harnua/second-moon/Agarisono still [Date TBD]). **✓** Elleinaj's birth ~7,185 vs ~7,195: **~7,185 BR is canon** — forms a clean triangle (born ~7,185 → crowned 7,140 = age 45; 45 + 48-yr reign = died at 93 ~7,092 BR). The ~7,195 figure is a 10-year slip with no named source page.

OPEN QUESTIONS

Running list. Source category in brackets. Compiled as the audit proceeds.

1. **[Locations] Gherci founding year:** 8,663 BR or 8,763 BR? The page gives both.
2. **[Locations] Nation spelling — "Vikitsv" vs "Vikistv":** which is canonical? Both are used heavily across the page.

3. **[Locations] Nation spelling — "Pireaynea" vs "Pireayena"**: header vs flag disagree.
4. **[Locations] Solis's Mystic Isles alias**: "Jonathan Kiva" or "Janrano Kiva"?
5. **[Locations] Vikitsv Magic Tower leadership**: Is the current Grand Sorcerer "Sevtor" (descendant of Verna's son Liaerto I) or "the child of Ulian's son Kiear"? And is the founding son Liaerto I or Liaerto III?
6. **[Locations] Equateiy population**: 97 million or [TBD]?
7. **[Locations] "The Great War of Tormet"**: is "Tormet" the Gherci capital "Tarmet," or a distinct place? Possible typo.
 -  **RESOLVED — typo; it's "The Great War of Tarmet" (confirmed by Azora)**: "Tormet" is a one-off misspelling of **Tarmet**, the locked holy capital of Gherci — corroborated across the Civil War-period map, the Six Kingdoms map, the TIMELINE, and every Gherci reference, where the capital is consistently **Tarmet**. "Tormet" appears nowhere else as a place. So the conflict is just a spelling slip, and the war's canonical name is **"The Great War of Tarmet."**  **Source fix needed (not yet applied)**: correct "The Great War of Tormet" → "The Great War of Tarmet" on the LOCATIONS page (and anywhere else the war is named). Live canon pages untouched per standing policy.
8. **[Locations] Aicruae populations**: the four named regions sum to ~87M, not the national total; is a central/capital-region figure missing? Is Eastern Aicruae's "40,000" a typo?
9. **[Locations] The Academy's timescale**: "steadfast for over a decade" vs. enduring across multiple map eras — which is intended?
10. **[Locations] Number of eras the Academy appears in**: "all three" (stub) vs "both ... Crandona's and Minara's" (write-up).
11. **[Locations] The Principal's hair**: pink, black, or silver? The passage gives all three.
12. **[Locations] Taten relationship**: Siroa and Lyanami Taten — "cousins" or sisters ("mother and aunt" of the same daughter)?

13. **[Locations] Negiet's country:**  Resolved — Vikitsv (House Leum's home page lists Negiet as its Vikitsv seat); the Equateiy listing is the outlier.
14. **[Locations] "Civer":** city/capital only, or also a later province/region name across eras? (Full cross-page sweep pending.)
15. **[Locations] Many TBD fields:** rulers-by-era, noble houses, factions, founders/dates left [TBD] for Gherci, Pireaynea, Coelum, Equateiy, and Vikitsv (see Gaps).

Cross-reference pass (Locations names vs other pages):

1. **[Locations × Religion] Saint Duri's dates vs Gherci's founding:** Religion gives Duri's life as 8,747 BR–8,670 BR, but the founding dates are 8,763 BR (before her birth) and 8,663 BR (after her death). No stated date fits her lifespan — which needs to move?
2. **[Locations × Religion] Pireaynea's religion:** monotheistic worship of Allan only (Locations) vs membership in the polytheistic Circle of Eternal Light (Religion). Which is canon?
3. **[Religion internal] Coelum's religion:** Religion calls Coelum "the only known atheistic society" yet also lists it among Circle of Eternal Light countries. Atheist or Circle?
4. **[Religion internal] Twin prophet's name:** "Vekta" vs "Veketa" — which spelling?
5. **[Locations × Religion] Pireaynea's origin:** founded by Deasn of Gherci in 7,200 BR (Locations) vs formed from four territories Aseraga/Baeistic/Urdeio/Feacener (Religion) — compatible or competing accounts?
6. **[Locations] Solis's Mystic Isles alias** still unresolved ("Jonathan Kiva" vs "Janrano Kiva") — defining page (In Story Characters) not yet read.

Historical Figures (full read):

1. **[Hist. Figures × Religion] Saint Duri / Gherci founding** — internal contradiction confirmed: she founds Gherci in 8,763 BR but lives 8,747–8,670 BR. Which date moves — her birth/death, or the founding year?

2. **[Hist. Figures] Sayero Walica Patton's dates:** 8,608–8,533 BR (tree) or 8,615–8,540 BR (prose, ×2)?
3. **[Hist. Figures] Karinoa Nalia Patton's death year:** 8,561 BR (header/tree) or 8,570 BR (legacy)?
4. **[Hist. Figures] Lady Agari Liazen's age at death:** "before the age of two," "three-year-old," or born 8,663–died 8,660 (≈3)?
5. **[Hist. Figures] Isalian's parents' death + Liazen dispute year:** 8,660 BR (tree) or 8,662 BR (bio)?
6. **[Hist. Figures] Founder's name spelling:** "Hailour" or "Haliour" Layern Patton I?
7. **[Hist. Figures] Saint Harnua (13th Saint):** who is this — and the same "Harnua" as Mihel/Harnua Kulio? No profile exists despite being called the most infamous Saint and Esterica's poisoner.
8. **[Hist. Figures] Vandrea & Apharia's 130+-year mortal lifespans** before immortality — intended, or are the ~7,100 BR dates off?
9. **[Hist. Figures] Walica's regency length:** 6 years (to age 24) or the "8,736–8,731 BR" (5-year) parenthetical?
10. **[Hist. Figures] Emperor Maen's wives:** profile says "names TBD" but the tree names Saiye, Tenami, Kesdeivoa — reconcile.

Noble Houses (Batch 1 — 7 of 62 houses):

Resolved this pass: §2's Saint Harnua identity (= Harnua Kulio, 13th Saint) and the Esterica Kulio profile gap are now closed (House Kulio); the §1 coup-vs-war gap is explained by Solis's ~20-year Mystic-Isles exile (only Patton's "erupted immediately" wording still conflicts).

1. ☒ **[Noble Houses] Most infamous Saint — RESOLVED: Harnua is #1; Reron is #2.** Historical Figures wins — "Reron's infamy is second only to Saint Harnua." House Kulio and Religion's reversed phrasing are the slips to fix.
2. ☒ **RESOLVED — [Noble Houses] Pasilerad Kacer's era:** Pasilerad stays **7,401–7,302 BR**. Breleys re-dated to **~7,383 BR** (born 12 years before the marriage); wedding **~7,371 BR** (he was 30, she 12); escape **~7,365 BR**. House

Hige's "7,436 BR" is the lone outlier. ⚠ Source fix: change Breleys' birth on House Hige from 7,436 BR → ~7,383 BR.

3. **✓ RESOLVED — [Noble Houses] House Vika's religion: Rillic.** Vika's own page, House Caraen, and House Mena all agree. Kulio's Leneyez list is the slip (Vika should be removed from it). Full faith map: Rillic = Vika, Caraen, Mena, Liazen; Leneyez = Patton, Kulio, Vemer, Najil, Hige. ⚠ Source fix: remove Vika from House Kulio's Leneyez grouping.
4. **✓ RESOLVED — [Noble Houses] Mihel Kulio's eye injury:** Eye lost in **Year One (7,221 BR)**; leg in Year Two (7,220 BR). **House Kulio wins**; LOCATIONS' Bareta entry incorrectly folds the eye-loss into Year Two. ⚠ Source fix: on the LOCATIONS Bareta entry, remove/correct the eye-loss so only the leg (Ny eo, Year Two) belongs to Year Two.
5. **✓ RESOLVED — [Noble Houses] Esterica's death & Maen's age:** Esterica died **7,214 BR** (multi-anchored: House Kulio + House Patton's Coyre entry). Maen (b. 7,217 BR) was **~3**, not five. HF's "five when his mother died" is the slip. ⚠ Source fix: on Historical Figures, change "five" → "three" in Maen's profile.
6. **✓ RESOLVED — [Noble Houses] Emperor Elleinaj's age at accession: 45.** Born ~7,185 BR → crowned 7,140 BR = age 45; 45 + 48-year reign = death at 93 ✓. The two "fifty-five" mentions are the slip. ⚠ Source fix: on Historical Figures and House Patton, change "fifty-five years old" / "his first fifty-five years" → "forty-five."
7. **✓ RESOLVED — [Noble Houses] Founder's name: Haliour** Layern Patton I. Holds the reference spine (TIMELINE, KEY WORDS, Inferred Canon Fixes, House Patton, family tree). "Hailour" is the variant confined to LOCATIONS' Founder field, HF main bio, and Aicruae Funeral Traditions. ⚠ Source fix: change "Hailour" → "Haliour" in those locations.
8. **✓ RESOLVED — [Noble Houses] "Civil war erupted immediately":** The ~20-year gap is Solis's Mystic Isles exile (7,241–7,221 BR), confirmed by LOCATIONS, House Kulio, Religion, KEY WORDS, and Book 1 Appendix A. "Erupted immediately" on House Patton is the lone error. ⚠ Source fix: rewrite that phrase on House Patton to reflect the ~20-year exile before the war.

9.  **RESOLVED** — **[Noble Houses] Magic-users' fire weakness**: Both sources are right from different angles. The weakness is a **known result of Verna's bargain with Iswan** (Kulio). Solis *discovered* it could be weaponized via experiments on Maeret Orana (Orana). Additionally, **Daseri training confers progressive heat-hardening** — fire-casters earn partial fire-immunity through their discipline, explaining how they wield flame without dying.  Source fix: on the Magic System page, add a note that Daseri training grants progressive heat-hardening (earned, Daseri-specific resistance).

Noble Houses (Batch 2 — houses 8–12 of 62):

Resolved this pass: Negiet's nation (= Vikitsv, per House Leum) closes Locations Open-Question 13; the "Council of the Forsaken" is now defined (Arvento/Aedria/Caraen).

1.  **RESOLVED** — **[Noble Houses] House Caraen's army size: Over 100,000 men; 3rd strongest in Aicruae** (after Vika and Patton). House Mena's "5,000... on par with House Caraen" is the error — a 5,000-man standby force cannot equal the realm's 3rd-largest army.  Source fix: remove "on par with House Caraen" from House Mena's military entry.
2.  **RESOLVED** — **[Noble Houses] Who destroyed House Baliva**: Both claims are partially right. **Tilan Arvento struck the killing blow** on Baliva's last members (the feud was fundamentally Arvento's); **House Vika led the coalition** at the Battle of Afera (8,151 BR). Neither sole-credit version is wrong, just incomplete.
3.  **RESOLVED** — **[Noble Houses] "The Lost One" Saint: Saint Galamma, the Third Saint** (15,870–15,852 BR, executed at 18). Arvento's motto prose + Historical Figures both confirm Galamma. The lone "Karniode" in Arvento's Cross-References/Keywords is the slip.  Source fix: on House Arvento, change the keyword/cross-ref entry from "Saint Karniode" → "Saint Galamma."
4.  **RESOLVED** — **[Noble Houses] Maikor "of Pireaynea"**: Relabel, don't redate. The **8,248 BR date holds**. Pireaynea didn't exist yet — Maikor is from **Aseraga**, one of the Four Territories that Deasn later unified into Pireaynea (7,400 BR). Aseraga is map-confirmed in Pireaynea's southwest, nearest the GreyNest/Oahiat border.  Source fix: on House Caraen (and House Baliva's

Treaty of Oahiat entry), change "Maikor of Pireaynea" / "with Pireaynea" → "Maikor of Aseraga" / "with Aseraga."

5. **✓ RESOLVED — [Noble Houses] Zacareneal Paneta: Lived to ~26; fathered Asa Najil** (b. 8,742 BR). House Najil's account wins. Corrected birth: **~8,768 BR**; death ~8,742 BR. House Patton + House Mena's "8,707–8,705 / died at 2" are the slip. **⚠** Source fix: change Zacareneal's dates on House Patton + House Mena. **✓** Secondary fix resolved: Vaseiula Mena's dates are the slip — corrected to **~8,788–~8,764 BR** (keeping her 24-year lifespan; she bore Zacareneal at ~20). Fix House Mena.
6. **✓ RESOLVED — [Noble Houses] House Mena's eradicator: Merigen Bleelack** (majority: two internal mentions + locked canon figure). "Morgant" in Mena's "Role in Narrative" is the error — a stray name with no other canon footprint. **⚠** Source fix: on House Mena, change "killed by Morgant" → "killed by Merigen Bleelack."

Noble Houses (Batch 3 — houses 13–18 of 62):

Confirmed this pass: the Zacareneal Paneta contradiction is now a genuine three-way conflict (House Najil); the Common People vs Neutral faction map matches House Patton.

1. **[Noble Houses] Zacareneal Paneta (three-way):** died at age 2 (House Patton + House Mena, 8,707–8,705 BR) vs died at age 26 and fathered Asa Najil, founder of House Najil (House Najil, with Asa b. 8,742 BR). Mutually impossible.
 - **✓ RESOLVED — Zacareneal lived to 26 and fathered Asa Najil; push his birth to ~8,768 BR (confirmed by Azora):** House Najil's account is canon — Zacareneal Paneta survived infancy, lived to approximately age 26, and fathered **Asa Najil** (b. 8,742 BR), founder of House Najil. The birth/death dates on House Patton and House Mena (8,707–8,705 BR, "died in infancy at age 2") are the slip. Corrected birth: **~8,768 BR** (making him ~26 when Asa is born in 8,742 BR ✓); corrected death: **~8,742 BR** or shortly after (dying around the time of Asa's birth). His parents remain Ser Winsafanero Paneta (b. 8,725 BR) and Lady Vaseiula Mena (b. 8,716 BR) — Vaseiula was ~19 at Zacareneal's corrected birth of ~8,768 BR (she died 8,692 BR at age 24, so Zacareneal ~8,768 BR is impossible — she would

have been born only when he was ~52).  **Wait — this creates a new conflict:** Vaseiula Mena lived 8,716–8,692 BR (died age 24). If Zacareneal is born ~8,768 BR, that predates Vaseiula's own birth by 52 years. The parentage or Vaseiula's dates need revisiting.  **Secondary conflict resolved (confirmed by Azora):** Vaseiula Mena's dates are the slip, not the parentage. Corrected dates: **~8,788–~8,764 BR** (24-year lifespan preserved; she bore Zacareneal at ~20, consistent with ~8,768 BR birth).  **Source fixes needed:** (1) House Patton + House Mena: change Zacareneal's dates from "8,707–8,705 BR / died at age 2" → "~8,768 BR – ~8,742 BR / died at ~26"; (2) House Mena: change Vaseiula's dates from "8,716–8,692 BR" → "~8,788–~8,764 BR".

2.  **RESOLVED — UIB: both names are real, used by different factions at different times; "UIB" itself retired (confirmed by Azora):** Both expansions are sequential stage-names — the network was *founded* as the **Underground Information Brokers** (Dajanyi's era), then rebranded internally as **Underground Illegal Business** as it expanded into open crime (Vemer/Yurea's era). Different houses remember it by different names because they recall different periods. The org then outgrew both labels; known today publicly as **The Great Beast / The Maw** and internally as **The Free Company**. See §3.S. (*was: "Underground Illegal Business" (Vemer, Yurea) vs "Underground Information Brokers" (Dajanyi)*)
3.  **RESOLVED — Kalip Plague is recurring; both dates correct (confirmed by Azora):** No conflict — two separate waves: first outbreak at the **close of the War of World's End (~8,160s BR)** (Aedria), and a later resurgence **~7,967 BR** when Hailea Kulio died tending victims (Kulio). See §3.M. (*was: ~8,160s BR (Aedria) vs 7,967 BR (Kulio)*)
4.  **RESOLVED — canonical spelling is Isalian Liazen (confirmed by Azora):** "Isalian" holds three authoritative slots (House Patton, Historical Figures, House Mena); House Aedria's "Isilian" is the typo. See §3.N. (*was: "Isalian" vs "Isilian"*)
5.  **RESOLVED — canonical name is Harnua; "Haruna" is the typo (confirmed by Azora):** Matches House Kulio + Historical Figures + the locked Saint Harnua = Harnua Kulio identity. See §3.O. (*was: "Harnua" vs "Haruna"*)

6.  **RESOLVED** — both; Vemer and Vika fought as allies at Little Hill (confirmed by Azora): Ualvo Vemer I = the commander who won and fell ("The Victors"); Dexona Vika = the battlefield champion who survived ("Champion of Little Hill"). Two honorifics, one shared victory. See §3.A. (*was: House Vemer vs House Vika as sole victor*)

Noble Houses (Batch 4 — houses 19–24 of 62):

Mostly stubs this pass; the value was filling in faction structures (see Batch-4 cross-house pass).

1. **[Noble Houses] House Baliva is blank:** the house destroyed in the War of World's End — and central to the Arvento-vs-Vika "who destroyed Baliva" dispute — has a completely empty page, so the dispute can't be settled from its own canon.
2. **[Noble Houses] "Ulian":** House Iriandet's motto "For Ulian" plus the LOCATIONS Magic-Tower "Ulian" feed Locations Open-Question 5 (Ulian vs the Verna/Sevtor Grand-Sorcerer line) — who is Ulian?
3. **[Noble Houses] "Brotherhood of Westwinds":** named as House Catern's religious opposition but otherwise undefined — pending Religion.

Noble Houses (Batch 5 — houses 25–30 of 62): no new conflicts; the Equateiy (First Movement Party; ducal houses Kivier + Veir) and Coelum (Moon/Sea/Land) faction systems were filled in, and the Kifan/Jivaya marriage lore corroborates House Dajanyi.

Noble Houses (Batch 6 — houses 31–46 of 62): no new conflicts. Mapped Vikitsv's Nationalist Party (Orana/Renililas/Qari/Yailk) and Gherci's parties (Believers/Populists/Reformers/Royalists); House Yailk's Natav corroborates the fall of Vikitsv; Houses Malrancis & Pontia introduce Crandona's-era rebellion lore.

Noble Houses (Batch 7 — final 15 houses; all 61 now read): no hard contradictions. New: Equateiy has **two** parties (First + Second Movement), with House Kivier in the Second; the "across the Eras" master roster adds faction labels (Mava = Royalists, Najil = Divine, Mena = Neutral, Liazen = later Divine, Brumik = Common People) not stated on those houses' own pages — confirm the roster is authoritative. Minor: "Caprlolan **forest**" (Malrancis/Pontia/Schmidtavaca) vs "Caprlolan **Kingdom**" (Reidskelisia).  **RESOLVED:** Both are correct simultaneously — the Caprlolan forest is a geographic feature *within* the

Caporiolan Kingdom (Crandon-era Gherci). The rebels hid in the forest; the kingdom is the larger political entity surrounding it. No error on either page.

Noble Houses (era rosters, Crests gallery & WWG hub):

1. Is **House Benen** intended canon? It's on the Solis-era roster + Crests gallery but has **no dossier** in the WWG index.
2. Spelling to settle: **Kilensek** (Minara roster) vs **Kilemsek** (WWG + Crests); **Chairamero** (crest) vs **Chairameron** (roster + WWG).

✓ **RESOLVED (confirmed by Azora — House Benen + spelling cluster):**

- **House Benen = canon, just undocumented.** Triple-confirmed: ✓ listed as a new addition on the **Solis-era roster** (7,217–7,163 BR), ✓ has a card in the **Crests gallery**, and ✓ has a **named member — Marquess Benen**, Hicksora Connorrita's murdered forced husband (Book 3, *A Princess in Love*; see Book 3 findings above). → Treat exactly like House Liazen: a **fillable stub**, not a canon gap.
- **Spellings locked:** ✓ **Kilensek** (over "Kilemsek" — Azora confirms the Minara-era roster spelling is canonical; WWG index + Crests gallery are the typos) · ✓ **Chairameron** (over "Chairamero" — roster + WWG index agree; the crest card drops the final "n").
- ✓ **Avromvog Stanyad** is canonical (over "Stanyd") — the full Character Profile ("the Silent Death") plus House Malrancis, House Reidskelisia, and the *Princess in Love* writeup all use **Stanyad**; only the character *list* carries the typo.

⚠ **Source fixes needed (not yet applied):**

1. Create the **House Benen** dossier in the WWG NOBLE HOUSES index (currently absent).
2. Crests gallery: "House **Chairamero**" → "House **Chairameron**."
3. Minara-era roster: "House **Kilensek**" → "House **Kilemsek**."
4. *A Princess in Love* character list: "Avromvog **Stanyd**" → "Avromvog **Stanyad**."
5. The **WWG hub holds ~114 full dossiers** that may add to or contradict the terse CANON house pages — confirm whether to audit every dossier in full (same

depth as the 61 CANON pages).

✓ **RESOLVED (confirmed by Azora — WWG ~114-dossier scope):**

- **Decision: log the entire WWG → NOBLE HOUSES dossier hub as one known structural gap; do NOT audit the ~114 pages individually.** A canon audit compares *stated* facts for contradictions — and these are blank templates that state nothing, so there is nothing to cross-check.
 - ✓ **Verified by sampling:** 15 of 114 opened in full, **all identical empty templates** (zero filled fields); the remaining ~99 are inferred blank. The hub is an **unwritten scaffold**, not a source of conflicts.
 - ✓ **Roster already reconciled:** the hub's house list matches the 61 CANON houses + the Solis/Crandona/Minara-era additions (checked in the era-roster passes), so there's no roster mismatch hiding in it.
 - **Going forward:** treat the WWG dossiers as *audited-by-sampling (empty)* and closed as the single GAPS entry below — **not** 114 separate items. If any individual dossier gets filled in later, re-audit just that page at that point.
 - ⚠ **No source fix needed** — this is a scope/coverage decision, not a canon error. (The scaffold being unwritten is a known authoring gap, already recorded under GAPS / STUB ENTITIES.)
-

GAPS / STUB ENTITIES

Running list. Compiled as the audit proceeds.

Locations:

- **Esteraia** (Equateiy) — "Esteraia - A City," nothing more.
- **Vekit** (Vikitsv) — "Vekit: - A Town," nothing more.
- **The Blue Tower** (Aicruae) — only "A prison for nobility ... near the capital."
- **Mother's Hip** (Gherci) — header only, no body.
- **Greater Gherci, Beka/Tanya Beka, Malin, The Outer Walls** (Gherci) — one line or less each.

- **Large blocks of [TBD]** on the non-Aicruae nations: military strength/composition, political factions, noble houses, rulers by era, and founder/founding-date fields are blank for Gherci, Pireaynea, Coelum, Equateiy, and Vikitsv.
- **The Academy Island** founding date and many sensory/history fields are [TBD].

Historical Figures:

- **Saint Harnua (13th Saint)** — referenced as the most infamous Saint and Esterica's poisoner; no profile block anywhere on the page.
- **Empress Esterica Kulio** — referenced as mother of Maen & Coyre and "the Mother of a Dynasty"; no profile here (deferred to In-Story Characters).
- **Empty profile templates** — ~6 blank "[NAME] / [Title(s)] / [Date BR/AR]" skeleton blocks sit between King Viake and the twin prophets, awaiting figures.
- **Pervasive [TBD] fields** — nearly every Saint profile leaves "Name Meaning," "Ethnicity," "Appearance," and "How Characters View Them" as [TBD].
- **Undefined terms surfaced here** (need their home pages): **Liacaion** (the substance used to burn House Orana — Magic System), **Haitak** (Vandrea's anger drug), **Ananara** (the language of Solis's note), the **Taguar Murders**, the **Special Division** (*Crown of Glory*), and the **Pertari Stairs** / "the great emptiness" (afterlife).

Noble Houses (Batch 1):

- **House Mava** — major stub: founder, crest/symbolism, wealth, notable members & dates, allies, rivals, narrative role, and all post-Pre-Empire era statuses are [TBD]; known Gherci royals (Princess Kamerida Mava; the Kulio bride) are absent from its page.
- **House Orana** — founder, founding date, wealth, military, allies/rivals, traditions, values, reputation, and Crandona/Minara eras all [TBD].
- **House Kivier** — seat, wealth, military, religion, internal structure, allies/rivals [TBD].
- **House Hige** — empty "House Culture" section; Crandona's Era TBD.

- **House Patton** — "Active Years" blank; a ~1,000-year gap (~8,468–7,408 BR) between the two documented royal generations.
- **Undefined terms surfaced in houses** (pending their home pages): **Liacaion** (substance that burned House Orana), **Ananara** (language of Solis's note), **Rillic** (House Vika's religion), **Asata** (Kulio's "language of the gods"), the **Council of the Forsaken** (House Aedria), **Code of Rose** (Vika–Vemer), the **Kalip plague**, the **Medal of Heroes**, and **Agarisono** (the 13th month). (*Ilkai is now defined — a god-killing herb of Mount Aicren.*)

Noble Houses (Batch 2):

- **House Liazen** — near-total stub: only a motto; every section [TBD], despite supplying Queen Isalian, Queen Mari, Count Jinegi, and Lady Agari Liazen to the royal line (all documented only elsewhere).
- **House Leum** — near-total stub: status, founder, founding date, wealth, military, members all [TBD]; Isenaylini Leum (the Asleleri sisters' mother) absent.
- **House Caraen** — rivals, traditions, values, key industries, and the Solis/Crandona/Minara eras [TBD].
- **House Mena** — allies/rivals, values, reputation, and plot significance [TBD]; Quick-Facts "Colors: TBD."
- **House Arvento** — Quick-Facts "Colors: TBD" (given as Green/Gold later); narrative role [TBD].
- (*Now defined this pass: the Council of the Forsaken = Arvento/Aedria/Caraen justice org; the Taguar Murders anchored to ~8,094 BR Northern Aicruae.*)

Noble Houses (Batch 3):

- **House Dajanyi** — source of power, military, allies, and narrative role [TBD]; Duke Shaniser Dajanyi (Coyre's husband, Elleinaj's father) is absent despite being key to the Patton succession.
- **House Najil** — values, traditions, reputation, key industries, and narrative role [TBD].
- **House Yurea** — values, reputation, traditions, vulnerabilities [TBD].

- **House Leva** — Colors [TBD]; key industries, head-of-house succession dates, narrative role [TBD].
- **House Vemer** — Quick-Facts "Colors: TBD"; book/key-member fields [TBD].
- **House Aedria** — rival houses, traditions [TBD].
- *(Now anchored this pass: the UIB criminal/info network, God's Trial + Aursa Bill (Yurea), the Quarti Medal (Leva), the Mirrors of Nimlye + 60/40 Agreement (Dajanyi), TAKC (Aedria), and Baseik Fever.)*

Noble Houses (Batch 4):

- **House Baliva** —  total stub: the entire page is [TBD] despite being one of the most-referenced houses (destroyed in the War of World's End; the Daneya-incident queen's house).
- **House Catern** — founder, founding date, seat, members, and religion [TBD] (only the Aryanara/Vekta guardianship is documented).
- **House Toallu** — nearly all [TBD]; the Rlyana/Variae/Pyhia storyline (per House Yurea) is absent.
- **Houses Navefa, Miaran, Iriandet** — Vikitsv Traditionalist-Party stubs: founder, founding, members, dates all [TBD] (mottos, crests, faction, and Iswan worship are the only content).
- *(Now anchored this pass: the First Movement Party (Equateiy faction), the Traditionalist Party (Vikitsv faction), "The Believers" (Gherci), and the Brotherhood of Westwinds (Catern's religious opposition).)*

Noble Houses (Batch 5):

- **Houses Anasetanya, Veir, Rendenten, Dasbe, Kifan, Jivaya** —  all near-total stubs: founder, founding date, seat, members, dates [TBD]; only rank, faction, motto, crest, and (for the Vikitsv houses) Iswan worship are filled in.
- *(Now anchored this pass: the Equateiy two-duke structure (Kivier + Veir) and the Coelum belief-factions — Moon (Kifan), Sea (Jivaya), Land (Ochanan).)*

Noble Houses (Batch 6):

- **Eleven Aicruae houses are bare skeletons** (faction + kingdom only): Tikan, Anaio pana, Hert, Kauliv, Amecken, Miada, Yainaro (Divine); Cowsrer, Gaset,

Kilina (Common People); Brumik (no faction).

- **Houses Dai, Iarnailo** (Gherci) and **House Yailk** (Vikitsv) — founder, founding date, members, dates [TBD] (only faction, motto, crest, and a note or two).
- **Houses Malrancis & Pontia** (Gherci) — founder, founding, full member rosters [TBD]; documented only through their single Crandona's-era figure (Danik / Amuseri).
- *(Now anchored this pass: Vikitsv's Nationalist Party, Gherci's Populists / Reformers / Royalists, and the Crandona's-era figures Danik Malrancis, Amuseri Pontia, and Avromvog Stanyad.)*

Noble Houses (Batch 7 — final 15):

- **Renililas, Qari** (Vikitsv Nationalist), **Renalagardo** (Gherci Believers), **Ochanan** (Coelum Land), **Tazem** (Pireaynea, sole house) —  faction/motto/crest only; founders, dates, members [TBD].
- **Imbrer, Ganane, Balewer, Uaver, Vesmen, Adiye** (Equateiy Second Movement) and **Ashonve, Maro** (First Movement) —  near-total stubs.
- **Schmidtavaca & Reidskelisia** — documented only through their single Crandona's-era figure (Wioli / Ala); everything pre-Crandona [TBD].
- *(Now anchored: Equateiy's two-party system (First + Second Movement), the Coelum Land Faction (Ochanan), Pireaynea's lone house (Tazem), and the Caprlolan-forest rebel roster — Ala Reidskelisia, Hicksora Connorrita, Amuseri Pontia, Eveli Cathon, Thoati.)*
- *(Newly discovered, pending: 3 "across the Eras" era-roster subpages; the Thoati surname is still unknown.)*

Noble Houses (era rosters / Crests / WWG hub):

-  All three "across the Eras" subpages (Solis +18, Crandona +21, Minara +15 houses) are **name-only** lists; no per-house facts.
-  **House Benen** — listed on the Solis-era roster + crest gallery but has **no WWG dossier**; status/details unclear.
-  The **~114 WWG dossiers** were sampled in full — **15 of 114 opened, all identical blank templates**; the hub is a complete per-house dossier **structure**

that is entirely unwritten — the single largest structural gap in the canon.

COVERAGE REPORT

Fully read (verified against complete text):

- LOCATIONS (LOCATIONS) — all ~2,239 lines, all six nations + sacred sites + Academy + Crown of Glory sites.
- Historical Figures (Historical Figures) — all 894 lines: the two Patton family trees, the twelve detailed royal profiles, the twin prophets, all twelve Saint profiles (Aliirusk → Reron), the Civil War / Solisian-era figures, and the full Vandrea entry. ⚠ One embedded child subpage also titled "Historical Figures" is **not** yet opened; cross-page checks against TIMELINE, IN STORY CHARACTERS, and the book-info pages remain pending.

Partially read (NOT fully verified):

- Religion (Religion) — read in large part (divine family tree, Old Gods, the Thirteen Saints, the three religions, Aryanara/Vekta, Matsiali/Pataoiut, civil-war divine interventions). Tail not yet re-verified against the saved file.
- Noble Houses (Noble Houses) — hub index read; **all 61** house pages read in FULL — Batch 1 (Patton, Vika, Hige, Kulio, Orana, Mava, Kivier) + Batch 2 (Leum, Arvento, Caraen, Liazen, Mena) + Batch 3 (Vemer, Aedria, Yurea, Najil, Dajanyi, Leva) + Batch 4 (Catern, Baliva, Toallu, Navefa, Miaran, Iriandet) + Batch 5 (Anasetanya, Veir, Rendenten, Dasbe, Kifan, Jivaya) + Batch 6 (Tikan, Anaiopana, Hert, Cowsrer, Gaset, Yainaro, Kauliv, Amecken, Miada, Kilina, Dai, Yailk, Brumik, Malrancis, Iarnailo, Pontia) + Batch 7 (Renalagardo, Renililas, Qari, Imbrer, Ganane, Schmidtavaca, Balewer, Ashonve, Uaver, Vesmen, Maro, Reidskelisia, Adiye, Ochanan, Tazem). The hub holds **61** houses (its "62 subpages" counted the "across the Eras" index as a house) plus that index, whose pre-Conquest master roster is now read. Era rosters and the Crests gallery are now read in FULL; the WWG dossier-hub index is read. Still pending under Noble Houses: the **~114 WWG individual house dossiers** were sampled: **15 of 114 opened in full, all empty** — the hub is an unwritten scaffold; remaining ~99 inferred empty.

Categories now written (13): 1 Locations · 2 Historical Figures · 3 Noble Houses · 4 Religion · 5 Key Words · 6 In Story Characters · 7 Timeline · 8 Magic System · 9 Language · 10 Quote Bank · 11 Book Info (the four Tales) · 12 Era Reference & Culture pages · 13 Meta / Audit & Fix documents.

Coverage update (supersedes the "Fully/Partially read" notes above).

Since the early-pass note above, the audit has gone on to read: Religion (main) + the separate Religion #2 "Gods & Saints" hub, KEY WORDS AND TERMS, IN STORY CHARACTERS, TIMELINE, Magic System, QUOTE BANK, all four book-info pages (Three Sisters & Princess in Love **FULL**; Thousand Songs & Crown of Glory **PARTIAL** — long, truncated), ERA'S REFERENCE, Name Evolution Across Eras, Aicruae Funeral Traditions, Material Culture, the Fashion Collections hub, Noble House Crests, the three era rosters, MAPS/LOCATIONS (container), and the four author-side meta docs (CANON AUDIT — Tracking Doc, Inferred Canon Fixes ×2, TIMELINE — Proposed Build). Every CANON-hub page has now been processed at least once.

Still genuinely unread / low-priority:

- The **8 Fashion Collections subpages** (image-led; their titles were mined for spelling variants but the contents weren't opened).
- **THE SIX KINGDOMS MAP** image page — its text is summarized via the Tracking Doc, not independently opened.
- **~99 of the ~114 WVG noble-house dossiers** (15 opened, all verified blank; the remainder inferred blank — the hub is an unwritten scaffold).
- The **embedded duplicate child page** under Historical Figures.
- A few long pages were marked **PARTIAL** (Thousand Songs, Crown of Glory, and the two Inferred Canon Fixes docs) — core sections were read, but their truncated middles weren't exhaustively verified.

Cross-reference caveat: So far LOCATIONS and Historical Figures have been read in full, and Religion in large part; entities are cross-checked across those three. Everything else remains verified only within its home page. Names that

recur elsewhere — e.g. Civer, Solis, Iris, Orcus, Mihel/Harnua Kulio, the Asleleri sisters, Sevtor, House Orana/Leva/Leum/Mava/Kivier/Catern, Saint Duri, the twin prophets, Soli/Zopha, Ekhasostio & Paxtino, Goteivati, the Cidet, the Battle of Relirian/Reron — have **not yet** been cross-checked against the pages that define them. Those cross-page confirmations are pending the next passes.
